Cascade (The River of Time Series Book #2) Lisa T. Bergren, 2011-06-01 Mom touched my underdress--a gown made six hundred years before--and her eyes widened as she rubbed the raw silk between thumb and forefinger. She turned and touched Lia's gown. Where did you get these clothes? In *Cascade*, the second book in the River of Time Series, Gabi knows she's left her heart in the fourteenth century and she persuades Lia to help her to return, even though they know doing so will risk their very lives. When they arrive, weeks have passed and all of Siena longs to celebrate the heroines who turned the tide in the battle against Florence--while the Florentines will go to great lengths to see them dead. But Marcello patiently awaits, and Gabi must decide if she's willing to leave her family behind for good in order to give her heart to him forever.

Waterfall (The River of Time Series Book #1) Lisa T. Bergren, 2011-02-01 Gabriella has never spent a summer in Italy like this one. Remaining means giving up all she's known and loved . . . and leaving means forfeiting what she's come to know--and love itself. Most American teenagers want a vacation in Italy, but the Bentarrini sisters have spent every summer of their lives with their parents, famed Etruscan scholars, among the romantic hills. In Book One of the River of Time series, Gabi and Lia are stuck among the rubble of medieval castles in rural Tuscany on yet another hot, boring, and dusty archeological site . . . until Gabi places her hand atop a handprint in an ancient tomb and finds herself in fourteenth-century Italy. And worse yet, in the middle of a fierce battle between knights of two opposing forces. And thus she comes to be rescued by the knight-prince Marcello Falassi, who takes her back to his father's castle--a castle Gabi has seen in ruins in another life. Suddenly Gabi's summer in Italy is much, much more interesting. But what do you do when your knight in shining armor lives, literally, in a different world?

Evaluating the flow regulating functions of natural ecosystems in the Zambezi River Basin McCartney, M., Cai, X., Smakhtin, V., 2013 By affecting evapotranspiration and influencing how water is routed and stored in a basin, forests,

wetlands and floodplains play a crucial role in the hydrological cycle. Although they are widely attributed a major role in regulating flows (i.e., both attenuating floods and maintaining flow during dry periods), these services are rarely factored into the planning and management of water resources. One reason for the failure to include them is lack of understanding. Very often the extent to which natural regulating functions really occur is unclear. Against this background, this report describes a simple, pragmatic approach for quantifying the flow regulating functions of natural ecosystems. The method has been applied at 14 locations in the Zambezi River Basin.

Bourne & Tributary Lisa Tawn Bergren, 2012 It's possible to beat a She-Wolf. But you cannot keep her down... The Betarrinis and the boys they love are back with these two novellas that follow Waterfall, Cascade and Torrent. In Bourne, the story picks up right where Torrent left off... Find out what has happened to wounded warriors returning from battle, to the Betarrinis, fighting for the men who've captured their hearts, and what will happen to them next... A year later, in Tributary, Lia struggles to overcome the fear that constant battle has heaped upon her; Gabi and Marcello face an unexpected crisis; and Lord Greco may be ready to leave the grief and loss of his past behind him, so that he might grab hold of the future...
