All for Love: Endless Trekking in Search of Begonia Ching-I Peng, 2021-06-30 This is a magic book of profound love. It's about Begonia plants, about the life of a respectable botanist, Dr. Ching-I Peng, and about the legacies he left to this world. You may be amazed by the beauty of Begonia or curious about why many people take a fancy to Begonia. Here in this book, Dr. Peng, a leading scholar in the field of Begonia diversity and evolution, will show you why. Somewhat like a travelogue, this book is the product of the author's many expeditions to the wilderness. Anyone intent on scientific research or curious about how a botanic scientist works will be fascinated by Dr. Peng's wild stories recorded here with wit and humor—and wisdom. The book contains the gist of Dr. Peng's many talks, in which he shared his precious knowledge of Begonia to young scientists. Because of his passion and unselfishness, the real magic—science—can move on continuously. His love of Begonia can be passed on to future generations throughout the world. A real magic book, *All for love: Endless trekking in search of Begonia* will surely delight specialists as well as laymen. Coral Reefs of Eastern Asia under Anthropogenic Impacts Ichiro Takeuchi, Hideyuki Yamashiro, 2023-06-24 Coral reefs, which are one of the most productive and biodiverse ecosystems on Earth, serve various important roles, such as providing shelter and spawning grounds to a wide range of marine animals. However, the global decline of hard corals in tropical and subtropical regions is a growing concern. A recent review of the Intergovernmental Panel on Climate Change (IPCC)

indicated that only 10%–30% of coral reefs would survive with an increase of 1.5 °C in global warming temperature. Of coral reefs around the world, the coral reefs in eastern Asia face one of the most industrially developed and high population areas in the world. Thus, coral reefs of eastern Asia have been affected by various anthropogenic factors, such as eutrophication, coastal development, anthropogenic pollutants, ocean acidification, disease, and overfishing. Therefore, urgent research is required to determine the levels at which different factors will affect coral health. Besides, we propose a perspective on coral reef (especially those in eastern Asia) conservation under climate change and various anthropogenic activities.

The Pre-Austronesian ‘Liangdao Man’ Chung-yu Chen, 2025-05-14 This book adopts a comprehensive approach, drawing from archaeology, physical anthropology, human genetics, linguistics, cultural anthropology, ethnology and ethnography, to explore the Austronesian link of ‘Liangdao Man,’ and the origins of Austronesian language groups. Due to their dating 2,300~1,500 years earlier than Austronesian-speaking peoples, these two individuals should be Pre-Austronesian or Proto-Austroasiatic. The Matsu archipelago is situated off Fuzhou City's estuary in Fujian Province. In 2011–2012, the author unearthed two human skeletons, ‘Liangdao Man 1’ and ‘Liangdao Man 2,’ aged 8,300 and 7,500 years, respectively, on Liangdao Island, one of these islands. DNA analysis revealed that haplogroups E and R9 were identified, linking them to Austronesians of Taiwan aborigines’ maternal lineage.

Fifty Years of Cytochrome P450 Research Hiroshi Yamazaki, 2014-06-23 This book encompasses major progress and future directions in cytochrome P450 (P450) research. Included are contributions by pioneers in the discovery of P450, with chapters on the molecular and functional properties of P450 and cutting-edge applications knowledge from various fields. P450 research has its roots in metabolism, but the true beginning was in 1962 with the publication by Tsuneo Omura and Ryo Sato in *The Journal of Biological Chemistry* on their discovery of the cytochrome. Following this groundbreaking study, over the last half-century, research has revealed that many forms of P450 exist in animals, plants and microorganisms. P450 research has expanded into many different fields including medicine, agriculture and biotechnology and has drawn the attention of industries for its bioengineering applications, such as drug development and creation of the “blue rose”. Also, research on nuclear receptors, which has grown out of research on the regulatory mechanisms of P450 genes, has become an important area in biology, medical science, pharmacology and clinical medicine—for example, with recent developments in personalized medicines. This book will draw readers into the important and exciting world of P450 and will encourage young students and scientists in P450 research to continue expanding the field via new approaches.

World Directory of Crystallographers Yves Epelboin, 2013-11-11 The 9th edition of the *World Directory of Crystallographers and of Other Scientists Employing Crystallographic Methods*, which contains 7907 entries embracing 72 countries, differs considerably from the 8th edition, published in 1990. The content has been updated, and the methods used to acquire the information presented and to produce this new edition of the Directory have involved the latest advances in

technology. The Directory is now also available as a regularly updated electronic database, accessible via e-mail, Telnet, Gopher, World-Wide Web, and Mosaic. Full details are given in an Appendix to the printed edition.

Environmental History in East Asia Tsui-jung Liu,2014-04-16 As environmental history has developed as growing sub-discipline within the study of history, great emphasis has been placed on the importance of adopting an interdisciplinary approach. Indeed, as *Environmental History in East Asia* shows, by drawing on research and methodologies from the fields of science, technology, geography, geology and ecology, we are able to develop a much richer understanding of a region's history. This book provides a comprehensive examination of environmental history in East Asia, ranging temporally from the Ming dynasty to the 21st Century and spatially across China, Japan and Taiwan. Split into four parts, the chapters cover a wide range of fascinating topics, comparing environmental thought and policy in the East and West, the transformation of the landscape, land resource utilization and impact of agriculture and disasters and diseases across the region. A diverse selection of case studies are used to illustrate the chapters, including the role of Daoism, Qing pasturelands and 21st century swine flu. Truly interdisciplinary in approach, this book will be of huge interest to students and scholars of Asian environmentalism, environmental history, Asian anthropology, Asian development studies and Asian history more generally.
