The Role of Leadership in Human Resource Management Shuming ZHAO, Mingwei Liu, Meng Xi, Cherrie Jiuhua Zhu, Hong Liu, 2024-08-30 This book underscores the crucial link between leadership and human resource management (HRM) and their collective impact on organizational outcomes. It highlights the need for integrating research in both fields to fully understand their effects at organizational, team, and individual levels. The interaction between leadership and HRM, which can either complement or substitute for one another, is beginning to be explored in recent studies. Specifically, the book points out the relevance of cultural, institutional, and historical contexts in the Asia Pacific, particularly in China, where Western models may not capture the unique aspects of leadership and HRM. It discusses the significance of paternalistic leadership and specific HRM practices in China, emphasizing their implications for performance. The book argues for the importance of examining these interactions comprehensively, suggesting that a combined study of leadership and HRM, across different levels and contexts, presents valuable research avenues. The twelve chapters in this volume offers insights into leadership and HRM in China, showcasing a variety of leadership behaviours and HRM practices. The chapters in this book were originally published as a special issue of Asia Pacific Business Review.

Real Estate Economics Nicholas G. Pirounakis, 2013-05-29 Real Estate Economics: A point-to-point handbook introduces the main tools and concepts of real estate (RE) economics. It covers areas such as the relation between RE and the macro-economy, RE finance, investment appraisal, taxation, demand and supply, development, market dynamics and price bubbles, and price estimation. It balances housing economics with commercial property economics, and pays particular attention to the issue of property dynamics and bubbles – something very topical in the aftermath of the US house-price collapse that precipitated the global crisis of 2008. This textbook takes an international approach and introduces the student to the necessary ‘toolbox’ of models required in order to properly understand the mechanics of real estate. It combines theory, technique, real-life cases, and practical examples, so that in the end the student is able to:

- read and understand most RE papers published in peer-reviewed journals;
- make sense of the RE market (or markets); and
- contribute positively to the preparation of economic analyses of RE assets and markets soon after joining any company or other organization involved in

RE investing, appraisal, management, policy, or research. This book should be particularly useful to third-year students of economics who may take up RE or urban economics as an optional course, to postgraduate economics students who want to specialize in RE economics, to graduates in management, business administration, civil engineering, planning, and law who are interested in RE, as well as to RE practitioners and to students reading for RE-related professional qualifications.
