**Managing the Insider Threat** Nick Catrantzos, 2022-11-30 *Managing the Insider Threat: No Dark Corners and the Rising Tide Menace*, Second Edition follows up on the success of – and insight provided by – the first edition, reframing the insider threat by distinguishing between sudden impact and slow onset (aka “rising tide”) insider attacks. This edition is fully updated with coverage from the previous edition having undergone extensive review and revision, including updating citations and publications that have been published in the last decade. Three new chapters drill down into the advanced exploration of rising tide threats, examining the nuanced complexities and presenting new tools such as the loyalty ledger (Chapter 10) and intensity scale (Chapter 11). New explorations of ambiguous situations and options for thwarting hostile insiders touch on examples that call for tolerance, friction, or radical turnaround (Chapter 11). Additionally, a more oblique discussion (Chapter 12) explores alternatives for bolstering organizational resilience in circumstances where internal threats show signs of gaining ascendancy over external ones, hence a need for defenders to promote clearer thinking as a means of enhancing resilience against hostile insiders. Coverage goes on to identify counters to such pitfalls, called lifelines, providing examples of questions rephrased to encourage clear thinking and reasoned debate without inviting emotional speech that derails both. The goal is to redirect hostile insiders, thereby offering alternatives to bolstering organizational resilience – particularly in circumstances where internal threats show signs of gaining ascendancy over external ones, hence a need for defenders to promote clearer thinking as a means of enhancing resilience against hostile insiders. Defenders of institutions and observers of human rascality will find, in *Managing the Insider Threat*, Second Edition, new tools and applications for the No Dark Corners approach to countering a vexing predicament that seems to be increasing in frequency, scope, and menace.

*NHERI 2015-2025: A Decade of Discovery in Natural Hazards Engineering* Cheryl Ann Blain, Julio Alfonso Ramirez, David Richard Johnson, Navid Jafari, Qin Chen, Jack Cadigan, Rebecca Napolitano, 2025-11-18 Natural hazards such as earthquakes, landslides, windstorms, wildfires, tsunamis and storm surge are all occurring with increased frequency and intensity. These events often cause significant disruptions to our built environment consisting of buildings, roads, bridges, parks, streets, and systems that provide transportation, water, power, and more, bringing to the forefront our need for solutions. In the last three years, the U.S. experienced an average of 20 billion-dollar disasters per year, up from 12.8 billion-dollar disasters per year in the 2010s and 6.7 billion-dollar disasters per year in the 2000s (NOAA). Research in natural hazards engineering aims

to develop tools and methods that will mitigate such damage in the future. Funded by the National Science Foundation, the Natural Hazards Engineering Research Infrastructure — NHERI — is a national network of university-centered experimental facilities. NHERI facilities are dedicated to reducing damage and loss-of-life due to natural hazards such as earthquakes, landslides, windstorms, wildfires, tsunamis and storm surge. The NHERI network provides researchers in the natural hazards engineering and social science communities with state-of-the-art tools, data, and training needed to meet the research challenges of the 21st century. NHERI's 14-member network (see graphic below) includes eight experimental facilities, a social science component, a center for computational modeling and simulation, a RAPID reconnaissance facility, a network coordination office, and a cyberinfrastructure. Two more experimental facilities are in the planning phase. To raise awareness and to encourage shared-use of NHERI experimental facilities the Network Coordination Office led an effort for all NHERI components to publish informational articles in the journal *Frontiers in Built Environment* and to create an E-book with the collection of all 15 articles. In the spring of 2020, NHERI established its own research topic in FBE: Natural Hazards Engineering Research Infrastructure (NHERI) 2016-2020: Mitigating the Impact of Natural Hazards on Civil Infrastructure and Communities. The NHERI topic consists of 15 articles written by more than 100 authors. A second series of publications in 2023 focused on the transfer of technology from research undertaken at NHERI-affiliated institutions. Technology transfer took the form of regulatory changes, updates to post-disaster reconnaissance procedures to account for multiple hazardous events, approaches to community engagement that led to earlier adoption of technology, and tools that enabled end users to prioritize hazard mitigation efforts, to name a few. Now, after almost a decade of operations, we examine how the NHERI network has changed the way people practice and conduct research in natural hazards engineering. From state-of-the-art, unique experimental facilities that tackle hazards from wind, waves, storm surge, and earthquakes to a real-time resource for field reconnaissance equipment, to a cyberinfrastructure that publishes and archives natural hazards data for reuse, to the coordination office that has developed an education pipeline for future natural hazards researchers, to a social sciences hub that has reshaped how post-event reconnaissance is undertaken, and to modeling and simulation tools that deliver risk analyses, the NHERI network researchers have advanced engineering research and practice. To this end, we are soliciting original research papers (~ 12,000 words with no more than 15 figures/tables) that highlight how the NHERI network has changed the way people practice and conduct research in natural hazards engineering. This capstone collection will emphasize the NHERI network's impact — specific ways that NHERI researchers have advanced engineering research and practice.

Excellence in Air Show Performers Manolis Karachalios, 2025-08-12 This book reveals to readers the secrets and mindsets of air show performances. Serving as a sequel to its predecessor, *Air Show Performers: Safety, Risk Management, and Psychological Factors* (9781032556147), it builds upon the insights of the first volume and offers an exploration of what

distinguishes exceptional performances amidst the high-stakes environment of air shows. From looking at the pathways to excellence to the hidden intricacies of resilient safety strategies, this book reveals the key approaches to safety and good practice for air show performers. This book combines academic research with real-world experiences from professionals in the field. It dissects the methodologies and practices essential for shaping elite air show performers and takes a critical look at training regimes. Technical skill, mental resilience and continuous improvement in performance are crucial for success in this field and this book explores resilient safety strategies to ensure that pilot and spectator protection remains paramount in every aspect of an air show performance. The reader will not just gain an insight into a pilot's training schedule but also perspectives into mindfulness and the psychological state of those who take part. Excellence in Air Show Performers: Training for Resilient Safety is a must-read for professionals in health and safety, aviation and events management seeking to enhance their practices to academics researching the complexities of high-risk environments.

**Rings of Fire** Larry J. Hughes, 2024-06-18 "An epic story, filled with an unfolding array of evocatively described landscapes and sharply drawn, unforgettable people." —Dayton Duncan, writer and producer for Ken Burns documentary films and author of fourteen books on American history and national parks Edwin Land had barely settled into his seat on the plane when the flash went off. An idea for an innovative WWII technology that might help eradicate the fascist cancer devouring the free world. It was Polaroid's Optical Ring Sight, which magically projected a bullseye of brilliantly colored rings onto the sky—like rings of fire—to aim American anti-aircraft guns that previously "couldn't hit the broad side of a barn." Rings of Fire is the compelling story of American ingenuity, determination, and grit—told through the personal stories of the amazing people who transformed insight into gunsight. From scientists to ordinary Americans to drifters and ex-cons characterized as "the underbelly of America," they crossed cultural barriers to tackle a shared crisis: California "desert rat" artist, John Hilton, whose mining claim supplied the calcite crystals desperately needed for the device, assisted by Gen. George S. Patton. Miners Steve Modesto and John Owens, a Cahuilla Indian ranch hand and a white meat-cutter from Kansas, whose friendship led to an astonishing discovery. Moonshiner Al Hansen, whose calcite prospecting in Montana started with a lucky strike but cascaded into a wild-west vigilante showdown. "Crystal Crackin' Mama" Irene Frederick, whose calcite-crystal processing skills silenced male skeptics and helped rescue the Polaroid project from disaster. Edwin Stanton, whose hubris led to a fat FBI dossier and tragedy while prospecting in Mexico. Cecil Kegans, a rough Oklahoman with a huge smile, starting his Marine career by fetching groceries for calcite miners and ending it in a bloody pool on Saipan. And miner Harry Sikkenga, whose fist fight with a shift boss packed him off to the army artillery, just in time to invade Germany and encounter the horror of Dachau. Teamed together, they overcame enormous personal obstacles to produce ring sights for Navy ships, aircraft, and Army bazookas. And afterwards, their product went from aiming the guns of war to the cameras of peacetime—for television and on the helmets of skydiving videographers. And then, all the way to the moon, aiming NASA's

space cameras, culminating with perhaps the most influential photograph of all time, Earthrise. Larry Hughes unfolds this gripping, never-told story with accessible explanations of the science and the art behind the project, but always lets the colorful characters drive a warm and vivid adventure.

*Aziende che funzionano* Marina Nitze, Nick Sinai, 2023-02-01 T00:00:00+01:00 La burocrazia è uno dei più grandi ostacoli al cambiamento. Trasformare le cose in un'organizzazione è sempre difficile e i cambiamenti non avvengono solo perché qualcuno decide che così deve essere, anche se questa persona è il CEO di un'azienda o il Presidente degli Stati Uniti. È necessario avere idee chiare, capire come vengono prese le decisioni, guadagnare consenso. Gli autori sono riusciti ad attuare riforme concrete e durature in realtà burocratizzate come la Casa Bianca, Harvard, aziende di venture capital e amministrazioni locali. In questo libro coinvolgente condividono le loro storie di hacker della burocrazia e illustrano strategie e tattiche che chiunque può usare, come crearsi alleati autentici e capaci, basare un grande cambiamento su tanti piccoli, rendere inefficaci i colleghi che fanno resistenza, usare la burocrazia contro se stessa, sfruttare le crisi come leva. Alla fine sarà chiaro che rompere la burocrazia non significa insubordinazione, e che l'artefice di un grande cambiamento è spesso un dipendente che prende l'iniziativa con un po' di sana irriverenza. Non importa dove lavori, se sei l'ultimo arrivato, l'amministratore delegato o semplicemente se sei intrappolato nel regolamento di condominio, questo libro ti insegna a cambiare le cose.

*The Red Team Handbook - The Army's Guide to Making Better Decisions* University of Foreign Military and Cultu, University of Foreign Military and Cultural Studies, 2019-11-20 Chief of Staff of the U.S. Army General Mark A. Milley repeatedly warns of increased complexity, ambiguity, and speed in future warfare. The decision-making process at all levels of command will be challenged by the environment, the situation, and the enemy, as well as by the perception and interpretation of our thoughts. The requirement to frame decisions around the scope and rate of information sharing on the modern battlefield and adapting those frames to the complexity of context and content, necessitates the ability to think critically and creatively. The curriculum at the University of Foreign Military and Cultural Studies (UFMCS) directly

addresses these challenges by training and preparing students to operate as a Red Teamer. Red Teaming creates and illuminates pathways to better decisions by employing structured techniques to identify hidden dangers, reveal unseen possibilities, and facilitate creative alternatives. It is, in essence, a form of risk management for the human brain. The U.S. Army chartered UFMCS with the mission to teach Red Teaming to the U.S. Army and other authorized organizations. As the nature of warfare has evolved, so too has our curriculum and academic offerings. Version 9.0 of the Red Team Handbook represents the current state of our program. Although the contents of this volume and our courses are not official doctrine, the practices discussed directly support and are in both Joint and U.S. Army Doctrine. This handbook provides the reader with an introduction to the fundamental concepts, methods, and tools essential to the practice of U.S. Army Red Teaming.

*Red Team* Micah Zenko, 2015-11-03 Essential reading for business leaders and policymakers, an in-depth investigation of red teaming, the practice of inhabiting the perspective of potential competitors to gain a strategic advantage Red teaming. The concept is as old as the Devil's Advocate, the eleventh-century Vatican official charged with discrediting candidates for sainthood. Today, red teams are used widely in both the public and the private sector by those seeking to better understand the interests, intentions, and capabilities of institutional rivals. In the right circumstances, red teams can yield impressive results, giving businesses an edge over their competition, poking holes in vital intelligence estimates, and troubleshooting dangerous military missions long before boots are on the ground. But not all red teams are created equal; indeed, some cause more damage than they prevent. Drawing on a fascinating range of case studies, *Red Team* shows not only how to create and empower red teams, but also what to do with the information they produce. In this vivid, deeply-informed account, national security expert Micah Zenko provides the definitive book on this important strategy -- full of vital insights for decision makers of all kinds.

OPFOR SMARTbook 3 - Red Team Army Norman M. Wade, Christopher Larsen, 2014-10 It has been nearly thirty years since a holistic explanation of the Soviet-based Opposing Force (OPFOR) was examined in the U.S. Army Field Manual 100-2 series. Recognizing this, *OPFOR SMARTbook 3: Red Team Army* re-examines and outlines the doctrinal operational construct and historical foundations of Soviet-era military forces from the FM 100-2 series, which is now out-of-print and largely unavailable. Second, *OPFOR SMARTbook 3* reorganizes that foundational material and aligns it in keeping with contemporary military doctrinal taxonomy to include ADRP 3-0 Unified Land Operations and ADRP 3-90 Tactics. Third, *OPFOR SMARTbook 3* translates and bridges the strategic- and operational-level doctrine into tactical application at the small-unit level. Through this triangulation, a more modern rendition of Red Team Armies emerges. \*\*\* Find the latest edition of this book and the rest of our series of military reference SMARTbooks at the publishers website: [www.TheLightningPress.com](http://www.TheLightningPress.com) \*\*\*
