MILLIS In 1966 the Citizens Commission on Graduate Medical Education observed that the explosive growth in biomedical science and the consequent increase in medical skill and technology of the twentieth century had made it possible for physicians to respond to the episodes of illness of patients with an ever-increasing effectiveness, but that the increase in knowledge and technology had forced most physicians to concentrate upon a disease entity, an organ or organ system, or a particular mode of diagnosis or therapy. As a result there had been a growing lack of continuing and comprehensive patient care. The Commission expressed the opinion that Now, in order to bring medicine's enhanced diagnostic and therapeutic powers fully to the benefit of society, it is necessary to have many physicians who can put medicine together again. ! The Commission proceeded to recommend the education and training of substantial numbers of Primary Physicians who would, by assuming primary responsibility for the patient's welfare in sickness and in health, provide continuing and comprehensive health care to the citizens of the United States. In 1978 it is clear that the recommendation has been accepted by the public, the medical profession, and medical education. There has been a vigorous response in the development of family medicine and in the fields of internal medicine, pediatrics, and obstetrics. One is particularly impressed by the wide acceptance on the part of medical students of the concept of the primary physician. Dr. John S.

Advanced Health Assessment & Clinical Diagnosis in Primary Care - E-Book Joyce E. Dains,Linda Ciofu

Baumann,Pamela Scheibel,2015-04-24 Take the 'next step' in health assessment! Advanced Health Assessment and Clinical Diagnosis in Primary Care, 5th Edition goes beyond basic history and physical examination to help you master the diagnostic reasoning process. You'll develop this key skill by following assessment guidelines that focus on a specific complaint rather than beginning with a previously established diagnosis or disease entity. Written by advanced practice nursing experts Joyce Dains, Linda Baumann, and Pamela Scheibel, this edition includes new chapters on evidence-based preventive health screening and on heartburn and indigestion, along with a new full-color design. Master the differential diagnosis process

outlined in this book, and you'll be able to accurately diagnose the majority of patients seen in today's primary care settings. A clear, consistent diagnostic reasoning process takes you to the next step of health assessment — beyond basic history and physical examination to diagnostic reasoning. Diagnostic Reasoning: Focused History sections use 'self-questions' to walk you through the thinking process involved in obtaining a pertinent, relevant, problem-specific history that will assist in differential diagnosis. Diagnostic Reasoning: Focused Physical Examination sections explain how to perform more advanced diagnostic techniques and interpret the findings. Key Questions guide you through assessment and toward an accurate diagnosis by listing questions to ask the patient, followed by explanations of what the patient's responses might signify. Laboratory and Diagnostic Studies sections outline the types of studies that might be appropriate based on the focused history and focused physical examination. Differential Diagnosis sections offer the most common diagnoses for each patient problem and summarize the history and physical examination findings, along with recommended laboratory and diagnostic studies. Differential Diagnosis tables provide a quick-reference summary of possible diagnoses for each patient problem. Evidence-Based Practice boxes — more than 30 are NEW — summarize the scientific evidence related to the diagnosis of patient problems. Alphabetical Table of Contents provides a convenient listing of common health problems.
