The Personal Assistant Kimberly Belle, 2022-12-01 USA TODAY bestselling author Kimberly Belle returns with a deeply addictive thriller exploring the dark side of the digital world when an influencer's assistant goes missing. When Alex first began posting unscripted family moments and motivational messages online, she had no intention of becoming an influencer. Overnight it seemed she'd amassed a huge following, and her hobby became a full-time job — one she couldn't manage without her sharp-as-a-tack personal assistant, AC. But all the goodwill of her followers turns toxic when one controversial post goes viral in the worst possible way. Alex reaches out to AC for damage control, but her assistant has gone silent. This young woman Alex trusted with all her secrets, who had access to her personal information and a front-row seat to the pressure points in her marriage and family life, is now missing, and the police are looking to Alex and her husband for answers. As Alex digs into AC's identity — and a woman is found murdered — she'll learn that the greatest threat isn't online but in her own living room.

His Very Personal Assistant Carole Mortimer, 2006-08-01 When Kit was hired as personal assistant to Marcus Maitland, she was ready to resist him — if her sensible suits, glasses and severe hairstyle didn't do it, then her cool, untouchable manner would. Multi-Agent System Engineering Francisco J. Garijo, Magnus Boman, 2007-07-23 In the ten years since the first MAAMAW was held in 1989, at King's College, Cambridge, the field of Multi-Agent Systems (MAS) has flourished. It has attracted an increasing amount of theoretical and applied research. During this decade, important efforts have been made to establish the scientific and technical foundations of MAS. MAAMAW publications are testimony to the progress achieved in key areas such as agent modelling and reasoning, multi-agent interaction and communication, and multi-agent organisation and social structure. Research results have covered a wide range of inter-related topics in each area including agent architectures, reasoning models, logics, conflict resolution, negotiation, resource allocation, load balancing, learning; social behaviour and interaction, languages and protocols, interagent and agent-human communication, social models, agent roles, norms and social laws, and static and dynamic organisational structures. The feasibility and the viability of the proposed models and techniques have been demonstrated through MAS applications in heterogeneous domains including electronic commerce, co-operative work, telecommunications, social and biological systems, robotics, office and business automation, public administration, social simulations and banking. As the applicability of the technology became understood, the multi-agent paradigm has been progressively accepted by product managers and system developers, giving rise to a considerable amount of business expectation from industry. These expectations do not rest on the concept or metaphor of agent, but on the development of MAS useful in an industrial setting, with real-time systems presenting the biggest challenge.

Advances In Multimedia & Databases For The New Century - A Swiss/japanese Perspective Yoshifumi Masunaga,Stefano Spaccapietra,2000-04-19 This Switzerland-Japan Joint Seminar on Multimedia and Databases was held to achieve at least three goals. First, it enabled us to present and discuss our recent research results and exchange our ideas for further promotion of science and technology. The second goal was to establish a friendly relationship between the Swiss and the Japanese. The last, but not least, aim was to disseminate information about our plans by publishing the proceedings of this seminar. We thought that publishing the outcome of the seminar would be essential in order not to store the treasure — the seminar results — secretly.
