Library Association (Portland, Or.),Library Association of Portland

50 Movie Music Moments Vasco Hexel,2023-05-02 50 Movie Music Moments comprises a wide-ranging collection of analyses of some of the most fascinating uses of music in modern Hollywood cinema. Considering narrative strategies, filmmaking techniques, functions of film music, audience engagement and conditioning, cultural implications, and intertextuality, the case studies gathered here introduce music as a crucial element of film. In 50 examples drawn from popular and critically acclaimed Hollywood films from the late 1950s to the present, the collection showcases the many dimensions of film music and its role in cinematic storytelling. Each example includes an analysis addressing the film's context and providing a close reading of how music, narrative, and visual elements of the scene interact. Case studies exploring the role of music in film include Amadeus, Gladiator, Baby Driver, The Dark Knight, Philadelphia, Schindler's List, and Black Panther. This invaluable collection offers an ideal resource to support undergraduate and graduate courses in film music history, film scoring, and filmmaking, as well as readers with a general interest in music in film.

Finding List of Music Scores in the Circulating Department of the Plainfield Public Library Plainfield (N.J.). Public Library,1910

Space Exploration and Humanity American Astronautical Society,2010-08-23 A complete history of human endeavors in space, this book also moves beyond the traditional topics of human spaceflight, space technology, and space science to include political, social, cultural, and economic issues, and also commercial, civilian, and military applications. In two expertly written volumes, Space Exploration and Humanity: A Historical Encyclopedia covers all aspects of space flight in all participating nations, ranging from the Cold War-era beginnings of the space race to the lunar landings and the Apollo-Soyuz mission; from the Shuttle disasters and the Hubble telescope to Galileo, the Mars Rover, and the International Space Station. The book moves beyond the traditional topics of human spaceflight, space technology, and space science to include political, social, cultural, and economic issues, and also commercial, civilian, and military applications. Produced in conjunction with the History Committee of the American Astronautical Society, this work divides its coverage into six sections, each beginning with an overview essay, followed by an alphabetically organized series of entries on topics such as astrophysics and planetary science; civilian and commercial space applications; human spaceflight and microgravity science; space and society; and

space technology and engineering. Whether investigating a specific issue or event or tracing an overarching historic trend, students and general readers will find this an invaluable resource for launching their study of one of humanity's most extraordinary endeavors.
