**Cosmology, Ecology, and the Energy of God** Donna Bowman, Clayton Crockett, 2012 Cosmology, Ecology, and the Energy of God brings together process and postmodern theologians who reflect on the topic of energy. Approaches include dark energy in terms of physics; social and ecological aspects of the current energy use crisis; and connections between human conceptions of energy and divine spiritual energy in theological terms.

*End of All Things - God's Shocking New Revelations* May Fred May, Frederick May, 2009-11 What you DON'T know - can kill you! End of All Things, the most powerful Book of our time, is a modern-day true story of God speaking verbally to two people. His reason? To announce His shocking new revelations exposing the world's big secrets, lies, and mysteries for the first time in history. Revealing: The cause and cure for Cancer! Solid, irrefutable new proof of how the Catholic Church has diabolically tricked all its members into worshipping Satan and cursing God and themselves! What happens during and after death. Financial success. Faith healing. Demons and personal exorcism. Breaking the Bermuda Triangle mystery. The Anti Christ. How science is killing us. UFO's, and where they come from. When the end of the world began! When the Rapture began! Other human life forms. Precisely why killers kill. An electric car never needing a plug-in - never needing gasoline? And much more. Forget about personal opinions and theories. This is the truth of God's second Book! This most powerful Book of our time, was written by Fred May; a retired Los Angeles television producer-director-announcer. Formerly a successful radio disc jockey, he was also a prominent hard-hitting news commentator on the number one radio station in Los Angeles. Fred worked with and interviewed many celebrities; from presidents to superstars. End of All Things is shockingly revealing, boldly blunt, witty, adventurous, poetic, and soaringly-beautiful. *Multitple Universe : Abode of God's with reference of Bhagwadgita* Ajay Mohla, 2022-02-05 'Universe is vibrant and too vast to be well understood with our current scientific researches & available theories on Universes and their numbers, however Unified theory of forces with link between electromagnetic and gravitational force, makes us believe in Multiple universes, which have been since long been predicted in ancient scripture of different religions. Our universe is special due to proper distribution of waves, energy and matter, however there will be different laws operating in other universes, which

are still unknown. The aim of this book is to have crisp understanding of different theories, population & evidence of multiple Universe(s) & Bhagwadgita also covers some basic scientific facts which are nothing but the words of Supreme lord - Shri Krishna

God's Eye P.R. Fittante,2009-04-01 Astronaut Curt Lucas has lost his family, lost his faith and lost control of a sabotaged space station. Caught in a near-future world of Chinese hegemony and radical fundamentalism, Curt's unlikely return to earth marks the beginning of a desperate struggle for America's soul. The race to find a sacred vessel thought by some to offer eternal salvation, or a plunge toward Armageddon by others, leads Curt to alien worlds and beyond. His journey uncovers a secret order of Christian martyrs ready for the coming Rapture, an eccentric quantum physicist developing anti-gravity weapons and his own son's link to an ancient power—a power that could usher in the very prophecy so many seek to avoid. Packed with a diversity of detail, from Buddhist prayer wheels to super weapons, God's Eye merges the distinct realms of science and religion by viewing faith through the prism of physics. It is string theory with a divine dimension, exploring the dangers of faith without reason.

On Time Jan Zaanen,2024-10-29 This text revolves around a new and unusual view on the most fundamental puzzle of physics. It focusses on the key aspect that makes the role of the time dimension fundamentally different: causality. It deals on the one hand with general relativity, and on the other hand with quantum theory. The implicit and intuitive way by which causality is usually taken for granted is just made explicit and less self-evident, shedding a new light on the gravity-quantum conflict. The case is made that gravity is a necessary condition for a causal universe. But upon turning to the pure unitary quantum physics explaining the nature of matter one is dealing with the strictly a-causal time expressed through the thermal quantum field theory machinery. When this a-causal microscopic and causal macroscopic world meet, one encounters the wavefunction collapse, that itself may be rooted in the quantum-gravity conflict. Modern ideas are discussed resting on eigenstate thermalization showing how this may lie eventually at the origin of irreversible thermodynamics, with its famous second law setting also a direction of time. The case is anchored in the sophisticated modern mathematical machinery of both general relativity and quantum physics which is normally barely disseminated beyond the theoretical physics floors. The book is unique in the regard that the consequences of this machinery - Riemannian geometry and Penrose diagrams, thermal quantum fields, quantum non-equilibrium and so forth -- are explained in an original, descriptive language conveying the conceptual consequences while avoiding mathematical technicalities.

*Evolutionary History in Theological Perspective* Mario Anthony Russo,2024-06-10 Evolutionary History in Theological Perspective: Exploring the Scientific Story of the Cosmos develops a new theological interpretation of evolutionary history.

Exploring both secular and theological interpretations of evolutionary history, this new interpretation hinges on the similarities between individual redemption and the eschatological story of cosmic redemption as mediated by the Holy Spirit throughout evolutionary history. This new lens is then applied to relevant questions raised by the evolutionary process (especially suffering), and helps overcome the current shortcomings of contemporary interpretations of evolutionary history.

Science and the Bible (Scripture in Context) David Instone-Brewer, 2020-09-23 Science and the Bible are often pitted against each other, causing many to either defend science at Scripture's expense or vice versa. Instead, what if we saw science and the Bible as friends? Can Christians appreciate scientific insights like they do archaeological discoveries--as a source of knowledge to illuminate the biblical world and our own? In *Science and the Bible*, David Instone-Brewer takes a refreshing and non-antagonistic approach, asking how science can aid our interpretation of the Bible. The result is stimulating for a wide range of topics, such as God's omnipresence, the origin of languages, the nature of eternity, the relationship of spirit and soul, the reality of resurrection, and Jesus' human experience.
