Thirumalaisamy P. Velavancorresponding

Address List of the Linnean Society of London Linnean Society of London, 1910

Address in Portuguese and Spanish Martin Hummel, Célia dos Santos Lopes, 2020-07-20 The volume provides the first systematic comparative approach to the history of forms of address in Portuguese and Spanish, in their European and American varieties. Both languages share a common history—e.g., the personal union of Philipp II of Spain and Philipp I of Portugal; the parallel colonization of the Americas by Portugal and Spain; the long-term transformation from a feudal to a democratic system—in which crucial moments in the diachrony of address took place. To give one example, empirical data show that the puzzling late spread of Sp. usted ‘you (formal, polite)’ and Pt. você ‘you’ across America can be explained for both languages by the role of the political and military colonial administration. To explore these new insights, the volume relies on an innovative methodology, as it links traditional downstream diachrony with upstream diachronic reconstruction based on synchronic variation. Including theoretical reflections as well as fine-grained empirical studies, it brings together the most relevant authors in the field.

Cities in Transition Rita Schneider-Sliwa, 2006-01-23 This book was written with the aim of showing that even in the era of globalization developments appearing in cities are not subject to almost unconditional global forces. Rather, universal forces are decisive eventualities in the process of urban restructuring, often influencing its course and speed, yet developments and particularities within a city strongly influence the course of events and the extent to which negative characteristics of globalization might occur. Berlin, Brussels, Hanoi, Ho Chi Minh City, Hong Kong, Jerusalem, Johannesburg, Moscow, St. Petersburg, Sarajevo and Vienna: Using these important cities the special relationship between global and local/regional forces is analyzed. The case studies were selected based on their political and cultural context and the fact that their social and political fabric was subject to major changes in the recent past. How global processes manifest themselves locally depends to a great extent on how development processes and endogenic potentials are initiated locally in order to cope with the new global economic and societal conditions.

Legal Theory and Interpretation in a Dynamic Society Alexander Bruns, Yuanshi Bu, Hanno Merkt, Sonja Meier, Michael Pawlik, Eiji Takahashi, Silja Vöneky, Jan von Hein, 2021-07-02 Der Band versammelt Beiträge, die anlässlich des 7. Seoul-Freiburger Rechtswissenschaftlichen Symposiums im September 2019 in Seoul gehalten wurden. Die

Zusammenarbeit und der akademische Austausch zwischen den juristischen Fakultäten der Seoul National University (SNU) und der Albert-Ludwigs-Universität Freiburg hat eine alte und wertvolle Tradition der engen Beziehungen zwischen dem koreanischen und dem deutschen Recht lebendig gehalten. Das 7. Symposium war dem Thema Rechtstheorie und -auslegung in einer dynamischen Gesellschaft gewidmet und deckte ein breites Spektrum an Themen ab, die in sechs Sektionen unterteilt waren: I. Rechtstheorie und -auslegung, II. Unternehmensrecht, III. Internationales Privatrecht und Zivilprozessrecht, IV. Recht der künstlichen Intelligenz, Eigentumsrecht und Strafrecht. V. Vertragsrecht, und VI. das Verhältnis von supranationalem und innerstaatlichem Verfassungsrecht. Die meisten der auf dem Symposium gehaltenen Vorträge sind in diesem Band versammelt.

Algebraic Geometry: Salt Lake City 2015 Tommaso de Fernex, Brendan Hassett, Mircea Mustață, Martin Olsson, Mihnea Popa, Richard Thomas, 2018-06-01 This is Part 1 of a two-volume set. Since Oscar Zariski organized a meeting in 1954, there has been a major algebraic geometry meeting every decade: Woods Hole (1964), Arcata (1974), Bowdoin (1985), Santa Cruz (1995), and Seattle (2005). The American Mathematical Society has supported these summer institutes for over 50 years. Their proceedings volumes have been extremely influential, summarizing the state of algebraic geometry at the time and pointing to future developments. The most recent Summer Institute in Algebraic Geometry was held July 2015 at the University of Utah in Salt Lake City, sponsored by the AMS with the collaboration of the Clay Mathematics Institute. This volume includes surveys growing out of plenary lectures and seminar talks during the meeting. Some present a broad overview of their topics, while others develop a distinctive perspective on an emerging topic. Topics span both complex algebraic geometry and arithmetic questions, specifically, analytic techniques, enumerative geometry, moduli theory, derived categories, birational geometry, tropical geometry, Diophantine questions, geometric representation theory, characteristic and p -adic tools, etc. The resulting articles will be important references in these areas for years to come.

Legacy Of Franz Rosenzweig Luc Anckaert, Martin Brasser, Norbert Max Samuelson, 2004 A representative survey of the contemporary Rosenzweig research, gathering the state of affairs of the main spearheads of the research and it highlights the incentives for the programs to come.

Contributions to Algebraic Geometry Piotr Pragacz, 2012 The articles in this volume are the outcome of the Impanga Conference on Algebraic Geometry in 2010 at the Banach Center in Bedlewo. The following spectrum of topics is covered: K3 surfaces and Enriques surfaces Prym varieties and their moduli invariants of singularities in birational geometry differential forms on singular spaces Minimal Model Program linear systems toric varieties Seshadri and packing constants equivariant cohomology Thom polynomials arithmetic questions The main purpose of the volume is to give comprehensive introductions to the above topics, starting from an elementary level and ending with a discussion of current research. The first four topics are represented by the notes from the mini courses held during the conference. In the articles, the reader will find classical

results and methods, as well as modern ones. This book is addressed to researchers and graduate students in algebraic geometry, singularity theory, and algebraic topology. Most of the material in this volume has not yet appeared in book form.

International Dictionary of Library Histories David H. Stam, 2001-11-01 Following the format of Fitzroy Dearborn's highly successful International Dictionary of Historic Places and International Dictionary of University Histories, the International Dictionary of Library Histories provides basic information for each institution - location and holdings - followed by an extensive (1,000-5,000 word) essay on its history as well as a Further Reading list. In addition, the dictionary includes introductory articles on the history of various types of libraries and a library history in various regions of the world. The dictionary profiles more than 200 institutions from around the world, including the world's most important research libraries and other libraries with globally or regionally notable collections, innovative traditions, and significant and interesting histories. The essays take advantage of the growing scholarship of library history to provide insightful overviews of each institution, including not only the traditional values of these libraries but their innovations as well, such as developments in automated systems and electronic delivery. The profiles will emphasize the unique materials of research in these institutions - archives, manuscripts, personal and institutional papers. The introductory articles on types of libraries include topics ranging from theological libraries to prison libraries, from the ancient to the digital. An international team of more than 200 leading scholars in the field have contributed essays to the project.
