Russ Shafer-Landau

In the FLO Alisa Vitti, 2020-01-28 From the bestselling author of *WomanCode* comes a life-changing biohacking program for women's health and well-being—Use your natural 28-day cycle to optimize your productivity, fitness, wellness, relationships, and longevity Women have an important biological rhythm they experience every month that affects cognitive function, weight, sex drive, energy, and mood. It is essential to be aware of and take care of this rhythm, but it has been widely ignored by medical, nutrition and fitness research. So as women, we diet, we deprive, and we cram as much as possible into our day, striving to accomplish impossible to-do lists, and scheduling our lives based on a 24-hour time cycle, ignoring the intuitive time our bodies naturally keep: a monthly cycle with four hormonal phases that offer incredible advantages. In the FLO presents a revolutionary 4-week solution to manage your energy and time according to your female biochemistry. By working with each phase, you'll support your hormones, unlock peak creativity and performance, and avoid burnout. You'll know exactly when to eat certain foods, clear your social calendar, or ask for a raise—and you'll have the tools to do so, including: Meal plans and recipes for each phase Charts for phase-specific exercises, work tasks, and relationship activities A daily planner that helps you align with your strengths in each phase A biohacking toolkit for navigating period problems and hormonal birth control Alisa Vitti, functional nutrition and women's hormone expert, bestselling author of *WomanCode*, and founder of modern hormone healthcare company FLOliving.com, has been teaching women how to reclaim their rhythm for nearly twenty years and has witnessed the incredible rewards it offers—including losing stubborn weight, regaining energy, clearing skin, and minimizing PMS. By getting *In the FLO*, you'll get more done with less effort, you'll feel better consistently throughout the month, and you'll enjoy the freedom that comes with living on your own time. Experience firsthand how small changes yield massive results.

Aquananotechnology David E. Reisner, T. Pradeep, 2014-09-24 The world's fresh water supplies are dwindling rapidly—even wastewater is now considered an asset. By 2025, most of the world's population will be facing serious water stresses and shortages. *Aquananotechnology: Global Prospects* breaks new ground with its informative and innovative introduction of the application of nanotechnology to the remediation of contaminated water for drinking and industrial use. It provides a comprehensive overview, from a global perspective, of the latest research and developments in the use of nanotechnology for water purification and desalination methods. The book also covers approaches to remediation such as high surface area nanoscale media for adsorption of toxic species, UV treatment of pathogens, and regeneration of saturated media with applications in municipal water supplies, produced water from fracking, ballast water, and more. It also discusses membranes, desalination, sensing, engineered polymers, magnetic nanomaterials, electrospun nanofibers, photocatalysis, endocrine disruptors, and Al₁₃ clusters. It explores physics-based phenomena such as subcritical water and cavitation-induced sonoluminescence, and fog harvesting. With contributions from experts in developed and developing countries, including those with severe contamination, such as China, India, and Pakistan, the book's content spans a wide range of the subject areas that fall under the aquananotechnology banner, either squarely or tangentially. The book strongly emphasizes sorption media, with broad application to a myriad of contaminants—both geogenic and anthropogenic—keeping in mind that it is not enough for water to be potable, it must also be palatable.

Features updates and the inclusion of a new section on feminist ethics, along with a general introduction and section introductions by Russ Shafer-Landau. Guides readers through key areas in ethical theory including consequentialism, deontology, contractarianism, and virtue ethics. Includes underrepresented topics such as moral knowledge, moral standing, moral responsibility, and ethical particularism.
