A tool for teaching English: Podcasts Emil Müllner, 2012-02-21 Seminar paper from the year 2009 in the subject Didactics for the subject English - Pedagogy, Literature Studies, grade: Sehr gut, Educational academy of the federation Steiermarks, course: Akademielehrgang Englisch, language: English, abstract: The goal of this thesis is to gain numerous techniques for integrating podcasts and podcasting into teaching and learning, especially in the subject English. This work is also written for colleagues who want to make a valuable contribution to teaching foreign languages and who have the courage to organize activities combined with innovative technology for our students. Within the pages of this paper, they will find everything they need to know to get started in podcasting. I would be glad, if others use this work or even expand it, so that an active exchange of ideas can take place. At the beginning of this paper I am going to explain what a podcast is and why it is becoming such a popular medium. Next, the thesis gives a short historical overview, shows directories to browse for podcasts and how to create such an audio recording (software, hardware and recording equipment). Then various techniques for publishing and distributing podcasts are explored. The paper also presents free podcast hosting sites and gives tips about copyright law and how it applies to podcasting. Practical file management strategies, including using iTunes to organize audio files, are also discussed. After building a solid technical foundation, the thesis turns to the way in which podcasting can be used at school. This chapter introduces the reader to a variety of podcasting lessons that can motivate the students.

Integrating Information and Communication Technologies in English for Specific Purposes Rosa Muñoz-Luna, Lidia Taillefer, 2017-11-07 This book fills the need for a text that integrates Information and Communication Technologies (ICTs) into English for Specific Purposes (ESP). It offers insights on current methodological principles in ESP in both academic and professional contexts, drawing on authentic teaching and learning situations, and analyses best practice guidelines. Part I begins with ESP pedagogical principles and technological practice in order to focus on its two main branches: English for Academic Purposes, which includes linguistic skills and students' needs, and English for Occupational Purposes, specifically looking at Business, Medical and Translators courses. This book is a great resource for ESP researchers, educators and students, because it provides case studies of how ICTs can be used in English for multiple purposes. Authors present their experiences of integrating tools into their instructions, with each chapter contributing unique pedagogical implications.

Thinking Through New Literacies for Primary and Early Years Jayne Metcalfe, Debbie Simpson, Ian Todd, Mike Toyn, 2013-06-17 *Thinking Through New Literacies for Primary and Early Years* is an accessible text that encourages readers to consider deeply what is meant by 'literacy' today. It explores the many different ways in which teachers and children develop their own literacy. Specifically written for education students in the later years of their course, the text draws on research and practice to explore the challenges and opportunities involved, while helping to develop the reader's own critical thinking skills. The book begins by asking 'what's new about new literacies?' and goes on to explore some technological innovations designed to support the emergent reader and writer. It considers verbal literacy, speaking and listening, and

visual literacy. Readers are encouraged to think through the issues surrounding inclusion and the legal and ethical issues raised by this post-typographic age. Throughout, practical guidance runs alongside structured critical thinking exercises to help the reader reflect on both theory and practice. Design Solutions for Adaptive Hypermedia Listening Software Turel, Vehbi, 2021-06-18 Adaptive hypermedia listening software enables materials writers to combine and deliver a wide range of digital elements on the same digital computer platform more efficiently. Such a combination and delivery provides a multidimensional, multi-sensory digital environment in which rich, efficient, instant, comprehensible, optimum, and meaningful input and feedback can be presented effectively and efficiently. Moreover, language learners' attention can be drawn to forms and meanings in input. Such aspects correspond with different theories and hypotheses of language learning and teaching. This presents users/learners with an environment that is easy to use, tension-free, and optimal during self-study. However, to be able to design and develop cost effective and professional adaptive hypermedia listening software, there are certain scientific educational findings and implications that need to be implemented at every single stage. To have access to such vital findings is not so easy, and research must address this area. *Design Solutions for Adaptive Hypermedia Listening Software* explores how to design and create technically and pedagogically sound and efficient interactive adaptive hypermedia listening software for language learners in any language. The chapters will cover learner strategy tools, the effectiveness of this technology, best practices in adaptive hypermedia listening software, and the benefits and challenges of this technology for language learning. It is ideal for companies, institutions, teachers, policymakers, academicians, researchers, advanced-level students, technology developers, and decision-making pertinent government officials interested in designing and developing multimedia listening environments for language learners.
