I paesaggi nelle campagne di Roma Alessandra Cazzola, 2005 This book presents the results of research carried out by the author over the three years of the PhD in Landscape Design at Florence University. The first part of the work focuses on the theoretical and methodological aspects of the study of the agricultural landscape and the description of its component elements, the process of its formation and the evolution of its structure. The second part represents a practical application of these observations, with an original elaboration of the relations that have given rise to the various types of agricultural landscape into which the Roman countryside can be broken down. In short, the scope of the research is to set into relation a cognitive model of the agrarian landscape with a specific territorial framework rich in emblematic landscape situations, setting itself the objective of testing the feasibility of the application of individual interpretations and proposals, and of reappraising the role of the agrarian landscape within the current process of environmental and landscape redevelopment.

Dai casali alla fabbrica di San Pietro Ivana Ait, Manuel Vaquero Piñeiro, 2000 Reconstructs the story of the Leni family of merchants and entrepreneurs, documented over four centuries of growing political prestige culminating in Julian Leni, who served as curator of the Fabbrica di San Pietro (the committee planning the re-building of St. Peter's Basilica) from 1514 to 1527, followed by the subsequent decline of the family, which became extinct in 1627 with the death of Cardinal Giovanni Battista Leni. The authors illustrate the vicissitudes of the more prominent members of the family, with detailed analysis of their finance, business and real estate investments; for example, nearly three hundred notarial deeds drawn up between 1517 and 1530 help delineate Julian's business activities.--Publisher's description.

Paesaggio costiero, sviluppo turistico sostenibile Aa.Vv., 2012-12-20T00:00:00+01:00 Questo testo contiene i risultati di una ricerca universitaria condotta sull'ambiente costiero, da tempo soggetto a forti pressioni antropiche, a vari fenomeni di

urbanizzazione, cementificazione e costruzione di infrastrutture di vario genere. Ruota intorno ai due termini principali di paesaggio e turismo e all'aggettivo costiero che li accomuna. Si riferisce, in particolare, a quei processi di sviluppo turistico che sono stati tra i motori principali e le cause primarie delle trasformazioni di tante aree litoranee; evidenzia problemi e vicende di particolare complessità e criticità che si sono succeduti in prevalenza negli ultimi cinquant'anni e che hanno riguardato e riguardano l'alterazione delle fragilità naturali e delle identità culturali del paesaggio costiero; analizza le potenzialità di un approccio paesistico integrato per affrontare, congiuntamente, le interazioni esistenti tra tutela attiva delle risorse e politiche di utilizzo turistico sostenibile. Alla ricerca hanno partecipato studiosi e ricercatori universitari interessati da tempo ai temi ed ai problemi che coinvolgono le tematiche paesaggistiche e all'applicazione di principi ed obiettivi delle recenti carte e normative, nazionali ed internazionali, che considerano il paesaggio un organismo vivente in continua trasformazione, una risorsa comune che richiede politiche integrate ed azioni progettuali continue e sostenibili.

Il castello di Lecce. Fortezza della Puglia meridionale. Volume I Archeologia e storia. Volume II. Scavo e reperti della Torre Mozza Paul Arthur,Marisa Tinelli,Benedetto Vetere,2022-12-16 Il castello di Lecce è il più grande monumento medievale e della prima età moderna della Puglia. Gli importanti scavi archeologici condotti negli ultimi vent'anni hanno dimostrato che probabilmente si è ampliato su un nucleo originario risalente circa alla metà del XII secolo, anche se è più noto per le sue imponenti mura ed i bastioni rapportabili al regno dell'imperatore Carlo V. Sebbene argomento di numerosi studi, è la prima volta che il monumento è stato oggetto di un'analisi sistematica su larga scala volta a svelarne i segreti, condotta sotto la direzione dell'Università del Salento. Questi due volumi sono i primi resoconti dettagliati del progetto e riuniscono gli studi documentari, che ne rivelano il significato e le funzioni, ed i risultati dell'archeologia, questi ultimi in particolare sulla Torre Mozza tardo-medievale e sull'incredibile ricchezza dei dati provenienti dagli scavi eseguiti al suo interno. The castle of Lecce is the largest medieval and early modern monument in Puglia. Extensive archaeological excavations conducted over the past 20 years have shown that it probably enlarged upon an original nucleus dating to around the mid-12th century, even if it is best known for its imposing walls and bastions dating back to the reign of Emperor Charles V. Although the argument of numerous studies, this is the first time that the monument has been the subject of a large-scale systematic analysis aimed at revealing its secrets, conducted under the direction of the University of Salento. These two volumes are the first detailed reports on the project and bring together documentary studies that reveal its importance and functions and the results of archaeology, the latter in particular on the late medieval Torre Mozza and the

incredible wealth of data from the excavations inside it.
