**Put some Concrete in your Breakfast: Tales from Contemporary Nursing** Rasa Kabaila, 2023-03-09 This book gives a sincere yet honest representation of modern nursing in all its forms rather than purely focusing only on the 'good' 'the funny' 'the sad' or the 'ugly'. This book provides a collection of stories that concentrate on nursing, that validates, educates and encourages those undertaking a career in nursing. In addition, this book also celebrates the amazing rewards that the unique career of nursing has to offer, for those who can find a way to persevere through the challenges. There is a high rate of burnout among nurses in their early days of practice, because of the high demands placed on them by the healthcare system; hospital administrations; the expectations of management, patients, families and carers; and the sheer size of the patient loads with complex needs these days. The global pandemic erupting has now pushed a health care service that was already under pressure to now be in complete crisis. The world now knows that we need more nurses employed to be able to move forward from this calamity. This book closes that gap in that it encourages the readers to continue to pursue a career in nursing (despite the challenges that the profession holds) while also positively promoting the incredible work that nurses do. The chapters within this book, explore a cornucopia of different aspects of nursing including: caring for dying patients, dealing with bodily fluids and how patients are not very good at working out how sick they really are. The book also covers how to manage the care of patients with complex mental illnesses and those contemplating suicide. This book is targeted at

nurses who may feel a little overwhelmed with the world that is nursing but who wish to thrive and further their career. Discussion questions at the end of the book further add to the reflection and learning process of the reader.

Aged Care Nursing Susan Carmody,Sue Forster,2003 With increased life expectancy, the aged population has grown markedly throughout the world, but there is a shortage of experienced nurses with expertise in the holistic care of the elderly. This book is written to inspire and empower such nurses. Care of the aged has a long and noble history within the nursing profession. Respect for the dignity of the elderly and a commitment to their well-being have inspired generations of nurses. But it is only in more recent times that aged-care nursing has really 'come of age' with the provision of sound evidence-based nursing practice. The traditional ethical approach to aged-care nursing has thus become combined with sound scientific knowledge in a modern holistic model of care. Aged Care Nursing: A Guide to Practice is written by clinicians for clinicians. Each chapter describes contemporary nursing practice in a specific area of aged care. The inclusion

of evidence-based and outcome-based practices throughout the book ensures that all readers, be they novices or experts, will have a reliable and beneficial reference to guide their practice. The chapter authors are from several countries, and the content of each chapter is presented generically to ensure international applicability. Each author is a recognised expert in his or her subject area, and all present their topics with a focus that is practical, rather than academic.
