**Music Practices Across Borders** Glaucia Peres da Silva, Konstantin Hondros, 2019-06-04 Connecting migration studies and the theory of valuation, this collection offers an interdisciplinary approach to the study of transnational music practices. Conceiving music as a practice not confined to audibility, the contributions reveal how music emerges in concrete situations through people, objects, techniques, meanings, and emotions in different parts of the world and during different historic periods. Values are thereby created and shared, and creative processes are evaluated in terms of diversity, space and exchange. This book presents cases of contemporary, popular and traditional music, festivals and trade fairs, albums and band projects, shedding light on the tensions between the transfer, reconstruction and creation of music in different contexts.

**The Social Atlas of Europe** Ballas, Dimitris, Dorling, Danny, 2014-06-25 CHOICE OUTSTANDING ACADEMIC TITLE 2015 Many of us think of European countries as discreet entities—their own languages, cultures, food, and economies squarely contained within their national boundaries. But in fact Europe is at once a unified place and a sophisticatedly fragmented one, and national boundaries rarely reflect its social and economic realities. The social atlas of Europe is the first atlas to map Europe according to these realities, from the perspective of human geography rather than simply a political one. Using innovative full-color visualization methods, it reconsiders European identity through its many different facets: economy, culture, history, and human and physical geography, visualizing Europe and its people in a more fluid way, in some cases using maps without artificial national boundaries. It utilizes the latest available demographic, social, and economic data through state-of-the-art geographical information systems and new cartography techniques. Through these new visualizations, this highly illustrated book offers fresh perspectives on a range of topics, including social values, culture, education, employment, environmental footprints, health and well-being, and social inequalities and cohesion. It is a bold rethinking of Europe as we know it and will be of interest to anyone who wants to understand the continent in its truest form.

*Peripheral Europe* Ksenija Vidmar Horvat, 2020-09-29 This book looks at the financial (2007-2008) and the refugee (2015-present) crises and post-crisis development in the EU. The key argument here is that the (mis)management of these crises has been in part conditioned by the specific course of the Europeanisation which occurred during the integration of the post-socialist East. The enlargement processes ran on the premises of a shared European identity, in effect turning the social

contract of the new Europe into a cultural contract. This has resulted in betraying the commitment to core values of democratic development, both East and West. The book specifically studies the impact of the “cultural turn” through the discourse of the transition in the Balkan periphery of the ex-Yugoslavian region. Based on rich theoretical and regionally specific empirical research, it will be of interest to scholars in the fields of EU integration, Eastern European studies, cultural studies, studies of post-socialism, and border studies.

Music around the World Andrew R. Martin, Matthew Mihalka Ph.D., 2020-09-08 With entries on topics ranging from non-Western instruments to distinctive rhythms of music from various countries, this one-stop resource on global music also promotes appreciation of other countries and cultural groups. A perfect resource for students and music enthusiasts alike, this expansive three-volume set provides readers with multidisciplinary perspectives on the music of countries and ethnic groups from around the globe. Students will find *Music around the World: A Global Encyclopedia* accessible and useful in their research, not only for music history and music appreciation classes but also for geography, social studies, language studies, and anthropology. Additionally, general readers will find the books appealing and an invaluable general reference on world music. The volumes cover all world regions, including the Americas, Europe, Africa and the Middle East, and Asia and the Pacific, promoting a geographic understanding and appreciation of global music. Entries are arranged alphabetically. A preface explains the scope of the set as well as how to use the encyclopedia, followed by a brief history of traditional music and important current influences of music in each particular world region.

*The Social Atlas of Europe* Dimitris Ballas, Daniel Dorling, Benjamin Hennig, 2014 This is the first human geography social atlas of Europe to consider the European economy, culture, history and human and physical geography as a single land mass and a more unified European people. It provides an accessible overview of Europe and a human geography contribution to debates about a wide range of topics.

*The Different Faces of Politics in Literature and Music* Mario Vassallo, Andre P. DeBattista, 2023-12-06 This book highlights the links between politics and governance and the arts. The essays in the volume show how literature and music have challenged those in power risking political censure. In addition, they also try to delineate how patronage has been used for propaganda, or to stir up national fervour. They focus on the tension and symbiosis between the politician and the artist foregrounding how they have always tried to influence, challenge, and, in some cases, undermine one another. This volume will serve as an indispensable source for researchers and academics in political science, the humanities and performing arts.

**Music and Democracy** Marko Kölbl, Fritz Trümpi, 2021-11-05 Music and Democracy explores music as a resource for societal transformation processes. This book provides recent insights into how individuals and groups used and still use

music to achieve social, cultural, and political participation and bring about social change. The contributors present outstanding perspectives on the topic: From the promise and myth of democratization through music technology to the use of music in imposing authoritarian, neoliberal or even fascist political ideas in the past and present up to music's impact on political systems, governmental representation, and socio-political realities. The volume further features approaches in the fields of gender, migration, disability, and digitalization.

**Russia's Cultural Statecraft** Tuomas Forsberg, Sirke Mäkinen, 2021-11-04 This book focusses on Russia's cultural statecraft in dealing with a number of institutional cultural domains such as education, museums and monuments, high arts and sport. It analyses to what extent Russia's cultural activities abroad have been used for foreign policy purposes, and perceived as having a political dimension. Building on the concept of cultural statecraft, the authors present a broad and nuanced view of how Russia sees the role of culture in its external relations, how this shapes the image of Russia, and the ways in which this cultural statecraft is received by foreign audiences. The expert team of contributors consider: what choices are made in fostering this agenda; how Russian state authorities see the purpose and limits of various cultural instruments; to what extent can the authorities shape these instruments; what domains have received more attention and become more politicised and what fields have remained more autonomous. The methodological research design of the book as a whole is a comparative case study comparing the nature of Russian cultural statecraft across time, target countries and diverse cultural domains. It will be of interest to scholars and students of Russian foreign policy and external relations and those working on the role of culture in world politics.

*The Eurovision Song Contest* Victor Ginsburgh, Juan D. Moreno-Ternero, 2022

*Cultural Voting* Victor A. Ginsburgh, 2006 We analyze the voting behavior and ratings of judges in a popular song contest held every year in Europe. The dataset makes it possible to analyze the determinants of success, and gives a rare opportunity to run a direct test of vote trading, or logrolling. Though the votes cast may appear as resulting from logrolling, we show that they are rather driven by linguistic and cultural proximities between singers and voting countries.

**From Geopolitics to Cultural Affinity** Basak Y. Ural, Stacy M. Bondanella, 2009 Using Eurovision Song Contest data from the years 1957 to 2009, we analyze voting biases of the participating countries in an attempt to answer the question: "Is it about music or politics?" More specifically with this study we show that determine states' affinity toward one another and whether and how that differs when affinity is expressed through public opinion rather than through elites. The results of our time series analysis are in line with the suspicion that politics is an important part of the contest outcomes. In particular, for the period of jury vote, geopolitical considerations influence how one country votes for the other. Furthermore, we show that the more similar two states' regime type, the more likely they are to be positively biased in their voting for one another in the Eurovision song contest. On the other hand, for the second period (i.e. public vote), we find that the cultural similarity of the voting county with the country they are voting for has a much stronger and nuanced impact on the bias in their vote.

*Performing Global Networks* Karen Fricker, Ronit Lençin, 2007 Networks are everywhere: from migrant organisations to information technology, from business to social movements, from international governance to global non-governmental organisations, from theatrical collectives to fan clubs, from memory sites to narrative circles. The portmanteau terms networks, and more specifically, global networks, seem to have become the mots du jour in contemporary cultural and social studies. But what cultural, social and political work do global networks accomplish: what is the work of these networks? This path-breaking collection follows Graeme Thompson's rallying cry for a clearer analytical approach to the ways in which networks are enacted, assembled, conducted, and performed. In its thirteen chapters, scholars from a variety of fields – sociology, theatre and performance studies, peace studies, history, and musicology – as well as social and cultural activists, explore the multiple meanings of global networks and performance.
