*Key Issues in Bioethics* Ralph Levinson,Michael Reiss,2003-12-16 Young people are increasingly being exposed to the huge and complex ethical dilemmas involved in issues such as genetic modification, animal rights and cloning, and they are bringing their views into the classroom. But how can teachers be sure they are sufficiently well-informed to help their pupils make sense of the diverse and emotive arguments surrounding these issues? This book holds the answer. Written by leading ethicists, scientists and technologists, it offers a balanced and jargon-free guide to such highly debated topics as: \* cloning \* in vitro fertilisation \* genetic screening and genetic engineering \* farm animal welfare \* the use of animals in medical experiments. Written specifically for the non-specialist teacher or lecturer, this book offers suggestions on how to approach the teaching of bioethics and provides useful sources of further information. It may also be of interest to undergraduates on science courses.

### **Handbook of Positive Psychology in Schools** Michael J. Furlong,Rich Gilman,E. Scott Huebner,2014-02-03

Understanding the factors that encourage young people to become active agents in their own learning is critical. Positive psychology is one lens that can be used to investigate the factors that facilitate a student's sense of agency and active school engagement. In the second edition of this groundbreaking handbook, the editors draw together the latest work on the field,

identifying major issues and providing a wealth of descriptive knowledge from renowned contributors. Major topics include: the ways that positive emotions, traits, and institutions promote school achievement and healthy social and emotional development; how specific positive-psychological constructs relate to students and schools and support the delivery of school-based services; and the application of positive psychology to educational policy making. With thirteen new chapters, this edition provides a long-needed centerpiece around which the field can continue to grow, incorporating a new focus on international applications of the field.

Handbook of Positive Psychology in Schools Kelly-Ann Allen, Michael J. Furlong, Dianne Vella-Brodrick, Shannon Suldo, 2022-02-23 The Handbook of Positive Psychology in Schools offers the most current and comprehensive insights into how positive psychology principles provide a framework for young people to become active agents in their own learning. The third edition of this groundbreaking volume assembles the latest global research identifying fundamental assets—hope, optimism, gratitude, self-efficacy, emotional regulation, among others—that support students’ learning and well-being. Chapters examining social-ecological perspectives on classroom quality and school climate provide best practice guidance on schoolwide policies and practices. These 35 new chapters explore positive psychology’s ongoing influence and advances on prevention, intervention, and assessment practices in schools.

*Walking the Victorian Streets* Deborah Epstein Nord, 2018-09-05 Literary traditions of urban description in the nineteenth century revolve around the figure of the stroller, a man who navigates and observes the city streets with impunity. Whether the stroller appears as fictional character, literary persona, or the nameless, omnipresent narrator of panoramic fiction, he casts the woman of the streets in a distinctive role. She functions at times as a double for the walker's marginal and alienated self and at others as connector and contaminant, carrier of the literal and symbolic diseases of modern urban life. In *Walking the Victorian Streets*, Deborah Epstein Nord explores the way in which the female figure is used as a marker for social suffering, poverty, and contagion in texts by De Quincey, Lamb, Pierce Egan, and Dickens. What, then, of the female walker and urban chronicler? While the male spectator enjoyed the ability to see without being seen, the female stroller struggled to transcend her role as urban spectacle and her association with sexual transgression. In novels, nonfiction, and poetry by Elizabeth Gaskell, Flora Tristan, Margaret Harkness, Amy Levy, Maud Pember Reeves, Beatrice Webb, Helen Bosanquet, and others, Nord locates the tensions felt by the female spectator conscious of herself as both observer and observed. Finally, *Walking the Victorian Streets* considers the legacy of urban rambling and the uses of incognito in twentieth-century texts by George Orwell and Virginia Woolf.
