This book has been fully revised and updated with all of the major developments since its first edition, including: Reference to increasingly important Singapore and Far-Eastern decisions An analysis of modern developments in seaworthiness, from vetting and approval clauses to the topical issues of vulnerability and piracy attacks Detailed examination of misdelivery, fraudulent or forged bills of lading, and delivery without production of a bill of lading Revised coverage of conflicts and procedural matters, including anti-suit injunctions, jurisdiction battles and the scope of arbitration Reference to relevant European law relating to issues of jurisdiction and procedure Comprehensive treatment of Switched bills, transshipment, house bills, deck carriage and container cargo New material on the practical implications of electronic bills of lading This text continues to provide an indispensable reference for maritime practitioners and institutions worldwide.
