

What Is A Photovore

Lauren Gardner

Robotics Mr. Rohit Manglik,2023-05-23 This book offers a detailed exploration of robotics, focusing on key concepts, methodologies, and practical implementations relevant to modern engineering and technology practices.

Star Dragon Mike Brotherton,2005-01-10 The SS Cygni probe sent back hours of video, captured by the Biolathe AI, but only a few minutes mattered--the four minutes that showed a creature made of fire, living , moving, dancing in the plasma fire of the double star's accretion disk. A dragon made of star stuff, so alien that only a human expedition to observe and perhaps capture it, could truly understand them. It's a perilous journey into the future, however, for SS Cygni is 245 light-years from Earth, and even though only two years' subjective time will pass on board the Karamojo, the crew will return to an Earth where five hundred years have passed. Captain Lena Fang doesn't care--she has made her life on her ship, where her best friend is the ship's AI. Samuel Fisher, the contract exobiologist,doesn't care, either. He is making the voyage of a lifetime and in the small world of the Karamojo he will have to live with the consequences of his obsessive quest for knowledge. The rest of the small crew--Axel Henderson, the biosystems engineer; Sylvia Devereaux, the beautiful physical sciences expert; and Phil Stearn, the ship's jack-of-all-trades--have their own reasons for saying good-bye to everyone they have ever known. As the Biolathe AI said, uncertain five hundred- year round trips don't attract the most stable personalities, but somehow they'll have to learn to get along with each other, if they're to catch their dragon and come home again. For at the end of the journey is the star dragon--a creature of fire with a nuclear furnace for heart. The crew of the Karamojo--human and AI alike--will risk everything to capture it, and it will take all their technology, all their skill, and more courage than they knew they had, to come home alive. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Sentenced to Prism Alan Dean Foster,2021-07-27 One man struggles to survive on a hostile alien world in this thrilling adventure from the #1 New York Times--bestselling author of Madrenga. Some people are convinced they can do anything; Evan Orgell is one of them. So when his company president sends him off-world to investigate a breakdown in communications from a small research station on a newly discovered planet, he's all in. The planet's resources could mean massive profits for the company—and a successful mission could mean massive advancement for Evan. Nothing ventured, nothing gained. Clad in a Mobile Hostile World suit, Evan has no doubts about his safety—until he lands on the world of

Prism. Though he's already dealt with thousands of theoretical extraterrestrial problems, nothing prepares him for what he finds there. Hungry, invading lifeforms are everywhere. Over two dozen highly trained people have been overwhelmed and killed, some with their bones eaten from the inside out. It's utter devastation. Then, while Evan searches for survivors, his indestructible suit meets its match—and he must face the bloodthirsty predators of Prism alone, unprotected, with only his wits to rely on . . . Praise for Alan Dean Foster "One of the most consistently inventive and fertile writers of science-fiction and fantasy." —The Times (London) "Alan Dean Foster is a master of creating alien worlds." —SFRevu.com "Foster knows how to spin a yarn." —Starlog "Alan Dean Foster is the modern day Renaissance writer, as his abilities seem to have no genre boundaries." —Bookbrowser
