Curso de macroeconomía Óscar Bajo, María Antònia Monés, 2000 Curso de macroeconomía es un manual que cubre de forma compacta y actualizada los contenidos centrales de un curso de macroeconomía intermedia, y donde el material teórico se ilustra con referencias a la economía española. En esta segunda edición se ha revisado y actualizado completamente el texto de la anterior, destacando como principales novedades: la reestructuración de los capítulos, lo que facilita la utilización del libro en un curso cuatrimestral; la presentación de un modelo macroeconómico para una unión monetaria, con lo que se pretende describir la nueva situación que afrontan las economías europeas; y un nuevo capítulo que ofrece una sencilla introducción a algunos desarrollos recientes de la teoría macroeconómica. El curso se completa con un libro de problemas, Ejercicios de macroeconomía intermedia, publicado en esta colección.

Estática: problemas resueltos F. Herrero Arnaiz, L. R. Rodríguez Cano, L. A. Vega González, 1996 Los buenos libros de texto exigen introducir las nociones estudiadas en el momento de su utilización. Al final de cada capítulo se presentan problemas de diversa índole y dificultad, pero siempre relativos a los conceptos estudiados que abarcan muchos campos de la Estática; en ellos, el lector se percatará cómo son necesarios los conocimientos adquiridos durante el curso: los presentes ejercicios son una excelente prueba de ello. Los ejercicios provienen en su mayoría de exámenes propuestos en los cursos académicos y han servido de piedra de toque para calibrar aquellos aspectos de la Estática que presentan más asperezas, en aras a la claridad de entendimiento de las diversas nociones de la misma.
