Playing for a Winner Brandon Isleib,2017-01-10 He never felt like a Hall of Famer. You can't argue with championships. If he was so good, why were his teams so bad? On talk shows and in sports bars, statements like these are often made about both underrated and overrated players. It's generally accepted that being in a bigger market or on a winning team can cause a player to be overrated, while the opposite can leave them underrated. Examining pennant races to show how much attention a team receives and which teams are getting the most attention provides a context to this familiar commentary. This book studies the effects of the sports media spotlight (and its absence) on the fortunes of teams in pennant races and Hall of Fame inductees. Along the way, the author brings to light accomplished players most non-fans have probably never heard of.

Rumors of Baseball's Demise Robert Cull,2006-03-02 Is it bedtime for America's pastime? In recent years, action on and off the diamond has left some fans predicting baseball's imminent death--or claiming to have already attended the funeral.

This book refutes those claims with an in-depth look at baseball then and now. Comparing the baseball of the 1950s to the game of today, this author examines the widespread dissatisfaction with major league baseball, considers how modern teams differ from those of the past, and reflects on whether professional baseball remains a truly competitive sport. Excessive salaries, player movement and the evolution of the draft are all up for discussion, as is the Wild Card playoff format and how it has affected the overall competition. Tables show statistics on salaries, league attendance and the correlation between winning percentages and payroll. Appendices offer details on market size and attendance regressions. The facts and figures add up to a win for the long-lasting appeal of baseball.

Cattle, breeds and management. With a chapter by J.W. Axe William Housman,1897

The Invention of Race Nicolas Bancel,Thomas David,Dominic Thomas,2014-04-24 This edited collection explores the genesis of scientific conceptions of race and their accompanying impact on the taxonomy of human collections internationally as evidenced in ethnographic museums, world fairs, zoological gardens, international colonial exhibitions and ethnic shows. A deep epistemological change took place in Europe in this domain toward the end of the eighteenth century, producing new scientific representations of race and thereby triggering a radical transformation in the visual economy relating to race and racial representation and its inscription in the body. These practices would play defining roles in shaping public consciousness and the representation of “otherness” in modern societies. The Invention of Race provides contextualization that is often lacking in contemporary discussions on diversity, multiculturalism and race.
