Microeconomics David Besanko, Ronald Braeutigam, 2010-10-25 Business professionals that struggle to understand key concepts in economics and how they are applied in the field rely on Microeconomics. The fourth edition makes the material accessible while helping them build their problem-solving skills. It includes numerous new practice problems and exercises

that arm them with a deeper understanding. Learning by Doing exercises explore the theories while boosting overall math skills. Graphs are included throughout the mathematical discussions to reinforce the material. In addition, the balanced approach of rigorous economics gives business professionals a more practical resource.

Microeconomics: Theory And Applications D. N. Dwivedi, 2002-09 This book is intended to be a comprehensive and standard textbook for undergraduate students of Microeconomics. Apart from providing students with sufficient study material for examination purpose, it aims at making them understand economics. An effort has been made to explain abstract and complex microeconomic theories in a simple and lucid language without sacrificing analytical sophistication. The subject matter has been structured in a systematic manner without leaving gaps for the readers to fill in. Though the approach is non-mathematical, simple algebra has been used to give a concrete view of economic concepts and theories and to show the applicability of economic theories in decision making.

Investment and Production Vernon L. Smith, 1961 Developing a unified theory of production and investment, Vernon L. Smith explores the empirical and theoretical nature of the interdependence between short-run current account production decisions and long-run investment planning, taking into account such technological factors as equipment replacement. The book builds an explicit theory of production planning by integrating production, investment, and equipment replacement policy, derives the decision implications of the use of durable capital goods, and examines the production function concept and the production decision process in engineering design and in general business practice.
