Crime Fiction Migration Christiana Gregoriou, 2017-07-27 Crime narratives form a large and central part of the modern cultural landscape. This book explores the cognitive stylistic processing of prose and audiovisual fictional crime 'texts'. It also examines instances where such narratives find themselves, through popular demand, 'migrating' - meaning that they cross languages, media formats and/or cultures. In doing so, Crime Fiction Migration proposes a move from a monomodal to a multimodal approach to the study of crime fiction. Examining original crime fiction works alongside their translations, adaptations and remakings proves instrumental in understanding how various semiotic modes interact with one another. The book analyses works such as We Need to Talk About Kevin, The Killing trilogy and the reimaginings of plays such as Shear Madness and films such as Funny Games. Crime fiction is consistently popular and 'on the move' - witness the spate of detective series exported out of Scandinavia, or the ever popular exporting of these shows from the USA. This multimodal and semiotically-aware analysis of global crime narratives expands the discipline and is key reading for students of linguistics, criminology, literature and film.

**The Curious Incident of the Dog in the Night-time** Mark Haddon, 2012-08-02 Fifteen year old Christopher is about to embark on an investigation... Lots of things are mysteries. But that doesn't mean there isn't an answer to them. It was 7

minutes after midnight. The dog was lying on the grass in the middle of the lawn in front of Mrs Shears' house. Its eyes were closed. It looked as if it was running on its side, the way dogs run when they think they are chasing a cat in a dream. But the dog was not running or asleep. The dog was dead. This is Christopher's murder mystery story. There are also no lies in this story because Christopher can't tell lies. Christopher does not like strangers or the colours yellow or brown or being touched. On the other hand, he knows all the countries in the world and their capital cities and every prime number up to 7507. When Christopher decides to find out who killed the neighbour's dog, his mystery story becomes more complicated than he could have ever predicted. 'Outstanding... a stunningly good read' Observer 'A superb achievement. He is a wise and bleakly funny writer with rare gifts of empathy' Ian McEwan \*\*ONE OF THE GUARDIAN'S 100 BEST BOOKS OF THE 21st CENTURY\*\*

**Affect, Animals, and Autists** Marla Carlson, 2018-05-21 When theater and related forms of live performance explore the borderlands labeled animal and autism, they both reflect and affect their audiences' understanding of what it means to be human. Affect, Animals, and Autists maps connections across performances that question the borders of the human whose neurodiverse experiences have been shaped by the diagnostic label of autism, and animal-human performance relationships that dispute and blur anthropocentric edges. By analyzing specific structures of affect with the vocabulary of emotions, Marla Carlson builds upon the conception of affect articulated by psychologist Silvan Tomkins. The book treats a diverse selection of live performance and archival video and analyzes the ways in which they affect their audiences. The range of performances includes commercially successful productions such as *The Curious Incident of the Dog in the Night-Time*, *War Horse*, and *The Lion King* as well as to the more avant-garde and experimental theater created by Robert Wilson and Christopher Knowles, *Back to Back Theatre*, *Elevator Repair Service*, *Pig Iron Theatre*, and performance artist Deke Weaver.

**The Curious Incident of the Dog in the Night-Time** Mark Haddon, 2003-07-31 Despite his overwhelming fear of interacting with people, Christopher, a mathematically-gifted, autistic, fifteen-year-old boy, decides to investigate the murder of a neighbor's dog and uncovers secret information about his mother.

**Developing Thinking in Statistics** Alan Graham, 2006-03-23 This book should prove to be an important addition to the relatively few publications that exist on statistical thinking. It very nicely encourages the reader to take an active learning approach through simultaneously promoting pedagogy with knowledge and skills enhancement in statistics. Understanding what the subject is for and what it can do are crucial in statistical education - by getting the reader to think statistically Mr Graham has provided us with a very readable book that helps to dispel the poor reputation that statistics has acquired over

*Dogs and Monsters* Mark Haddon, 2024-10-15 From the terrifyingly talented (The Times, [London]) author of *The Curious Incident of the Dog in the Night-Time* and *The Porpoise*, eight mesmerizingly imaginative, deeply-humane stories that use Greek myths and contemporary dystopian narratives to examine mortality, moral choices and the many variants of love For millennia Greek myths have fascinated people, who have seen in them lessons about fate and hubris and the contingency of existence. Mark Haddon digs into the heart of these ancient fables and imagines them anew. The dawn goddess Eos asks Zeus to give her lover Tithonus eternal life but forgets to ask for eternal youth. In *The Quiet Limit of the World* Haddon imagines Tithonus' life as he slowly ages over thousands of years, turning the cautionary tale of tempting the gods into a spellbinding meditation on witnessing death from the outside, and ultimately, how carnal love evolves into something richer and more poignant with time. In *The Mother's Story*, Haddon takes the myth of the minotaur in his labyrinth, in which the beast is the spawn of the monstrous lust of the king's wife Pasiphaë, and turns it into a wrenching parable of maternal love for a damaged child, and the more real monstrosities of patriarchy. In *D.O.G.Z.*, the story of Actaeon, who was turned into a stag after glimpsing the naked goddess Diana and torn to pieces by his hunting dogs, becomes a visceral metaphor about the continuum of human and animal behavior. Other stories play with contemporary mythic tropes—genetic engineering, trying to escape the future, the viciousness of adolescent ostracism—to showcase how modern humans are subject to the same capriciousness that obsessed the Greeks. Haddon's tales cover a vast range, from the mythic to the domestic, from ancient Greece to the present day, from stories about love to stories about cruelty, from battlefields to bed and breakfasts, from dogs in space to doors between worlds, all of them bound together by a profound sympathy and an understanding of how human beings act and think and feel when pushed to the very edge. Throughout, Haddon's supple prose showcases his astonishing powers of observation, of both the physical world and the workings of the psyche. His vision is clear-eyed, but always resolutely empathetic.
