Gateways to the Book Gitta Bertram, Nils Büttner, Claus Zittel, 2021-08-24 Gateways to the Book investigates the complex image-text relationships between frontispieces and illustrated title pages on the one hand and texts on the other, in European books published between 1500 and 1800. Although interest in this broad field of research has increased in the past decades, many varieties of title pages and a great deal of printers and books remain as yet unstudied. The fifteen essays collected in this volume tackle this field with a great variety of academic approaches, asking how the images can be interpreted, how the texts and contexts shape their interpretation, and how they in turn shape the understanding of the text.

Perspectives on Design Education in India and Asia Peer M. Sathikh, Ravi Poovaiah, Venkatesh Rajamanickam, Karin G. Oen, 2024-12-30 This book spotlights design and media education in Asia, with contributors providing their reflections on curriculum development, pedagogy, and practice from Australia, China, Japan, India, Mongolia, the Philippines, Singapore, and Turkey. The chapters provide in-depth and specific examples of how curricula and educational resources have been organised with respect to a wide variety of subjects, including aesthetics, engineering, and practice-based coursework. These course plans have also been adapted to respond to questions about integrating emerging technologies in the classroom and addressing changing industry needs as well as the need to encourage resilience and leadership skills across student and faculty cohorts. Although not an analysis of educational and industrial policies, some key documents such as The India Design Report of 1958 by Charles and Ray Eames and India's National Education Policy of 2020 are referenced to provide important background information for understanding the past, present, and future of the design education ecosystem across the region. Presenting both historical context and practical contemporary applications of curricula in specific universities and design schools, this volume is compiled to share resources among faculty and researchers interested in global Asian design pedagogy who have previously relied upon publications centred on the UK and US contexts. It will appeal to design educators

and anyone responsible for design education curricula across the Asian region and beyond.
