Historia antigua de México: Aspectos fundamentales de la tradición cultural mesoamericana Linda Manzanilla, Leonardo López Luján, 2000

Anthropological Perspectives on Rural Mexico Cynthia Hewitt de Alcántara, 2017-07-06 In this title, first published in 1984, the author examines the social and political forces surrounding the practice of anthropology at different periods in the history of Mexico since 1917. She does this by analysing and tracing the development of competing anthropological perspectives, from ethnographic particularism and functionalism through indigenismo, cultural ecology, Marxism and the dependency paradigm, to the historical structuralism of the 1970s. This book provides the basis for a systematic analysis of peasant studies in Mexico, and discusses in stimulating terms the theoretical and empirical difficulties of the profession of anthropology itself.

Routledge Library Editions: Rural History Various, 2021-07-14 The volumes in this set, originally published between 1969 and 1990, draw together research by leading academics in the area of the rural history and provide an examination of related key issues. The volumes examine social change in rural communities approaching the industrial revolution, whilst also providing an overview of the history of rural populations in England, France, Germany, Mexico and the United States. This set will be of particular interest to students of history, business and economics.

Traditional Mexican Agriculture Alba González Jácome, 2022-04-19 This long-needed book highlights how traditional Mexican agriculture has changed according to environmental, climatic, geographical, social and cultural conditions. Grounded in archaeological-historical data from interrelated research of various scientific disciplines, the book also draws on studies made by anthropologists of varied small-scale agricultural groups. Traditional Mexican Agriculture is the result of a holistic study of Mexican agriculture. It offers the reader a perspective of traditional agriculture in Mexico from social, cultural and ecological Anthropology, Ethnology, regional and environmental History, and Agroecology, to help obtain sustainable agroecology where human societies obtain better ways of life and a healthy and nutritious food system. The book

further aims to recover ideas, management, and components of local knowledge of small-scale farmers. Pitched at university students and academics, as well as researchers and developers of agricultural matters, this book will be ideal reading at agrarian universities and related institutions. It provides a basis for future studies in sustainable agricultural systems in this region.
