

Geography Phenomenology And The Study Of Human Nature

Linda H. Graber

Textures of Place Paul C. Adams, Steven D. Hoelscher, Karen E. Till, 2001 A fresh and far-ranging interpretation of the concept of place, this volume begins with a fundamental tension of our day: as communications technologies help create a truly global economy, the very political-economic processes that would seem to homogenize place actually increase the importance of individual localities, which are exposed to global flows of investment, population, goods, and pollution. Place, no less today than in the past, is fundamental to how the world works. The contributors to this volume -- distinguished scholars from geography, art history, philosophy, anthropology, and American and English literature -- investigate the ways in which place is embedded in everyday experience, its crucial role in the formation of group and individual identity, and its ability to reflect and reinforce power relations. Their essays draw from a wide array of methodologies and perspectives -- including feminism, ethnography, poststructuralism, ecocriticism, and landscape ichnography -- to examine themes as diverse as morality and imagination, attention and absence, personal and group identity, social structure, home, nature, and cosmos.

Themes in Geographic Thought (Routledge Revivals) Milton Harvey, Brian Holly, 2014-03-18 Themes in Geographic Thought, first published in 1981, explores in breadth and depth the interrelationships among the history of Geography, geographic thought, and methodology, specifically focusing on the interactions between geographical research and various contemporary philosophical schools: positivism, pragmatism, functionalism, phenomenology, existentialism, idealism, realism and Marxism. An attempt is made to synthesise Geography's historically rich tradition with the current diversity in approaches to the discipline, based on the belief that 'geographic thought', at any point in time, is a manifestation of the mutual influence between the prevailing philosophical viewpoints and the major methodological approaches in vogue. Each chapter presents an overview of the concrete ideas of a particular school of philosophy and stresses its relevance and impact on various aspects of Geography.

Deep Maps and Spatial Narratives David J. Bodenhamer, John Corrigan, Trevor M. Harris, 2015-02-04 Deep maps are finely detailed, multimedia depictions of a place and the people, buildings, objects, flora, and fauna that exist within it and which are inseparable from the activities of everyday life. These depictions may encompass the beliefs, desires, hopes, and

fears of residents and help show what ties one place to another. A deep map is a way to engage evidence within its spatio-temporal context and to provide a platform for a spatially-embedded argument. The essays in this book investigate deep mapping and the spatial narratives that stem from it. The authors come from a variety of disciplines: history, religious studies, geography and geographic information science, and computer science. Each applies the concepts of space, time, and place to problems central to an understanding of society and culture, employing deep maps to reveal the confluence of actions and evidence and to trace paths of intellectual exploration by making use of a new creative space that is visual, structurally open, multi-media, and multi-layered.

The Transjordanian Palimpsest Jeremy Michael Hutton, 2009 This study analyzes several passages in the Former Prophets (2 Sam 19:12-44; 2 Kgs 2:1-18; Judg 8:4-28) from a literary perspective, and argues that the text presents Transjordan as liminal in Israel's history, a place from which Israel's leaders return with inaugurated or renewed authority. It then traces the redactional development of Samuel-Kings that led to this literary symbolism, and proposes a hypothesis of continual updating and combination of texts, beginning early in Israel's monarchy and continuing until the final formation of the Deuteronomistic History. Several source documents may be isolated, including three narratives of Saul's rise, two distinct histories of David's rise, and a court history that was subsequently revised with pro-Solomonic additions. These texts had been combined already in a Prophetic Record during the 9th c. B.C.E. (with A. F. Campbell), which was received as an integrated unit by the Deuteronomistic Historian. The symbolic geography of the Jordan River and Transjordan, which even extends into the New Testament, was therefore not the product of a deliberate theological formulation, but rather the accidental by-product of the contingency of textual redaction that had as its main goal the historical presentation of Israel's life in the land.

The Behavioural Environment F.W. Boal, D.N. Livingstone, 2003-09-02 Placing human action and perception at the centre of the subject, this book considers the effects of mankind on the environment, drawing particularly from William Kirk's work on the behavioural environment model. Reviewing Kirk's original model in light of recent ideological debate and extensive new evidence, this collection of essays from leading names in the field shows that a behavioural approach is essential in understanding human geography and man's relationship with the ecological environment.

An Introduction to Behavioural Geography John R. Gold, 1980 What is behavioural geography? What are its roots, how can it promote our knowledge of human behaviour and of the environment, and what direction might it take in the future? This book sets out to answer these questions. Behavioural geography is based upon the approach known as behaviouralism, in which explanation for man-environment problems is founded upon the premise that environmental cognition and behaviour are intimately linked, or that the way in which people behave is mediated by their understanding of the environments in which they live or with which they are confronted.--

The Dictionary of Human Geography Derek Gregory, 2009 The Dictionary of Human Geography continues to be the

one guidebook no student, instructor or researcher in the field can afford to be without.--BOOK JACKET.
