[The Fourth Turning Is Here](#) Neil Howe, 2023-07-18 Twenty-five years ago, Neil Howe and the late William Strauss dazzled the world with a provocative new theory of American history. Looking back at the last 500 years, they'd uncovered a distinct pattern: modern history moves in cycles, each one lasting roughly eighty to one hundred years, the length of a long human life, with each cycle composed of four eras--or turnings--that always arrive in the same order and each last about twenty years. The last of these eras--the fourth turning--was always the most perilous, a period of civic upheaval and national mobilization as traumatic and transformative as the New Deal and World War II, the Civil War, or the American Revolution. Now, right on schedule, our own fourth turning has arrived. And so Neil Howe has returned with an extraordinary new prediction. What we see all around us--the polarization, the growing threat of civil conflict and global war--will culminate by the early 2030s in a climax that poses great danger and yet also holds great promise, perhaps even bringing on America's next golden age. Every generation alive today will play a vital role in determining how this crisis is resolved, for good or ill.

**The Fourth Turning Is Here** Neil Howe, 2023-07-18 The visionary behind the bestselling phenomenon *The Fourth Turning* looks once again to America's past to predict our future in this startling and hopeful prophecy for how our present era of civil unrest will resolve over the next ten years—and what our lives will look like once it has. Twenty-five years ago, Neil Howe and the late William Strauss dazzled the world with a provocative new theory of American history. Looking back at the last 500 years, they'd uncovered a distinct pattern: modern history moves in cycles, each one lasting roughly eighty to one hundred years, the length of a long human life, with each cycle composed of four eras—or “turnings”—that always arrive in the same order and each last about twenty years. The last of these eras—the fourth turning—was always the most perilous, a period of civic upheaval and national mobilization as traumatic and transformative as the New Deal and World War II, the Civil War, or the American Revolution. Now, right on schedule, our own fourth turning has arrived. And so Neil Howe has returned with an extraordinary new prediction. What we see all around us—the polarization, the growing threat of civil conflict and global war—will culminate by the early 2030s in a climax that poses great danger and yet also holds great promise, perhaps even bringing on America's next golden age. Every generation alive today will play a vital role in determining how this crisis is resolved, for good or ill. Illuminating, sobering, yet ultimately empowering, *The Fourth Turning Is Here* takes you back into history and deep into the collective personality of each living generation to make sense of our

current crisis, explore how all of us will be differently affected by the political, social, and economic challenges we'll face in the decade to come, and reveal how our country, our communities, and our families can best prepare to meet these challenges head-on.

The Fourth Turning Is Here by Neil Howe explores the cyclical patterns of American history, focusing on the current transformative period known as the Fourth Turning. The book posits that America is experiencing a profound societal shift, akin to past cycles that included the American Revolution and the Civil War. Howe examines the generational archetypes—Prophet, Nomad, Hero, and Artist—that shape and respond to these historical cycles...

Summary of The Fourth Turning Alexander Cooper,2021-03-26 Summary of The Fourth Turning The Fourth Turning is a book by William Strauss and Neil Howe. It outlines the foundation for what is now known as Strauss-Howe generational theory. The main tenet of the book is that American and global history follows a generational cycle. The cycle is defined by four Turnings," each lasting about 20 years. Generational archetypes play a crucial role in historical events, and these archetypes recur. The cycle of the four Turnings is called a saeculum" and is roughly the length of human life. The book offers a detailed description of the underlying philosophy. The key idea is seasonality. The authors offer their findings from nature and history to claim that the cyclical nature of time permeates all life, including American history. Furthermore, the authors analyze Anglo-American history to find patterns in a generational attitude. They then correlate these characteristics to the historical events of significance. The evidence that the authors present focuses on their interpretation of key historical figures, as well as societal attitudes. The cyclical generational attitudes are the prime factor in analyzing history and politics, according to Strauss and Howe. The authors claim that race, gender, economic class, religion, and political beliefs are all less influential in determining the course of history. This claim is controversial, and authors reflect on their stance against other prominent academics, offering some comparison with several secondary sources. Overall, the evidence that the authors present is highly subjective and is not sufficiently bolstered with verifiable sources. Each generation is presented as having a unified voice, with few acknowledgments of a diversity of thought within each generational group. Therefore, the predictions are not based on solid evidence. Rather, the book puts forward a theory of generational seasonality. The authors explore what this theory could mean, but they do not offer a sufficient basis for their findings.
