A World of Curiosities Louise Penny, 2022-11-29 INSTANT #1 NEW YORK TIMES BESTSELLER Agatha Award Winner for Best Contemporary Novel Chief Inspector Armand Gamache returns in the eighteenth book in #1 New York Times bestseller Louise Penny's beloved series. It's spring and Three Pines is reemerging after the harsh winter. But not everything buried should come alive again. Not everything lying dormant should reemerge. But something has. As the villagers prepare for a special celebration, Armand Gamache and Jean-Guy Beauvoir find themselves increasingly worried. A young man and woman have reappeared in the Sûreté du Québec investigators' lives after many years. The two were young children when their troubled mother was murdered, leaving them damaged, shattered. Now they've arrived in the village of Three Pines. But to what end? Gamache and Beauvoir's memories of that tragic case, the one that first brought them together, come rushing back. Did their mother's murder hurt them beyond repair? Have those terrible wounds, buried for decades, festered and are now about to erupt? As Chief Inspector Gamache works to uncover answers, his alarm grows when a letter written by a long dead stone mason is discovered. In it the man describes his terror when bricking up an attic room somewhere in the village. Every word of the 160-year-old letter is filled with dread. When the room is found, the villagers decide to open it up. As the bricks are removed, Gamache, Beauvoir and the villagers discover a world of curiosities. But the head of homicide soon realizes there's more in that room than meets the eye. There are puzzles within puzzles, and hidden messages warning of mayhem and revenge. In unsealing that room, an old enemy is released into their world. Into their lives. And into the very heart of Armand Gamache's home.

The Spaces That Never Were in Early Modern Art Jelena Todorović, 2019-08-15 Throughout history, the research of space has always been an issue of great interest. Since classical Antiquity, the physical space itself and its imperfect double, the illusionary space used in the visual arts, have been one of the perpetual obsessions of man. However, there are very few studies that question the reality of represented space, and deal with those liminal phenomena that exist on the blurred boundary between reality and imagination. Such spaces were never defined by carefully drawn borders; they were usually outlined by the ephemeral and ever changing barriers. For that very reason, liminal spaces describe those curious worlds confined in gardens and collections, they underpin all those dreams of ideal societies, and construct visions of unobtainable and distant shores. Liminal spaces are the territories not usually found on maps and in atlases, they are not subjected to laws

of perspective and elude the usual representations. They are always beyond and behind the established depiction of space. Often, they possess yet another layer of signification, that transforms a mere image of nature into a political manifesto, the lines on precious stones into the shapes of vanished cities, and private art collections into a dream of absolute power. This book explores different representations and forms of liminal spaces, that on the one hand, deeply influenced the history of the early modern imagination, and, on the other, established the models for our own understanding of liminal spatial phenomena.

Rarities of These Lands Claudia Swan, 2021-03-09 A vivid account of Dutch seventeenth-century art and material culture against the backdrop of the geopolitics of the early modern world The seventeenth century witnessed a great flourishing of Dutch trade and culture. Over the course of the first half of the century, the northern Netherlands secured independence from the Spanish crown, and the nascent republic sought to establish its might in global trade, often by way of diplomatic relations with the Ottoman Empire and other Muslim powers. Central to the political and cultural identity of the Dutch Republic were curious foreign goods the Dutch called rarities. *Rarities of These Lands* explores how these rarities were obtained, exchanged, stolen, valued, and collected, tracing their global trajectories and considering their role within the politics of the new state. Claudia Swan's insightful, engaging analysis offers a novel and compelling account of how the Dutch Republic turned foreign objects into expressions of its national self-conception. *Rarities of These Lands* traces key elements of the formation of the Dutch Republic—artistic and colonialist ventures alike—offering new perspectives on this momentous period in the history of the Netherlands and its material culture.

Africans in East Anglia, 1467-1833 Richard Maguire, 2021 What were the lives of Africans in provincial England like during the early modern period? How, where, and when did they arrive in rural counties? How were they perceived by their contemporaries? This book examines the population of Africans in Norfolk and Suffolk from 1467, the date of the first documented reference to an African in the region, to 1833, when Parliament voted to abolish slavery in the British Empire. It uncovers the complexity of these Africans' historical experience, considering the interaction of local custom, class structure, tradition, memory, and the gradual impact of the Atlantic slaving economy. Richard C. Maguire proposes that the initial regional response to arriving Africans during the fifteenth and sixteenth centuries was not defined exclusively by ideas relating to skin colour, but rather by local understandings of religious status, class position, ideas about freedom and bondage, and immediate local circumstances. Arriving Africans were able to join the region's working population through baptism, marriage, parenthood, and work. This manner of response to Africans was challenged as local merchants and gentry begin doing business with the slaving economy from the mid-seventeenth century onwards. Although the racialised ideas underpinning Atlantic slavery changed the social circumstances of Africans in the region, the book suggests that they did not completely displace older, more inclusive, ideas in working communities.
