EU-Tobacco Industry agreements and beyond Marina Foltea, 2020-03-26 Podejmowane od około 2001 r. próby pociągnięcia do odpowiedzialności międzynarodowych producentów tytoniu za wyroby tytoniowe pochodzące z ich łańcuchów dostaw doprowadziły do zawarcia umów o współpracy z Unią Europejską (UE) i jej państwami członkowskimi. Porozumienia te przyczyniły się do znacznego ograniczenia nielegalnego handlu produktami tytoniowymi w Europie. Dynamika rynku spowodowała jednak zastąpienie produktów tych producentów podobnymi – nielegalnymi wyrobami. W swojej monografii dr Marina Foltea poddała analizie rolę, jaką odegrały porozumienia branżowe w zwalczaniu nielegalnego handlu w UE, jak wygląda rzeczywistość po zawarciu umowy oraz jaka jest i jaka może być w przyszłości rola pozostałych lub podobnych umów na poziomie UE lub państw członkowskich. Wskazując na korzyści dla stron czterech umów branżowych (z Philip Morris International Inc. (PMI) z 9 lipca 2004 r.; z Japan Tobacco International (JTI) z 14 grudnia 2007 r.; z British American Tobacco Holdings (BAT) z 15 lipca 2010 r.; oraz z Imperial Tobacco Limited (ITL) z 27 września 2010 r.), autorka wskazała na ich krytykę oraz ocenę techniczną Komisji Europejskiej. Ramowa konwencja WHO o ograniczeniu użycia tytoniu (FCTC) – zwłaszcza art. 5.3 – i jej późniejszy protokół w sprawie nielegalnego handlu (ITP) miały znaczący wpływ na rozwój współpracy UE i państw członkowskich z legalnym przemysłem tytoniowym. Pojawienie się szeregu nowych instrumentów zwalczania nielegalnego handlu, wymusił przegląd zawartych umów z producentami branży tytoniowej. Dalsze działania zostały określone w unijnej dyrektywie w sprawie wyrobów tytoniowych z 2014 r. Zmiany te rodzą istotne pytania dotyczące dalszych działań: Jaka jest historia i jakie wnioski wyciąga się z umów branżowych? Czy ich korzyści są w pełni uwzględnione w TPD

2014? Czy nadal istnieje możliwość współpracy z legalnym przemysłem tytoniowym i jakie wyzwania należy pokonać w tym obszarze? Analizując obecne trendy dotyczące nielegalnego handlu wyrobami tytoniowymi w Unii Europejskiej, dr Foltea sformułowała zalecenia dotyczące optymalnych relacji między UE a podmiotami z branży przemysłu tytoniowego.

EU Customs Law Timothy Lyons, 2025-08-26 The fourth edition of EU Customs Law provides a rigorous and thorough examination of all aspects of EU Customs Law. The work begins by analyzing the international law framework of the EU customs union and their economics, emphasizing the customs union as the foundation of the EU project, while also exploring its relationship with the free movement of goods. The evolution of customs legislation is outlined, covering the interpretation and application of customs legislation, customs administrative structures, the financial significance of customs duties and examining the proposed EU Customs Authority and the EU Customs Data Hub. The tariff system and the EU's combined nomenclature are discussed, along with various international arrangements. The rules of non-preferential and preferential origin are also examined, including those relating to the pan-Euro-Mediterranean area and the EU-UK trade agreement. Customs valuation and practical aspects such as customs declarations, procedures, customs debt, repayment, remission, and appeals are addressed. Comprehensive and thought-provoking, this authoritative book reflects on the history, current status, and future of EU customs law.

The Roads from Rio Pamela Chasek, Lynn M. Wagner, 2012-04-23 At the 1992 United Nations Conference on Environment and Development, popularly known as the Rio Earth Summit, the world's leaders constructed a new sustainable development paradigm that promised to enhance environmentally sound economic and social development. Twenty years later, the proliferation of multilateral environmental agreements points to an unprecedented achievement, but is worth examining for its accomplishments and shortcomings. This book provides a review of twenty years of multilateral environmental negotiations (1992-2012). The authors have participated in most of these negotiating processes and use their first-hand knowledge as writers for the International Institute for Sustainable Development's Earth Negotiations Bulletin as they illustrate the changes that have taken place over the past twenty years. The chapters examine the proliferation of meetings, the changes in the actors and their roles (governments, nongovernmental organizations, secretariats), the interlinkages of issues, the impact of scientific advice, and the challenges of implementation across negotiating processes, including the Framework Convention on Climate Change, the Convention to Combat Desertification, the Convention on Biological Diversity, the Commission on Sustainable Development, the UN Forum on Forests, the chemicals conventions (Stockholm, Basel and Rotterdam), the Montreal Protocol on Substances that Deplete the Ozone Layer, the Convention on International Trade in Endangered Species, the Convention on Migratory Species and the International Treaty on Plant Genetic Resources for Food and Agriculture.

Dispute System Design Lisa Blomgren Amsler, Janet Martinez, Stephanie E. Smith, 2020-06-02 Dispute System Design

walks readers through the art of successfully designing a system for preventing, managing, and resolving conflicts and legally-framed disputes. Drawing on decades of expertise as instructors and consultants, the authors show how dispute systems design can be used within all types of organizations, including business firms, nonprofit organizations, and international and transnational bodies. This book has two parts: the first teaches readers the foundations of Dispute System Design (DSD), describing bedrock concepts, and case chapters exploring DSD across a range of experiences, including public and community justice, conflict within and beyond organizations, international and comparative systems, and multi-jurisdictional and complex systems. This book is intended for anyone who is interested in the theory or practice of DSD, who uses or wants to understand mediation, arbitration, court trial, or other dispute resolution processes, or who designs or improves existing processes and systems.

The European Union in International Climate Change Negotiations Stavros Afionis, 2017-02-17 The EU has been portrayed as a leader in international climate change negotiations. Its role in the development of the climate change regime, as well as the adoption of novel policy instruments such as the EU Emissions Trading Scheme in 2005, are frequently put forward as indicative of a determination to push the international climate agenda forward. However, there are numerous instances where the EU has failed to achieve its climate change objectives (e.g. the 2009 Copenhagen Conference of the Parties). It is therefore important to examine the reasons behind these failures. This book explores in detail the involvement of the EU in international climate talks from the late 1980s to the present, focusing in particular on the negotiations leading up to Copenhagen. This conference witnessed the demise of the top-down approach in climate change policy and dealt a serious blow to the EU's leadership ambitions. This book explores the extent to which negotiation theory could help with better comprehending the obstacles that prevented the EU from getting more out of the climate negotiation process. It is argued that looking at the role played by problematic strategic planning could prove highly instructive in light of the Paris Agreement. This broad historical perspective of the EU's negotiations in international climate policy is an important resource to scholars of environmental and European politics, policy, law and governance.

OECD Development Co-operation Peer Reviews: Spain 2016 OECD, 2016-03-04 The OECD Development Assistance Committee (DAC) conducts periodic reviews of the individual development co-operation efforts of DAC members. The policies and programmes of each member are critically examined approximately once every five years.

Unshackled: Education for Freedom, Student Achievement, and Personal Emancipation Greg Wiggan, Lakia Scott, Marcia Watson, Richard Reynolds, 2014-04-03 Harnessing conceptual inspiration through the work of Harriet Tubman and Queen Nanny the Maroon of Jamaica, this book explores the historical and contemporary role that education has – and can continually play as an instrument of personal and group liberation. The book discusses the early formations of the

Transatlantic Slave Trade, the enslavement of native populations, and the subsequent development of the Underground Railroad and Maroon societies in the Caribbean and Americas as systems of liberation. It investigates the development and maintenance of racial, gendered and class stratification, and provides a personal path to freedom as a context for a broader discussion on using education as a mechanism for dismantling the effects of colonization, miseducation, and social-psychological domination in schools and society. As a contemporary issue, it presents an in depth analysis of the Tucson Unified School District in Arizona, and the controversy surrounding its ethnic studies program as an example of one of the contested sites of curriculum development and student liberation. Additionally, it discusses high performing charter schools as an alternative model of education, which may help to provide a systematic way of unshackling institutional barriers and oppression. Ultimately, this book acknowledges that today the road to freedom is still one we must all travel as: miseducation, school failure, school dropout, unemployment/underemployment, poverty, neighborhood violence, incarceration, and a growing prison industrial complex are all reminders of the work that still must be accomplished. Like those who historically sacrificed their lives to gain freedom and an education, today, with the lingering effects of institutionalized systems of domination, education must continue to be an instrument of social mobility and liberation, if indeed, we are to make schools and society more humane and inclusive towards those who are still waiting to be unshackled. The book presents implications regarding the treaties on education for freedom as a school reform and public policy topic.

World Health Report 2012 World Health Organization, The World Health Report 2012, the biannual flagship report of the World Health Organization, focuses for the first time in its history on the theme of research for better health. Decisions on healthcare are still made without a solid grounding in research evidence, and an impetus is required for this state of affairs to change. Aimed at ministers of health, the report provides new ideas, innovative thinking, and pragmatic advice on how to strengthen health research systems. WHO and PLoS have launched an initiative to encourage researchers to complement and substantiate the key messages in World Health Report 2012 by creating a special WHO/PLoS Collection. PLoS invited the submission of papers, especially from low- and middle-income countries, on topics related to strengthening of key functions and components of national health research systems. The World Health Report 2012 focuses on eight specific areas, discussed in the editorial, within the theme of 'No Health Without Research.' We highlight below some examples of articles previously published in PLoS journals in these specific areas of interest. Now iMedPub brings this collection to you within a book.

Ethnographic Constructions of Indigenous Others George Byrne, 2024-04-30 This book examines the ways in which

indigeneity interacts with climate change politics at multiple levels and at the same time offers a self-critical reflection on the role of ethnographic research (and researchers) in this process. Through a multi-sited ethnography, it shows how indigeneity and climate change mitigation are at this point so intensely intertwined that one cannot be clearly understood without considering the other. While indigenous identities have been (re)defined in relation to climate change, it argues that Indigenous Peoples continue to subvert pervasive notions of the nature/culture dichotomy and disrupt our understanding of what it means to be human in relation to nature. It encourages students and researchers in anthropology, international development, and other related fields to engage in more meaningful reflection on the epistemic shortcomings of “the West”, including in our own research, and to acknowledge the ongoing role of power, coloniality, extractivism, and whiteness in climate change discourses.
