Radio and Women's Empowerment in Francophone West Africa Emma Heywood, 2023-12-28 This open access book breaks new ground by examining the significant role played by radio in empowering women in three Francophone West African countries: Mali, Niger and Burkina Faso. It examines the representation and perception of key themes broadcast by radio and associated with women's empowerment in the three countries. Each chapter contextualises a specific topic in the country and then explores discrete aspects of radio's provision. The topics covered in the chapters are women's political engagement; women and finances; women and life within marriage; inheritance; women's involvement in radio structures; and radio, internally displaced women, and trauma. Given the social, economic and political vulnerability and deteriorating security situation of the three countries, this book provides a timely and meaningful contribution to acknowledging and understanding the vital role of radio in women's empowerment.

Mergers and Acquisitions Mark Thomas, Janna L. Rose, 2024-04-05 Covid-19 has brought so much uncertainty, but one certainty is that the vaccine race will generate winners and losers in the pharmaceutical and biotechnology industries. This will have a major impact on merger and acquisition activity. While the plethora of merger and acquisition deals are abundantly reported by the news media, there is a clear lack of in-depth analysis on the multiple rationales and various challenges in the life sciences industry. By offering contributions from a variety of experts in the biotechnology and pharmaceutical industries, as well as experts on mergers and acquisitions, this edited collection will draw upon the knowledge of a variety of different actors within the fields of pharma and biotech. This book offers a timely exploration of the complexities of mergers and acquisitions in the pharmaceutical and biotechnology industries while seeking to bridge the gap between theory and practice. It presents a critical analysis of the rationale for acquisitions and studies the challenges of ensuring a successful deal. In the light of the Covid-19 pandemic, it will also explore the impact this may have on the industry, which may further stimulate merger and acquisition activity. It will be of interest to researchers, academics, policymakers, and students in the fields of strategy, management, governance, and the biotechnology and pharmaceutical industries.

Border Cities and Territorial Development Eduardo Medeiros, 2021-11-21 This monograph analyses the role of border cities in promoting territorial development processes in border regions across the world. It not only embraces the scientific

fields of regional and urban studies but also addresses territorial (urban, local, regional) development and planning theories, as well as the effects of development policies applied to border regions in both Europe and North America. In essence, the book offers a full toolkit of border regions' territorial development knowledge and, in particular, advances a range of policy development proposals. It provides a comprehensive introduction to contemporary thinking about how border cities can play a decisive role in boosting territorial development processes in border regions. The book is divided into three parts. Part I presents a theoretical framework on the role of border cities in promoting territorial development and planning in border regions. Part II debates current mainstream policies focusing on supporting border regions and specifically border cities in the EU, the UK, and North America. Finally, Part III presents a wealth of updated knowledge, based on the analysis of several concrete case studies: border cities from both Europe (north, south, east and west) and North America (Canada, the United States, and Mexico). The chapters are written by some of the most renowned authors on the subject, including scholars from several European and North American countries, as well as the secretary generals of three European border regions associations (AEBR, MOT, and CESCO). The book will thoroughly prepare students and provide knowledge to academics and policymakers in the fields of urban and regional planning and development studies, human geography, economic development, EU policies, border regions, and policy impacts.

Climate change justice and human rights: An African perspective Ademola Oluborode Jegede, Oluwatoyin Adejowo, 2023-01-16 Populations in Africa are vulnerable to both the direct and indirect adverse effects of climate change that are of human rights significance. The urgency for states in Africa to implement climate interventions while they face developmental challenges, however, raises questions of 'justice' or 'fairness' between the developed and the developing states. Consequently, interrogating how the human rights paradigm may respond to negative implications of climate change and its 'fairness' is important as states continue to engage with the climate change standard setting. This edited volume critically interrogates human rights paradigm as an intervention to secure climate change justice for vulnerable populations; analyses regional protection against human rights consequences of climate change; and assesses emerging interventions based on domestic regulatory frameworks on climate change in selected states in Africa.

Human Rights Defenders and the Law Núria Saura-Freixes, 2023-02-24 This book presents a comprehensive examination of the Declaration on Human Rights Defenders and provides an analysis of the level of its reflection in regional human rights systems. The work explores the development of the role of the individual in human rights protection since the 1998 United Nations Declaration on Human Rights Defenders. It locates the nature, activities and need for protection of human rights defenders within the current international legal framework and outlines the place and scope for a specific right to promote and protect human rights. It traces the origins of the right and the main international instruments that define it, both at national and international level. Finally, it considers the impact that the right to defend human rights can have on

constitutional and international law. The book will be a valuable resource for academics and researchers working in the areas of International Human Rights Law and Constitutional Law.

Increasing Access to Health Workers in Remote and Rural Areas Through Improved Retention World Health Organization, 2010 World Health Organization (WHO) has drawn up a comprehensive set of strategies to help countries encourage health workers to live and work in remote and rural areas. These include refining the ways students are selected and educated, as well as creating better working and living conditions ... The guidelines are a practical tool all countries can use. As such, they complement the WHO Global Code of Practice on the International Recruitment of Health Personnel, adopted by the Sixty-third World Health Assembly.--Preface.

Emerging Global Population Health Risks: From Epidemiological Perspectives Russell Kabir ,Ali Davod Parsa,Ilias Mahmud, 2024-08-22 Public and global health professionals realize that despite significant advances in improving population health and preventing high mortality from communicable and non-communicable diseases and managing/treating both communicable and non-communicable diseases the global population health status remains fragile. This is partly due to the global life pattern in the 21st century making world as a global village. Individuals' movements in global society have been facilitated rapidly and the current advance in travel and trade across different geographical locations allow rapid spread of any newly identified infectious agents. Therefore, relatively the likelihood of an outbreak and pandemic increases if there is no suitably coordinated active global surveillance in place.

From Revolution to Chaos in Haiti (1804-2019) Rhodner J Orisma, 2020-01-13 Haiti is a failing state. The country is still unable to provide basic needs such as employment, food, housing, healthcare and education to a majority of its inhabitants in over two centuries after its revolution and Independence of 1804. Relatively incompetent, both the nation's government and its opposition ignore moral politics, and instead, focus on corruption and fighting each other. Though free from French rule, the country remains tied to its slave past and violent history. It seems like a socioeconomic and urban consensus cannot be achieved in order to carry out sustainable solutions for the people. This book, *From Revolution to Chaos in Haiti, 1804-2019: Urban Problems and Redevelopment Strategies*, is an attempt to analyze this situation from a historical perspective. First, the Haitian Revolution of 1804 is displayed to show the violent and bloody struggles of outstanding leaders and warriors against colonial powers for the making of a great political and independent nation. Second, Haiti's decline is analyzed starting from the assassination of its first leader, Jean-Jacques Dessalines, in 1806 to the country's bottom rank in the global stratification during the 2010's along with the impact of the catastrophic 2010 earthquake. The main factors noted within this decline are linguistic, agricultural, urban and (HIV, AIDS, TB) healthcare issues and undercapitalization along with ideological confusions (capitalism, neoliberalism, socialism, social democracy) and political instability.

The River Nile in the Post-colonial Age Terje Tvedt, 2010 The Nile Basin is a vast and varied area of 350 million people. Parts of the basin have become the very symbols of African misery, suffering drought, genocide, state failure and aid dependency. At its heart lies the Nile itself. Yet while the importance of the river is well documented for the colonial period there is no comprehensive account of its management after independence. The River Nile in the Post-Colonial Age details the modern development of the Nile Basin and of the efforts to manage its waters. With important new material by researchers from each of the countries through which the Nile passes, it provides an indispensable aid to understanding the complex history of the basin, the politics surrounding it and the efforts being made to jointly manage it.

Football and Its Future Francesco Manfredi, 2006 Football is universal in the values that it protects and proposes, and in its capacity to produce social and economic value, the economic value coming from the professional domain and the social value from the amateur domain. The former is the domain of stars, big events, new stories, victories and outstanding feats of athleticism; the second is the less visible side of the whole movement, the domain of spontaneity, fun and participants of all ages and abilities being together regardless of race, religion, language or the chances of victory or great athletic feats. This book, the result of much study and contemplation on football management, embraces all of these themes, starting with the acknowledgement of the diversity of these two domains and at the same time of their inseparability.

Estudios en El Extranjero Unesco, 2003 This is the 32nd edition of the publication which contains over 2,500 entries giving information about post-secondary education and training opportunities in all academic and professional fields in 147 countries for years 2004 and 2005.
