Assessment of Disorders in Childhood and Adolescence Eric A. Youngstrom, Mitchell J. Prinstein, Eric J. Mash, Russell A. Barkley, 2020-06-25 This leading course text and practitioner reference has been extensively revised with 90% new content, covering a broader range of child and adolescent problems in more concise chapters. Prominent authorities provide a comprehensive framework for evidence-based assessment. Presented are methods and tools for developing effective diagnoses and case formulations, building strong treatment plans, monitoring progress, and documenting outcomes. Chapters are packed with practical guidance, handy tables, and sample instruments. Illustrative case material is included. Prior edition title: *Assessment of Childhood Disorders*, Fourth Edition, edited by Eric J. Mash and Russell A. Barkley. New to This Edition *Many new authors and topics, reflecting over a decade of research and clinical advances. *Updated for DSM-5 and ICD-11. *Chapters on additional disorders: obsessive-compulsive disorder, persistent complex bereavement, and body dysmorphic disorder. *Chapters on transdiagnostic concerns: sleep problems, risky behaviors, and life stressors. *Four chapters on the whys and hows of using assessment in each phase of treatment. *Disorder-specific starter kits--lists of essential checklists, rating scales, interviews, and progress measures, including links to exemplary free measures online. See also the editors' *Treatment of Disorders in Childhood and Adolescence*, Fourth Edition.

Principle-Based Stepped Care and Brief Psychotherapy for Integrated Care Settings Alexandros Maragakis, William T. O'Donohue, 2018-02-13 This timely volume provides the practitioner with evidence based treatments for many of the clinical problems encountered in integrated care. It applies the core concepts of stepped care to integrating brief mental health interventions as a way to address ongoing problems in the modern healthcare landscape. It sets out in depth the state of the healthcare crisis in terms of costs, staffing and training issues, integration logistics and management, system culture, and a variety of clinical considerations. Central to the book is a best-practice template for providing behavioral stepped care in medical settings, including screening and assessment, levels of intervention and treatment, referrals, and collaboration with primary care and other specialties. Using this format, contributors detail specific challenges of and science-based interventions for a diverse range of common conditions and issues, including: Depression. Anxiety disorders. Adherence to chronic obstructive pulmonary disorder management. Alcohol and other substance misuse. Attention deficit hyperactivity

disorder. Chronic pain. Neurocognitive disorders. Paraphilias: problematic sexual interests.[WU3] Sexual abuse and PTSD in children. A solid roadmap for widescale reform, Principle-Based Stepped Care and Brief Psychotherapy for Integrated Care Settings is deeply informative reading for health psychologists, social workers, psychiatrists, and clinical psychologists. It also clarifies the research agenda for those seeking improvements in healthcare quality and delivery and patient satisfaction.

Deciding Children's Futures Joyce Scaife,2024-07-19 The second edition of Deciding Children's Futures addresses the thorny task of assessing parents and children who belong to struggling families where there are issues of neglect or significant harm, and when separating parents are contesting arrangements for the care of their children in the family court. This practitioner's guide discusses how to create relationships and pose questions that breach natural parental defences to understand their histories, anxieties, and needs. Drawing on practice knowledge, theory, and research findings, it integrates the accounts of parents and children with safeguarding imperatives and government guidance, to enable informed decisions that positively impact children's futures. Chapters address issues such as drug and alcohol misuse, mental health difficulties and learning disabilities, Fabricated or Induced Illness (FII) abuse, and alienation of children, and encourage readers to consider the impact of their own values, histories, and beliefs on the assessment process. This edition is completely updated to reflect all the factors that have impacted assessments for the family court, including updates to case law and procedure rules, devolution of governments, and updates to DSM and ICD diagnostic categories. Providing a comprehensive understanding of assessment for the family court, this user-friendly volume will be of great interest to expert witnesses, social workers, mental health professionals, solicitors, and anyone working in the family court system.

A ^AGuide to Assessments That Work John Hunsley, Eric J. Mash,2018-04-06 This volume addresses the assessment of the most commonly encountered disorders or conditions among children, adolescents, adults, older adults, and couples. Strategies and instruments for assessing mood disorders, anxiety and related disorders, couple distress and sexual problems, health-related problems, and many other conditions are reviewed by leading experts.

Handbook of Australian School Psychology Monica Thielking, Mark D. Terjesen,2017-01-26 This handbook addresses the current state and practice of school psychology with a focus on standards unique to Australia, including historical, legal, ethical, practical, and training factors. It provides a compilation of the most current research-based practices as well as guidelines for evidence-based assessment and intervention for common conditions (e.g., autism, depression, learning disabilities) and for delivering appropriate services to targeted student populations (e.g., LGBT, gifted, medical issues). Chapters discuss the application of national and international school psychology practices within the Australian educational and psychological structure. The handbook also examines the lack of formal resources specific to Australia's culture and psychology systems, with its unique mix of metropolitan cities and the vast geographic landscape that spans regional and remote areas. It offers numerous case studies and innovative school mental health programs as well as recommendations for

professional development and advocacy that are unique to Australian school psychology. Topics featured in this Handbook include: Evidence-based assessment and intervention for dyscalculia and mathematical disabilities. Identification and management of adolescent risk-taking behaviors and addictions. Understanding and responding to crisis and trauma in the school setting. Prevention and intervention for bullying in schools. Class and school-wide approaches to addressing behavioral and academic needs. The role of school psychologists in the digital age. Practical advice for school psychologists facing complex ethical dilemmas. The Handbook of Australian School Psychology is a must-have resource for researchers, scientist-practitioners, and graduate students in child and school psychology, social work, and related fields that address mental health services for children and adolescents.

Attention-Deficit Hyperactivity Disorder in Adults and Children Lenard A. Adler, Thomas J. Spencer, Timothy E. Wilens, 2015-01-08 Attention-Deficit Hyperactivity Disorder (ADHD) is a chronic neurobehavioral disorder characterized by persistent and often acute distractibility, hyperactivity, and impulsivity. It is a condition usually associated with children but in recent years the diagnosis of ADHD in adults has risen significantly. ADHD often coexists with a wide array of other psychiatric illnesses, including depression and bipolar disorder, thus complicating its assessment and management. In *Attention-Deficit Hyperactivity Disorder in Adults and Children*, a team of world renowned experts bring together the recent research in this area and cover the history, diagnosis, epidemiology, comorbidity, neuroimaging, and a full spectrum of clinical options for the management of ADHD. The wide ranging, detailed coverage in this text will be of interest to psychiatrists, psychologists, social workers, coaches, physicians, or anyone who wants to develop a deeper understanding of the etiology, characteristics, developmental process, diagnostics, and range of treatment modalities.
