Jonathan Gottschall

The Storytelling Animal Jonathan Gottschall, 2012 A provocative scholar delivers the first book on the new science of storytelling: the latest thinking on why we tell stories and what stories reveal about human nature.

Convince with Data, Inspire with Stories Friederike Oehlerking, 2025-08-08 In companies—and especially in project management—we often find ourselves in a conflict: we need to make business decisions based on insights from data analysis. For the analysis itself, we dive deep into the details of our Data Lakes 4.0. But when we surface and try to present our findings to management as a decision paper, we fail precisely because of those details. Why? Because our audience's brains shut down when faced with too many dry facts. Data storytelling solves this problem. Our brains respond better to stories than to a list of pure numbers. In data storytelling, data is presented alongside an easy-to-understand visualization and an engaging narrative. The usual information overload is reduced to essential and relevant key messages. This makes the content more understandable and forms a solid foundation for business decisions. Enriched with scientific facts about how our brains work and “veteran stories” from project management, this book shows ways to combat “Death by PowerPoint” and free the world from poor presentations. The Contents What is Data Storytelling? Projects, Communication, and Presentations States of Data Storytelling: Audience, Aha Moment, Storyboard, Narrative Arc Visualization: Pre-attentive Attributes, Gestalt Principles, Slide Design, Data and Presentation Visualization

Life in the Market Ecosystem Stuart K. Hayashi, 2014-11-13 Life in the Market Ecosystem, the second book in the Nature of Liberty trilogy, confronts evolutionary psychology head on. It describes the evolutionary psychologists' theory of gene-culture co-evolution, which states that although customs and culture are not predetermined by anyone's genetic makeup, one's practice of a custom can influence the likelihood of that person having children and grandchildren. Therefore, according to the theory, customs count as evolutionary adaptations. Extending that theory further, as entire systems of political economy—capitalism, socialism, and hunter-gatherer subsistence—consist of multiple customs and institutions, it follows that an entire political-economic system can likewise be classified as an evolutionary adaptation. Considering that liberal-republican capitalism has, insofar as the system has been implemented, done more to reduce the mortality rate and secure human fertility than other models of societal structure, it stands to reason that liberal-republican capitalism is itself a beneficent evolutionary adaptation. Moreover, as essential tenets of Rand's Objectivism—individualism, observation-based

rationality, and peaceable self-interest—have been integral to the development of the capitalist ecosystem, important aspects of the Objectivism are worthwhile adaptations as well. This book shall uphold that position, as well as combat critiques by evolutionary psychologists and environmentalists who denounce capitalism as self-destructive. Instead, capitalism is the most sustainable and fairest political model. This book argues that of all the philosophies, Objectivism is the one that is most fit for humanity.

Reframing Assessment to Center Equity Gavin W. Henning,Gianina R. Baker,Natasha A. Jankowski,Anne E.

Lundquist,Erick Montenegro,2023-07-03 This book makes the case for assessment of student learning as a vehicle for equity in higher education. The book proceeds through a framework of “why, what, how, and now what.” The opening chapters present the case for infusing equity into assessment, arguing that assessment professionals can and should be activists in advancing equity, given the historic and systemic use of assessment as an impediment to the educational access and attainment of historically marginalized populations. The “what” chapters offer definitions of emerging terms, discuss the narratives of equity in evidence of student learning, present models and approaches to promoting equity, and explore the relationship between knowledge systems and assessment practice. The “how” chapters begin by progressively moving from the classroom to the program, then beyond the program level to share examples from student affairs. Subsequent chapters address the problem of equitable access to STEM fields; culturally responsive practices within the context of community colleges; the ongoing work of culturally situated assessment practices in Historically Black Colleges and Universities; and the role of technology-enabled assessment as a possible tool for equitable assessment. The final two chapters in the book address the “now what”, providing a way for assessment professional to develop individual awareness within their practice as a next step in the equity journey, and a conceptual framework to anchor equity in their work.

The Human Translator in the 2020s Gary Massey,Elsa Huertas-Barros,David Katan,2022-12-19 Has the language industry of the 21st century been racing ahead of the translation profession and leaving translators behind? Or are translators adapting to new sociotechnical realities and societal demands, and if so, how? The chapters in this volume seek to shed light on the profiles and position of human translators in the current decade. This collection draws together the work of leading authors to reflect on the constantly evolving language industry. The eight chapters present new perspectives on, and concepts of, translation in a digital world. They highlight the shifts taking place in the sociotechnical environment of translation and the need to address changing buyer needs and market demands with new services, profiles and training. In doing so, they share a common focus on the added value that human translators can and do bring to bear as adaptive, creative, digitally literate experts. Addressing an international readership, this volume is of interest to advanced students and researchers in translation and interpreting studies, and professionals in the global language industry.

The theatrical orchestra Adrian Curtin, 2025-04-29 The Theatrical Orchestra analyses experimental performances by British music ensembles in the twenty-first century. Orchestras are reconceiving how concerts are programmed and presented, how musicians perform, where performance can occur, and the role of the audience in the co-creation of the live event. They are embracing theatricality, thereby realising music more fully as a multi-sensory performance art. This book explains how and why orchestras are thinking theatrically about performance, and uses the work of British music ensembles as exemplars. It analyses performances by Aurora Orchestra, London Contemporary Orchestra, London Sinfonietta, Manchester Collective, Multi-Story Orchestra, Paraorchestra, Scottish Ensemble, and Southbank Sinfonia. The book bridges musicology and theatre studies to analyse the theatrical orchestra on the concert stage and beyond, addressing such topics as visuality, storytelling, physical performance, site-engaged performance, and immersive performance.

Lake Chapala - Beneath The Surface - Considerations for Retiring in Mexico Bill Dahl, 2019-02-19 Considering Lake Chapala Mexico for Retirement? Read this book as part of your essential research. Author Bill Dahl goes Beneath The Surface of Lake Chapala and shares what may not be obvious in your internet research, discussions with others, and international retirement living resources. YOU NEED TO READ THIS BOOK if you are considering Mexico for retirement - particularly if you are considering the Lake Chapala region. Bill reveals the documented environmental and public health hazards that inhabit the area. He delves into tourist safety, digital connectivity, infrastructure issues, problematic governance and corruption. This book provides detailed documentation of these issues and a road map for you to explore these issues - and others - on your own. Mexico is not unlike any other country on the planet; it possesses extraordinary positives it is proud to share with the world - and - it has current issues that it would rather not speak about. I encountered both. I adore Mexico. Particularly Guadalajara in the State of Jalisco. The people, culture, food, art, architecture, language and landscapes are precious to me. I did not travel to Mexico with this book in mind. The inspirations for this book found me - my heart and my mind. The motivation for this series was both unexpected and unintentional. Yet, when confronted with these realities, I knew I must write about them. I hope this book assists you in some way in your selection process of a place for you to retire in Mexico. Have a friend or relative thinking about retirement in Mexico's Lake Chapala area? Give them the gift of this book. Enjoy and safe travels. Enjoy the journey.

About the Storytelling Animal Mary E. Viguerie, 2007

Summary of Jonathan Gottschall's The Storytelling Animal Everest Media, 2022-09-09T22:59:00Z Please note: This is a companion version & not the original book. Sample Book Insights: #1 Pay attention when you read a book. The power of story is so embedded in our lives that we are completely desensitized to its weird and witchy power. To experience its

fascination, you must concentrate and resist the suction of alternate worlds. But you can do this! It's not too late to save yourself. Well, it's never too late to try, anyway. It's never too late to learn to read. -> The power of story is so embedded in our lives that we are completely desensitized to its weird and witchy power. #2 When you read a book, your mind is working hard to create images that surpass the author's descriptions. #3 Reading and story are two of the most powerful tools you can use to immerse yourself in a new language. #4 We spend more time watching television than we do reading books, and we spend a lot of time reading online.

The Story Paradox Jonathan Gottschall, 2021-11-23 Storytelling, a tradition that built human civilization, may soon destroy it. Humans are storytelling animals. Stories are what make our societies possible. Countless books celebrate their virtues. But Jonathan Gottschall, an expert on the science of stories, argues that there is a dark side to storytelling we can no longer ignore. Storytelling, the very tradition that built human civilization, may be the thing that destroys it. In *The Story Paradox*, Gottschall explores how a broad consortium of psychologists, communications specialists, neuroscientists, and literary quants are using the scientific method to study how stories affect our brains. The results challenge the idea that storytelling is an obvious force for good in human life. Yes, storytelling can bind groups together, but it is also the main force dragging people apart. And it's the best method we've ever devised for manipulating each other by circumventing rational thought. Behind all civilization's greatest ills—environmental destruction, runaway demagogues, warfare—you will always find the same master factor: a mind-disordering story. Gottschall argues that societies succeed or fail depending on how they manage these tensions. And it has only become harder, as new technologies that amplify the effects of disinformation campaigns, conspiracy theories, and fake news make separating fact from fiction nearly impossible. With clarity and conviction, Gottschall reveals why our biggest asset has become our greatest threat, and what, if anything, can be done. It is a call to stop asking, "How we can change the world through stories?" and start asking, "How can we save the world from stories?"

Canada's Indigenous Constitution John Borrows, 2010 With characteristic richness and eloquence, John Borrows explores legal traditions, the role of governments and courts, and the prospect of a multi-juridical legal culture, all with a view to understanding and improving legal processes in Canada. He discusses the place of individuals, families, and communities in recovering and extending the role of Indigenous law within both Indigenous communities and Canadian society more broadly.--Pub. desc.

Airs de Paris Christine Macel,Centre Georges Pompidou,2007 The book is divided into two interactive parts, one devoted to the visual arts and the other to design and architecture. It covers three themes: - The development of the information and communication technologies that generate mutations and give rise to new ways of perceiving space and time and create new languages; - In the postcolonial and globalised world, society redefines itself through its different communities whose identity is based on national, cultural or religious bases; - As society dematerialises whole swathes of its activities via the new information and communication technologies, what criteria do we adopt to define ourselves as individuals? The reproduced works present new and recent works of contemporary artists, designers and architects that have a specific resonance with the themes examined.
