The Music of the How to Train Your Dragon Trilogy Erik Heine, 2024-06-21 One of the many reasons why children and adults love the How to Train Your Dragon films is the music. John Powell composed the music for all three films, maintaining thematic consistency while writing new themes for each film. This book serves as a score guide for the How to Train Your Dragon trilogy. Every note has been examined to thoroughly discuss the music for Hiccup, Toothless and the other dragons, Vikings, and the enemies and friends that they encounter. It features interviews with the composer and nearly 100 musical excerpts.

Finding Courage Emma Grondines, 2023-07-25 Lea and her brothers are normal teenagers living normal lives in Vancouver with their parents. (Well, except for the part where they're quintuplets . . . and ninjas in training.) But that normalcy is turned upside down when, one day, they get home from school to find their house trashed. On top of that, their parents are missing, and all traces of their existence have been erased. As they search the house for clues, they find a message from their parents telling them they are members of the Hirawa clan and that they should travel to Japan to get help from their grandparents. The only problem? They've never met their grandparents. They didn't even know they had grandparents. The Hirawa clan has historically stood against the Kaneshiro clan, who are planning to release the Yōkai, creatures of myth that were banished by a Hirawa ancestor long ago. And according to prophecy, only the quintuplets have what it takes to stop them. But to do that, they'll need to survive life under the Hirawa clan's roof, find their parents, and unlock their true powers. No sweat, right?

The Encyclopedia of Film Composers Thomas S. Hischak, 2015-04-16 For more than a century, original music has been composed for the cinema. From the early days when live music accompanied silent films to the present in which a composer can draw upon a full orchestra or a lone synthesizer to embody a composition, music has been an integral element of most films. By the late 1930s, movie studios had established music departments, and some of the greatest names in film music emerged during Hollywood's Golden Age, including Alfred Newman, Max Steiner, Dimitri Tiomkin, and Bernard Herrmann. Over the decades, other creators of screen music offered additional memorable scores, and some composers—such as Henry Mancini, Randy Newman, and John Williams—have become household names. The Encyclopedia of Film Composers features entries on more than 250 movie composers from around the world. It not only provides facts about these artists but also explains what makes each composer notable and discusses his or her music in detail. Each entry includes Biographical material Important dates Career highlights Analysis of the composer's musical style Complete list of movie credits This book brings recognition to the many men and women who have written music for movies over the past one hundred years. In addition to composers from the United States and Great Britain, artists from dozens of other countries are also represented. A rich resource of movie music history, The Encyclopedia of Film Composers will be of interest to fans of cinema in general as well as those who want to learn more about the many talented individuals who have created memorable scores.
