The Encyclopedia of Psychoactive Plants Christian Rätsch, 2005-04-25 The most comprehensive guide to the botany, history, distribution, and cultivation of all known psychoactive plants • Examines 414 psychoactive plants and related substances • Explores how using psychoactive plants in a culturally sanctioned context can produce important insights into the nature of reality • Contains 797 color photographs and 645 black-and-white illustrations In the traditions of every culture, plants have been highly valued for their nourishing, healing, and transformative properties. The most powerful plants--those known to transport the human mind into other dimensions of consciousness--have traditionally been regarded as sacred. In *The Encyclopedia of Psychoactive Plants* Christian Rätsch details the botany, history, distribution, cultivation, and preparation and dosage of more than 400 psychoactive plants. He discusses their ritual and medicinal usage, cultural artifacts made from these plants, and works of art that either represent or have been inspired by them. The author begins with 168 of the most well-known psychoactives--such as cannabis, datura, and papaver--then presents 133 lesser known substances as well as additional plants known as "legal highs," plants known only from mythological contexts and literature, and plant products that include substances such as ayahuasca, incense, and soma. The text is lavishly illustrated with 797 color photographs--many of which are from the author's extensive fieldwork around the world--showing the people, ceremonies, and art related to the ritual use of the world's sacred psychoactives.

Hearing a Different Drummer John Studley, 2007 It is becoming increasingly apparent that virtually all aspects of diversity are in steep decline. Indigenous knowledge systems, biodiversity and cultural diversity (three interacting, interdependent systems) are all threatened with extinction throughout the world. This book explores the diversity crisis from the perspective of forestry. It introduces an emerging vision, known as the endogenous realisation of aspirations (ERA), that attempts to enhance well-being and biocultural diversity by building on local or endogenous ambitions and dreams. Based on research in the Kham region of south-western China, the author offers some practical methods for allowing development professionals to develop an understanding of and empathy for the local cultures within which they work, as well as to identify and understand local forest concepts and values. He also offers some policy recommendations for incorporating this approach more widely into development practice.

The Encyclopedia of Psychoactive Substances Richard Rudgley, 2014-11-25 For all those who might like to believe that drug use has been relegated to the suburban rec rooms and ghetto crack houses of the late twentieth century, The Encyclopedia of Psychoactive Substances offers shocking, yet thoroughly enlightening evidence to the contrary. In fact, from Neolithic man to Queen Victoria, humans have abused all sorts of drugs in the name of religion, tradition, and recreation, including such controlled substances as chocolate, lettuce, and toads. From glue-sniffing to LSD to kava, The Encyclopedia of Psychoactive Substances provides the first reliable, comprehensive exploration of this fascinating and controversial topic. With over one hundred entries, acclaimed author Richard Rudgley covers not only the chemical and botanical background of each substance, but its physiological and psychological effect on the user. Of particular value is Rudgley's emphasis on the historical and cultural role of these mind-altering substances. Impeccably researched and hugely entertaining, The Encyclopedia of Psychoactive Substances will appeal to anyone interested in one of the most misunderstood and yet also most widespread of human activities - the chemical quest for an altered state of consciousness.
