Time Out Film Guide John Pym, 2001 This guide covers every aspect of world cinema from Russian silents to Ealing comedies, classic documentaries to Japanese animated films, B-movie horror and major British and American releases since 1968. More than 660 new reviews are included in the 2002 edition, which covers the 2000/2001 Oscar and Bafta awards, prizes from the Berlin, Cannes and Venice festivals and a discussion of the topic Home entertainment: where are we now? The guide also includes the cinema centenary and Time Out readers' Top One Hundred polls.

Wargaming Campaigns Henry Hyde, 2022-07-20 An authoritative reference guide to building wargaming campaigns, featuring a full set of campaign rules, tips on creating maps, and more. Most miniature wargames take the form of simulating a single battle with the opponents either winning or losing and that's that until the next game. Such games can be a fun test of tactical skill, but it can be even more rewarding if they form part of a wider campaign. In a campaign, the players commanding the forces have to make the decisions at the strategic level that determine the context of any battles that occur. The outcome of these battles will, in turn, have strategic consequences for the ongoing campaign. Although campaigns can be very rewarding, many wargamers are deterred by the need to produce maps and devise mechanisms for strategic movement, Intelligence, logistics, recruiting reinforcements, keeping track of casualties etc. Henry Hyde's excellent book greatly eases this task with masses of sound advice, concrete suggestions and even a full set of campaign rules useful for any period. Whatever historical or fantasy setting you prefer, Henry shows that even simple campaigns can add extra fun to your gaming. Praise for Wargaming Campaigns "This big, thick tome contains everything you'd ever want to know about creating and running a wargame campaign." —Historical Miniatures Gaming Society

Maps: their untold stories Rose Mitchell, Andrew Janes, 2014-09-11 A map is a snapshot of a place, a city, a nation or even the world at a given point in time - fascinating for what they tell us about the way our ancestors saw themselves, their

neighbours and their place in the world. This magnificent collection, drawn from seven centuries of maps held in the National Archives at Kew, looks at a variety of maps, from those found in 14th Century manuscripts, through early estate maps, to sea charts, maps used in military campaigns, and maps from treaties. The text explores who the mapmakers were, the purposes for which the maps were made, and what it tells us about the politics of the time. Great images are accompanied by compelling stories. Featured is a woodcut map of 16th Century London, a map of where the bombs fell during the Second World War, and a map the first American settlers' drew when they were attempting to establish a new empire on Roanoke Island, off the coast of what is now North Carolina. Richly illustrated with large scale reproductions of the maps, the book also includes some of the more amusing or esoteric maps from the National Archives, such as the map of the Great Exhibition in 1851 that was presented on a lady's glove, a London Underground map in the form of a cucumber, and a Treasure Island map used to advertise National Savings. This is a fascinating and unusual journey through the world of maps and mapmakers.

Maps: Their Untold Stories 2nd edition Rose Mitchell, Andrew Janes, 2025-09-11 A new edition of this fascinating and unusual journey through the world of maps and mapmakers, drawing on 700 years' worth of maps from the National Archives. A map is a snapshot of a place, a city, a nation or even the world at a given point in time - fascinating for what they tell us about the way our ancestors saw themselves, their neighbours and their place in the world. This magnificent collection, drawn from seven centuries of maps held in the National Archives at Kew, looks at a variety of maps, from those found in 14th-century manuscripts, through to early estate maps, to maps used in 20th-century military campaigns. Great images are accompanied by compelling stories. Featured is a woodcut map of 16th Century London, a map of where the bombs fell during the Second World War, and a map the first American settlers drew when they were attempting to establish a new empire on Roanoke Island, off the coast of what is now North Carolina. This new edition has been revised throughout, with many new maps added, including newly discovered and digitised maps from North America. A whole new chapter, Mapping Buildings, has also been added.

TV Guide, 2001

Cowardly Capitalism Daniel Ben-Ami, 2001-05-15 Let's start out this review by stating up front that we disagree with Daniel Ben-Ami's assertion that a preoccupation with risk measurement and management is a detriment to the global economy. With that out of the way, we can say that Ben-Ami presents a unique analysis of the modern global economy that is not at all without merit. His contention that lagging growth is a greater peril to the world's economy than financial instability is reasonable and backed up by ample evidence and illustration. And his position that increased regulation could be doing more harm than good will be embraced by all free traders. On the basis of these discussions alone, getabstract recommends

this book to anyone thinking seriously about international financial systems. But this book is perhaps most useful as a starting point for debate, which it will certainly generate in the mind of any informed reader. While you might quibble with Ben-Ami's conclusions - as we do with his assertion that the threat of the 1990s financial crises was overblown - you will not be bored.
