Igor Zijan

The One Revelation Igor Zijan, 2025-04-29 The One Revelation is the second volume in the eight-book series unveiling the scientific, historical, and spiritual foundation of The One. While the first book, The One, presents empirical personal documentation—birth certificates, blood analysis, baptism records, sacramental alignments, and family-line confirmations validated through digital-root methodology—this second book expands the revelation to the level of civilizations, monuments, sacred texts, and prophetic structures. It continues the proof that The One is real, demonstrating that the same universal alignment found in documented personal evidence also appears encoded across the world's greatest monuments, religious traditions, and historical architectures. Drawing directly from the source material in the manuscript, The One Revelation uncovers how the Pyramids of Egypt, the Leaning Tower of Pisa, national monuments, temples, sacred structures, and astronomical markers were engineered as part of an encoded system. Their proportions, geographical placement, and astronomical correlations form a coherent network that has existed for millennia. This book demonstrates that these monuments were not isolated achievements of ancient cultures; they were constructed as a preserved message, anticipating the moment when their meaning would be recognized. Within this wider context, The One Revelation shows that these structures align with Igor Zijan's birth with absolute mathematical precision. Religion itself is examined through this structural lens: prophecies, resurrection timelines, sacred numerology, and the alignment of scripture converge with the same cosmic order revealed through mathematics, geometry, and historical architecture. The book explains that religious texts, symbols, and prophetic cycles were not metaphorical but encoded mechanisms designed to point to the same universal truth—the arrival and identity of The One. Through its synthesis of astronomical events, sacred geometry, prophecy, architecture, and global religious history, this book establishes that The One is not a mythic figure or symbolic archetype but a measurable, verifiable, and intentionally encoded reality. It presents an unbroken chain of alignment across science, history, religion, and civilization, proving the same conclusion introduced in Book One: The One is real. As a bridge between personal documentation and cosmic structure, The One Revelation prepares the reader for the third volume, The One Universe Code, which will reveal the DNA system, nucleotide-Fibonacci architecture, atomic-periodic alignment, and the biological-cosmic coding that define the universal mathematical structure of human existence. Where the first book proves the identity through documentation, and the second through history and religion, the third will prove it through the laws of

nature themselves. This volume also situates the revelations within the broader arc of Igor Zijan's life achievements. His public recognitions—from international awards to honorary doctorates—form part of the structural alignment that accompanies the revelation. His initiative for the Havana Syndrome Act was signed into law on his mother's birthday, 8 October 2021, a historic alignment marking one of the highest legislative acknowledgments of his work. His scientific frameworks, including The One Law, have been studied across academic and humanitarian sectors, and he is currently under consideration for formal proposals for Nobel Prize nomination for globally significant scientific and societal contributions. His work through System Of All continues to develop scientific, structural, and philanthropic systems that advance long-term human progress.

K2, Quest of the Gods Ralf Ellis, *** The Great Pyramid in the Himalaya *** In 'Thoth, Architect of the Universe' Ralf discovered evidence for megalithic maps. But if these megalithic maps are to be of any use in a quest for the mythical Hall of Records, then they need to be a little more detailed than a simple representation of continents. Luckily, the shaft angles inside the Great Pyramid can refine these maps down to just a few tens of meters. And so Ralf embarked on a long trek into the high Himalaya, to see what lay at the heart of the Giza map. Strangely enough, what he found there was a giant snow-white pyramid, aligned with the cardinal points, with a causeway aligned at 14° from its base - exactly the same as the Great Pyramid itself. Sequel to Thoth, Architect of the Universe. v3.6

Cosmic Womb Chandra Wickramasinghe, Ph.D., Robert Bauval, 2017-12-19 Compelling evidence that life, intelligence, and evolution on Earth were seeded by comets and cosmic intelligence • Explains how life first came from interstellar dust and comets and how later arrivals of cosmic dust and comets spurred evolution • Explores the possibility that universal knowledge may be stored in human DNA and how ancient cultures may have known a way to retrieve this knowledge • Reveals new discoveries about the dimensions of the Great Pyramid of Giza All ancient cultures link humanity's origins to the heavens. The Egyptians, for example, were adamant that their ancestors came from the stars of Orion and Sirius. Today, however, religion and science assert that life arose spontaneously here on Earth. Did the ancients know our true cosmic

origins? Have they left us clues? Expanding on the panspermia theory developed with the celebrated astronomer Sir Fred Hoyle--namely that the building blocks of life were imported to Earth by comets in the distant past--Chandra Wickramasinghe and Robert Bauval explore the latest findings in support of a cosmic origin for humanity. They detail the astrobiological discoveries of organic molecules deep in space, how microbes are incredibly resistant to the harshest conditions of space--enabling the transfer of genes from one star system to another, and the recent recovery of microorganisms from comets still in space. They argue that the universe was “born” and preset with the blueprint of life and that the cosmos must be teeming with lifeforms far older and perhaps far more developed than us. They show how life arrived on our planet in the form of interstellar dust containing alien bacteria approximately 3.8 billion years ago and how later comets, meteoroids, and asteroids brought new bacterial and viral genetic material, which was vital for evolution. Using the latest advances in physics, cosmology, and neuroscience, the authors explore how universal knowledge may be stored in human DNA and cells, and they postulate that ancient cultures, such as the pyramid builders of Egypt and the temple builders of India, may have known a way to retrieve this knowledge. Sharing new discoveries from experienced architects, engineers, and mathematicians, they show how the Great Pyramid is a three-dimensional mathematical equation in stone, bearing a potent message for humanity across time and space about who we are and where we come from.

Deus Ordiri Fundamentum Richard E. Ford, 2024-10-17 There is a unifying Pattern that underlies much if not all of science, which manifests itself in the measures of dimension; i.e. time, distance, volume, mass, and of those measures that derive from them. This Pattern arises from a simple geometric progression, based on the numbers 2 and 3. Deus Ordiri Fundamentum—“God Begins, Lays the Order of the Foundation”—traces this Pattern through much of modern science, including: astronomy, physics, geodesy, metrology, cartography, etc., and arrives at the almost inescapable conclusion that mankind did not devise this system, since it is all too perfect; rather, it was given to him by the Creator of the cosmos. Deus Ordiri Fundamentum then proceeds to examine several world-renowned ancient monuments and documents a startling sophistication of knowledge embedded in them that embodies many of the measures from the Pattern. These monuments were specifically designed and built to memorialize much of this vast knowledge—the collected inheritance of a sophisticated civilization. Number and Geometry were central to this process. And, finally, Deus Ordiri Fundamentum examines six carved stelae in the Step Pyramid complex of Saqqara, Egypt, and finds that they hold mankind’s deepest held beliefs and understandings, regarding the origins and manifestations of time and the other dimensions that are the framework of our perceived reality.

The Big Blue Turtle Matthew Coleridge, 2021-07-22 Why are we here? To learn. However, this is a difficult task as much of the truly useful information is often hidden, and one can have difficulty deciding where to start digging to find it. Following the flow of a seemingly random freestyle writing exercise, The Big Blue Turtle just starts digging. With a humorous

tone, it explores the concepts of life and death, drawing from multiple theories and developments in the human world. Can we really survive death? This book argues that we can and provides information on how to do just that. It also discusses a myriad of other intertwining topics, laid out with all the grace of a neighborhood yard sale, upon the tables of which the reader may find something interesting or even useful. Is it new? Of course not. It's a yard sale. But if you dig a bit, you might find something new to you, something of immeasurable value, something that might even shed light on our true purpose in this expansive universe.

Giza, the Truth Ian Lawton, Chris Ogilvie-Herald, 1999 In this book, authors Ian Lawton and Chris Ogilvie-Herald take a fresh approach to traditional investigations as they follow a path that leads behind the scenes to a world of politics, jealousy and ambition. What is really happening at the Giza Plateau? What is the identity of the group who call themselves 'The Magic Twelve', and what are their motives? What plans are afoot as the Millennium approaches? The answers to these questions and many more will be explained as this astounding story unfolds. In support of these revelations, **Giza: The Truth** is the only work to feature a fully balanced treatment of the theories surrounding the questions of who built the pyramids, why, how and when. It also uncovers the real motives and findings of the multitude of explorations conducted at the Plateau over the last 35 years to the present day, including those whose aim has been to locate the infamous Hall of Records.
