Gaddis covers procedural programming--control structures and methods--before introducing object-oriented programming to ensure that students understand fundamental programming and problem-solving concepts. As with all Gaddis texts, every chapter contains clear and easy-to-read code listings, concise and practical real-world examples, and an abundance of exercises. With the 7th Edition, JavaFX has replaced Swing as the standard GUI library for Java in chapters that focus on GUI development. The Swing and Applet material from the previous edition is available online.

Starting Out with JAVA 5 Tony Gaddis,2005 This text is designed as a late objects introduction to programming using the Java programming language. This text first introduces the reader to the fundamentals of data types, input and output, control structures, methods, and objects created from standard library classes. After this the reader learns to write her own classes, and develop simple GUI applications. Then the reader learns to use arrays. The book also includes coverage of more advanced topics such as inheritance, polymorphism, the creation and management of packages, advanced GUI applications, and recursion. From early in the book, applications are documented with javadoc comments.Although it is written for readers with no prior programming background, even experienced programmers will benefit from its depth of detail.
