*New Directions in Sexual Violence Scholarship* Kate Gleeson, Yvette Russell, 2023-05-30 This edited collection brings together leading and emerging scholars in the important field of sexual violence scholarship. The last ten years have witnessed an international reckoning on sexual violence, typified in the mainstream imagination by the #MeToo movement, acknowledgement of the violence of university campus life, and the overdue recognition of the enduring harms of child sexual abuse. While the state has been forced to respond through law and other political processes, at times revealing its agility and at other times its archaic investment in the past, much of the real work responding to sexual violence and abuse has taken place within communities, and in the personal responses of the individuals writing the scripts of their experiences. This volume explores the nuances of these individual experiences and considers how they are shaped and reflected by intersecting axes of power including gender, race, class, age and able-bodied status. It reflects on law and law reform in the area and suggests new modes and frames through which to explain and understand sexual violence and institutional responses to it. Debates within this contested personal and political arena do not map onto longstanding binaries of liberal and radical feminism, nor conservative and progressive politics. This interdisciplinary volume traces that murky terrain and features some of the leading international scholars writing on sexual violence in English today. This book will appeal to scholars and students across the broad disciplines of law and legal studies; criminology; gender studies; political science and sociology.

Leading Works in Criminal Law Chloë Kennedy, Lindsay Farmer, 2023-08-11 This book analyses a selection of leading works in the criminal law to ask questions about how the modern discipline of criminal law has developed, how it has been deployed in colonial and postcolonial contexts, and how criminal law scholarship has engaged with traditionally marginalised perspectives such as feminism, queer theory, and anti-carceral and abolitionist movements. The works analysed range from Macaulay's Indian Penal Code (1837) to more recent textbooks and monographs on criminal law, and their jurisdictional reach extends to India, Canada, Australia, Malawi, the UK and the USA. The contributing authors include scholars, activists and legal practitioners, each of whom explores the intellectual development and geographical reach of Anglocriminal law via the work they analyse. Across the collection, the editors and contributors address the question of what it means to be a leading work in criminal law. The book will be a valuable resource for students, academics and researchers working in the area of criminal law.
