[The Great Hanoi Rat Hunt](#) Michael G. Vann, 2019 The Great Hanoi Rat Hunt tells the darkly humorous story of the French colonial state's failed efforts to impose its vision of modernity upon the colonial city of Hanoi, Vietnam. This book offers a case study in the history of imperialism, highlighting the racialized economic inequalities of empire, colonization as a form of modernization, and industrial capitalism's creation of a radical power differential between the West and the rest. On a deeper level, The Great Hanoi Rat Hunt examines the contradictions unique to the French Third Republic's colonial civilizing mission, the development of Vietnamese resistance to French rule, and the history of disease.

The Nature of Empire Andrea Duffy, 2025-09-15 The Nature of Empire exposes the central role of modern imperialism in the development of contemporary environmentalism and environmental science. It builds this case through an investigation of five major modern empires: Britain, France, Russia, the Ottoman Empire, and Japan. This book offers readers a global environmental history of modern imperialism that actively engages Western-based and non-Western based empires. As this study shows, imperialism ultimately transformed human perceptions of nature and the environment in significant, lasting, and conflicting ways. It both inspired modern conservationist practices and fueled opposition to environmental policies in colonial contexts. It also spurred the development of climate science, which helped reveal the environmental toll of imperial exploitation and drive efforts to fight it. The environmental and political legacies of empire remain evident today through unmitigated anthropogenic climate change and the increasing incidence of extreme weather, which tends to disproportionately impact marginalized peoples. This book stands as a useful and accessible resource for students, scholars, and all those seeking to better understand environmental history, imperial legacies, and the roots of contemporary climate challenges.

River Delta Futures Francisco-J. Hernández Adrián, Angelos Theocharis, 2025-02-20 How are climate change, weather-related disasters, food and water insecurity, and energetic and infrastructural collapse narrated audiovisually in the most environmentally vulnerable areas of the Planet? This book addresses this and related questions by adopting a local and transdisciplinary perspective on river deltas from different areas of the world. River deltas have historically been hotspots for human civilizations, as populations settled in their fertile grounds seeking resources and opportunities for prosperity. Despite this, the terrains and livelihoods of those who rely on them are under threat from human exploitation, environmental degradation, and rapidly accelerating climate change. Inspired by the UN Sustainable Development Goals, this book provides a range of focused audiovisual analyses of deltaic spaces. Ranging across a variety of media, including documentary filmmaking, animation, photography, collaborative comic making, participatory visual art practices, soundwalking, and film analysis, it examines the role that contemporary audiovisual media play in forging global environmental imaginaries. In doing so, it adopts a transdisciplinary approach to the Blue Humanities from countries across the world, including Canada, Bolivia, Brazil, Greece, Nigeria, Senegal, India, Bangladesh, Myanmar, Thailand, and Vietnam.

Animals as Experiencing Entities Michael J. Glover, Les Mitchell, 2024-03-04 This volume explores the experiences of those with little or no power—usually, although not exclusively, animals. The theme of animals as experiencing entities is what links the chapters and characterises the volume. Broadly each author in this volume contributes in one of two ways. The first group, in Section 1, theoretically engages animal subjectivity, animal experiences, and ways in which these are to some extent accessible and knowable to humans. The second group of authors, in Section 2, offer narrative accounts about specific animals or groups of animals and explore to some extent their subjective historical experiences. In summary, the first section diversely theorises about animal experiences, while the second section's authors assume animals' subjective experiences and construct narratives that take into account how animals might have subjectively experienced historical phenomena.

Transnational France Tyler Stovall, 2022-02-25 Now in its second edition, Tyler Stovall's *Transnational France* takes a transnational approach to the history of modern France that draws the reader into a key aspect of France's political culture: universalism. Beginning with the French Revolution and its aftermath, Stovall traces French history right up to the present day and examines France's relations with three other areas of the world: Europe, the United States, and France's colonial empire. The book shines a light onto both French identity and the history of the world more broadly, which allows the reader to engage with French history in a much wider context. This new edition features an additional chapter on France in the twenty-first century that offers an analysis of current events and issues as seen through historical perspective. Issues addressed include anti-Semitism, Islamophobia, and the gilets jaunes, as well as the impact of Brexit, the maturation of the National Front under Marine LePen, and the administration of Emmanuel Macron. Giving a global view of France's history, this is the perfect volume for students of modern France and French history courses.

Concrete Colonialism Diana Jean S. Martinez,2025-08-08 Diana Jean S. Martinez examines the US colonial project in the Philippines through the innovative use of reinforced concrete, a technology that dominated early twentieth-century construction.
