**Aspects of Consciousness** Ingrid Fredriksson, 2012-08-20 Throughout the ages, the mysteries of what happens when we die and the nature of the human mind have fascinated us. In this collection of essays, leading scientists and authors contemplate consciousness, quantum mechanics, string theory, dimensions, space and time, nonlocal space, the hologram, and the effect of death on consciousness. Although many of these topics have traditionally been considered matters for philosophical and religious debate, advances in modern science and in particular the science of resuscitation have now enabled an objective, scientific approach—which bears widespread implications not only for science but for all of humanity.

Recovering from Your Car Accident Dr. James F. Zender, 2020-10-30 Road traffic injuries are a neglected global pandemic. Up to 50 million people a year worldwide are injured or disabled in car accidents. The deleterious impact on the global economy is immense. Thousands of those injured die of opiate overdoses, trying to deal with chronic pain. The post-accident life of a survivor is all too often devastated by spinal or severe orthopedic injuries, depression, anxiety, PTSD, sleep disturbances, mild episodic or chronic pain, and/or a traumatic brain injury that can cause personality changes, cognitive and memory impairments, and debilitating fatigue. A substantially reduced quality of life with career changes and setbacks, broken and overstressed relationships, and financial hardships that continue for many years, often ensue. First Responders, healthcare providers, the survivors' community and to the largest degree, the survivors' family, are forced to deal with the staggering impacts. Auto accidents can dramatically alter lives, forever. Where do survivors and their families go for help? How do survivors heal and get their lives back? Everyone is desperate for hope and evidence-based solutions to manage disabling conditions and ultimately reclaim their lives. This is the first book to offer comprehensive, evidence-based information to both the survivors and their caregivers on understanding, managing, and healing physical and emotional traumas sustained in auto accidents. Based on James Zender's more than fifteen years' experience as a clinical psychologist specializing in auto-accident trauma care, *Recovering From Your Car Accident* leads survivors and their families through the extensive process of emotional and physical recovery. With empathy and compassion, Dr. Zender explains how to conquer the multitude of challenges that often result from auto accidents, including managing pain, depression, and anxiety, addressing

concerns about the future and finances, personality changes, emotional and cognitive dysfunction, post-traumatic stress, traumatic brain injury, and strained personal relationships. Through stories recounted by Dr. Zender's patients, survivors will learn that they are not alone and that there is hope for a better tomorrow. Policymakers will gain insight into accident prevention and will be inspired to implement policy improvements to better meet the needs of the auto accident community. Helpful tips throughout this book and a resource section featuring the best online and community support options will aid survivors and their families with rehabilitation. Recovering from Your Car Accident will assist survivors with rebuilding their lives and discovering new ways to thrive.

**Illusions II** Richard Bach, 2014 This is the author's account of his near death and recovery from injuries received in the crash of his seaplane, Puff, in 2012.

**One** Richard Bach, 1989 'What if we could talk face-to-face with the people we were in the past, with the people we are in parallel lifetimes, in alternate worlds? What would we tell them, and what would we ask? How would we change if we knew what waits beyond space and time?' In a journey with his wife, Leslie, Richard Bach travels to a realm where survival depends on discovering what the other aspects of themselves have learned on roads they never took; where imagination and fear are tools for saving worlds and destroying them; where dying is one step to overcoming death. One is Bach's most startling story yet, opening a mystical door on an alternative path to finding ourselves.
