Simon Matthews

Free Your Mind! Simon Matthews, 2023-05-02 Between 1967 and 1970 Italian auteur Giovanni Tinto Brass directed four feature films in London, each starring a woman as the main character. Exploring the political, cultural and sexual ideas of their time, often in a deliberate pop-art style, they contain much priceless footage of now forgotten neighborhoods, galleries, clubs and events as well as an abundance of contemporary music. A fascinating blend of social history, pop culture, cinema, music and TV, *Free Your Mind!* examines the films, their stars and how they were made. Based on interviews with many of the surviving participants, Matthews argues that at this stage of his career, before *Caligula*, Brass was as significant a figure in cinema as Antonioni, Godard and many other better-known directors.

Science Fiction and Fantasy Reference Index, 1878-1985: Subject entries Halbert W. Hall, 1987

The Philosophy of Stanley Kubrick Jerold Abrams, 2007-05-04 In the course of fifty years, director Stanley Kubrick produced some of the most haunting and indelible images on film. His films touch on a wide range of topics rife with questions about human life, behavior, and emotions: love and sex, war, crime, madness, social conditioning, and technology. Within this great variety of subject matter, Kubrick examines different sides of reality and unifies them into a rich philosophical vision that is similar to existentialism. Perhaps more than any other philosophical concept, existentialism—the belief that philosophical truth has meaning only if it is chosen by the individual—has come down from the ivory tower to influence popular culture at large. In virtually all of Kubrick's films, the protagonist finds himself or herself in opposition to a hard and uncaring world, whether the conflict arises in the natural world or in human institutions. Kubrick's war films (*Fear and Desire*, *Paths of Glory*, *Dr. Strangelove*, and *Full Metal Jacket*) examine how humans deal with their worst fears—especially the fear of death—when facing the absurdity of war. *Full Metal Jacket* portrays a world of physical and moral change, with an environment in continual flux in which attempting to impose order can be dangerous. The film explores the tragic consequences of an unbending moral code in a constantly changing universe. Essays in the volume examine Kubrick's interest in morality and fate, revealing a Stoic philosophy at the center of many of his films. Several of the contributors find his oeuvre to be characterized by skepticism, irony, and unfettered hedonism. In such films as *A Clockwork Orange* and *2001: A Space Odyssey*, Kubrick confronts the notion that we will struggle against our own scientific and

technological innovations. Kubrick's films about the future posit that an active form of nihilism will allow humans to accept the emptiness of the world and push beyond it to form a free and creative view of humanity. Taken together, the essays in *The Philosophy of Stanley Kubrick* are an engaging look at the director's stark vision of a constantly changing moral and physical universe. They promise to add depth and complexity to the interpretation of Kubrick's signature films.
