**The Top 10 As We Hit Bottom** Jim Parry,2020-02-18 From best-selling author and illustrator Ron Barrett, who forecasted the weather in the classic picture book, *Cloudy With a Chance of Meatballs*, now predicts how—thanks to climate change and other unpleasanties—the world will end! With research and really scary text by Jim Parry, *The Top Ten As We Hit Bottom* is a darkly humorous collection of “Top Ten” lists that highlights the predicament global warming and other impending catastrophes have put us into. Though some might call these lists “fake news” (we’re looking at you, Donald), these lists are compiled and culled from the world's most credible authorities like NASA, the UN, and the Union of Concerned Scientists. But coupled with darkly humorous illustrations, you’ll be laughing your way all the way down in our race toward the bottom! Here are some Top 10 lists to whet your appetite for Earth’s impending doom: “Top 10 species we’ll lose to climate change” “Top 10 avalanches mostly caused by global warming” “Top 10 climate change deniers” “Top 10 times we almost had a nuclear war,” “Top 10 things that will happen when the Yellowstone Supervolcano erupts,” “Top 10 ways to try

to stop an asteroid," "Top 10 signs that the earth is about to be swallowed by a black hole," "Top 10 ways a particle accelerator mishap could destroy the world," "Top 10 end-of-world cults you can join now." And many more!

**Polar Scientists** Sara L. Latta,2015-07-15 Do you like the cold? Do you like solving mysteries and discovering answers? Are you interested in Earth's history? **Genesis Logs** Gary W. Babb,2024-09-25 Capt. Nick Johns, a wounded and quadriplegic Marine Corps veteran of the Iraq War, is approached by assertive government officials, who, unbelievably, recall him to active duty to serve humanity. He is chosen because of his self-sacrificing war record and his unique ability to survive depression resulting from his debilitating injury. To be more precise, they want his disembodied brain to command and become the spaceship, Genesis, for a two hundred year deep-space flight to re-establish the human race doomed to extinction from an asteroid. One selfless but vastly superior, augmented mind must discover a way to honor his commitment to serve humanity and save the human race, even from itself. Capt. Johns must survive centuries of essential medical research and implementation, technical and societal challenges and disasters, long years of loneliness inherent to command, alien encounters, and possibly even Divine Intervention. Can the love of two women provide the balance he so desperately needs to endure or will they cause his demise?

**Environmental Biology** Terry Hilleman, 2009-01-03 Environmental biology is a study in the conditions of life; these conditions impact the life within it. The conditions of life are not limited to the present time; environmental biology has applications to any time in the history (or future) of any place on earth (or beyond). The environment sets limits on the life within it. The loss of habitat is the loss of the conditions of life; that is, loss of habitat is really loss of the conditions of existence necessary for the life within. The loss of habitat is the primary cause of extinction. This book clearly identifies why habitat destruction is the primary cause of extinction, not only for today, but for all time. It establishes that the degree of habitat destruction is directly proportional to the degree of past extinction event severity. Habitat destruction creates changing, isolated environments, which seem to be a component of both destructive and creative evolutionary change.
