Who is american? A definition of American Identity Amira Karam, 2019-04-11 Seminar paper from the year 2018 in the subject American Studies - Culture and Applied Geography, grade: 1,7, University of Frankfurt (Main), language: English, abstract: This paper focuses on what it means to be an American and if it is possible for people and immigrants with different cultural backgrounds to acquire an American Identity. In want to find out if the American exceptionalism and its three dimensions give an impression of what it means to gain an American identity. Obviously, being American means to share the same values, but it is not clear if it means to also share the same citizenship. I take a close look at the idea of multiculturalism that challenges the current ideological solutions for equality and diversity in the United States, trying to answer the question whether multiculturalism is or is not a threat to the idea of an American Identity. The meaning and consequences of national identification have long been the subject of debate among philosophers, historian, and social scientist. The identification with the American country through national attachment, pride, and loyalty is self-evident for many Americans. A national identity shared by fellow citizen creates a sense of unity and a bond of solidarity. The question of what defines an identity or the American identity, to be specific, is not clarified. What is clear, however, is the important and vast difference between a patriot, who feels a sense of pride and love for his country, while the nationalist views his country as superior with a desire to dominate other countries. However, both are bond by their trust for the American values. Freedom, Truth, Justice and the American way of life.
