The book unfolds over 15 chapters covering historical, geopolitical, technological, and economical aspects, as well as aspects conceptually familiar to the energy transition such as public perception, low-carbon technologies, digitalization, Sustainable Development Goals, and even recent topics such as the pandemic of COVID-19. **Estocagem Geológica, o último elo da cadeia de gás natural no Brasil** Mário Jorge Figueira Confort, 2023-07-31 A estocagem geológica ou subterrânea de gás natural é uma atividade já centenária no mundo, mas pouco conhecida no Brasil, onde políticas públicas têm sido formuladas com o objetivo de incrementar o uso do gás para o crescimento da indústria e a geração de empregos. Não há nação cujo mercado de gás tenha se desenvolvido plenamente sem armazenamentos de gás e, portanto, é fundamental a disseminação do conhecimento sobre a estocagem no país. Nesse sentido, com o objetivo de preencher essa lacuna, este livro é dividido em quatro partes principais: a primeira apresenta os conceitos básicos sobre a estocagem, suas funções mais importantes e sua disseminação no mundo. A segunda parte, por sua vez, trata de aspectos relativos à integridade e segurança das instalações, oriundos especialmente das experiências verificadas em países americanos e europeus. Já a terceira parte se concentra na regulação e no acesso de terceiros à estocagem, abordando a forma como o tema foi trazido aos textos legais brasileiros, fortemente inspirados nas diretivas da União Europeia, a partir das quais são descritos os mecanismos, informações e produtos necessários à otimização do uso das capacidades das estocagens. Por fim, as considerações finais trazem informações sobre projetos que vieram a ser debatidos no país e sobre o armazenamento subterrâneo de outros compostos gasosos, além do gás natural.

*The Governance of Regulators Driving Performance at Portugal's Energy Services Regulatory Authority* OECD, 2021-05-05 As "market referees", regulators contribute to the delivery of essential public utilities. Their organisational

culture, behaviour and governance are important factors in how regulators, and the sectors they oversee, perform. The OECD Performance Assessment Framework for Economic Regulators (PAFER) looks at the institutions, processes and practices that can create an organisational culture of performance and results.

**Indústria Brasileira de Gás Natural** Fernando Golmia,2024-10-07 Esta dissertação é uma pesquisa que examina a indústria de gás natural no Brasil. A descoberta de imensas reservas de hidrocarbonetos no pré-sal brasileiro, a perspectiva de aumento da oferta de gás importado e a importância estratégica do gás natural, bem como as vantagens do seu uso na indústria e na geração de energia elétrica, motivaram um estudo aprofundado dessa indústria. O trabalho oferece uma análise detalhada sobre o padrão de concorrência e o domínio da Petrobras em todos os elos da cadeia de valor do gás, buscando contribuir para o entendimento das dinâmicas econômicas e regulatórias que permeiam essa cadeia produtiva. O texto apresenta ainda alternativas supostamente viáveis a serem exploradas, visando à expansão e ao desenvolvimento do setor de gás no País.

Agricultural Development in Brazil Antonio M. Buainain,Rodrigo Lanna,Zander Navarro,2019-05-20 In the last few decades, Brazilian agriculture has experienced a seismic transformation, and its contradictory facets have fed different and opposing narratives regarding recent changes. This book covers these changes, exploring the issues from several empirical and analytical angles, including the role of agriculture in the contemporary Brazilian economy, the dynamics of Brazilian agricultural value chains, environmental challenges and the processes of social differentiation. Brazilian agriculture continues to be viewed in the international literature, either through the lenses of the past century – those of former problems relating to land use and land tenure – or apologetically. This collection of essays aims at updating the current interpretations, providing objective accounting of the main transformations, its determinants, results, contradictions and limitations. As it covers the most relevant traits of Brazilian agricultural and rural development, the book will provide the reader with an encompassing view of contemporary Brazilian agriculture, including the positive and negative sides of the so-called tropical agriculture revolution. It highlights the tremendous economic potential as well as the continuing structural heterogeneity, concentration of production and marginalization of millions of small farmers. Written in an engaging and accessible style, this book will be perfect for all those interested in learning about Brazilian agriculture. It will be of particular interest to undergraduate and graduate students of economic development, agricultural economics, rural sociology, comparative economic development, rural development and agricultural policies.
