Inside Rubik's Cube and Beyond C. Bandelow, 2012-12-06 On January 30, 1975 Ernd Rubik j r., professor of architecture and design in Budapest, was granted the Hungarian patent number 170062 for a terbeli logikai jatek--A game of spatial logic. Between 1978 and March 1981 this object-Bt1vos Kocka in Hungary, der Magische Wiirfel or Zauberwiirfel in Germany, le Cube Hongrois in France and the Magic Cube or Rubik's Cube in Great Britain and the USA-has sold more than ten million copies. And they were not merely sold! A highly contagious twist mania has been spreading throughout families, offices and waiting rooms. Many classrooms sound as if an army of mice were hard at work behind the desks. What is so fascinating about this cube, which competes with Hungarian salami and the famous Tokajer wine in the currency-winning export market? For one thing, it is an amazing technical tool. How does it work? Moreover, the contrast between its innocent, innocuous appearance and the hidden difficulty of its solution offers a serious challenge to all puzzle fans, but especially to those mathematicians who are professionally concerned with logical deduction

Rubiks Cube in Sixty Seconds (*or Less)* Ray Reed,Roy Reed,2013-01-11 The early First Edition of this book was written and copyrighted by Ray Reed in 1981 after working out the basic solution presented herein. Reed continued to refine his work and the illustrations until 2007 when the First Edition was again copyrighted for final publication. Only a few copies of the First Edition were printed for the enjoyment of his friends. Among his last wishes it was Ray's desire to have this book professionally published for broad commercial distribution as part of his legacy. It is known that Rubik's Cube has some 43 quintillion combinations or positions which can easily overwhelm and mystify even the most daring puzzle solver or novice. It is also known that Ray Reed did indeed develop these solution techniques independently after some 30 years of working with the cube as a result of his intense interest and fascination. The basic content of this book was written and illustrated by the author and is presented with pride as written without the need for editing by others. All text, illustrations, layout and basic cover design are the original work of the author. It is believed that this book contains some unique and useful techniques, such as lubricating the cube that will lead the cubist to solving this very challenging puzzle in 60 seconds or less. So get a cube, study this book, practice and prepare to amaze your friends and family with your new found genius!
