Guidelines for the Technical Examination of Bronze Sculpture David Bourgarit,Jane Bassett,Francesca Bewer,Arlen Heginbotham,Andrew Lacey,Peta Motture,2025-02-11 The essential reference for anyone engaged in the material study of cast bronze sculpture. Since the fourth millennium BCE, bronze has been the preferred medium for some of the most prestigious and sacred works of art. But only through interdisciplinary research can the fabrication of these extraordinary objects be properly investigated, interpreted, and documented. This innovative publication bridges the expertise of myriad art-technological specialists to create a new framework for advancing the understanding of bronze sculpture. Essential reading for curators, conservators, scientists, archaeologists, sculptors, metallurgists, founders, dealers, collectors, and anyone interested in the life cycle of a bronze, this volume explains how to identify the evidence of process steps, metals used, casting defects, and surface work and alterations before moving on to address analytical techniques ranging from visual exams to imaging, material analyses, and dating. The guidelines are accompanied by detailed illustrations, including videos, charts, and animations; a robust vocabulary, ensuring precision across English, German, French, Italian, and Chinese; a diverse selection of case studies; and a comprehensive bibliography. The free online edition of this open-access publication is available at getty.edu/publications/bronze-guidelines/ and includes videos and zoomable illustrations. Also available are free PDF and EPUB downloads of the book.

Process Industries 2 Jean-Pierre Dal Pont,Marie Debacq,2020-10-09 As a result of knowledge exchange between the academic and industrial worlds, this book analyzes the process industries impacted by the digital revolution that accompanies the ongoing energy and environmental transitions. Process Industries 2 first discusses bio-industries and analyzes the development of products of microbial origin. It then studies all the stages of industrialization that facilitate the progress from research to the production of a finished product, as well as industrial management techniques. Using concrete examples, this book presents the instruments of the digital revolution (artificial intelligence, virtual reality, augmented reality, the Internet of Things, digital twins), while analyzing their impact on the supply chain and operators. Boxes within the book, written by recognized specialists, invite both students and professionals, who are faced with a changing world, to reflect on the industry and the world of tomorrow.
