This volume explores challenging picturebooks as learning materials in early childhood education, primary and secondary school, and even universities. It addresses a wide range of thematic, cognitive, and aesthetic challenges and educational affordances of picturebooks in various languages and from different countries. Written by leading and emerging scholars in the field of picturebook studies and literacy research, the book discusses the impact of challenging picturebooks in a comprehensive manner and combines theoretical considerations, picturebook analyses, and empirical studies with children and students. It introduces stimulating picturebooks from all continents and how they are used or may be used in educational settings and contexts. The chapters touch on subjects like reading promotion, second-language acquisition, art education, interdisciplinary learning, empathy development, minority

issues, and intercultural competence. Moreover, they consider relevant aspects of the educational environments, such as the inclusion of picturebooks in the curriculum, the significance of school libraries, and the impact of publishers.
