Interferencias electromagnéticas en sistemas electrónicos Josep Balcells,1991-10 El problema de las interferencias electromagnéticas en los sistemas electrónicos ha ido adquiriendo importancia conforme la profusión de las aplicaciones de la electrónica ha aumentado la contaminación electromagnética del entorno de trabajo de los circuitos. La situación se ha visto agravada al crecer la velocidad y la densidad de integración de los circuitos integrados, que los ha hecho mas susceptibles. Todo ingeniero electrónico con funciones de diseño o producción, tarde o temprano se debe afrontar con este problema. El objetivo de este libro es dar los conceptos y la metodología de solución de los problemas de interferencias electromagnéticas en los sistemas electrónicos. Se ofrece una serie de conceptos básicos organizados sistemáticamente. El libro está organizado en cuatro partes que corresponden a: la descripción del problema, sus soluciones, la aplicación general de éstas y una parte de normas y mediciones relativas a las interferencias y la compatibilidad. En apéndices, al final, se han agrupado los conceptos generales más teóricos, las definiciones más comunes, las unidades, y un resumen de los métodos generales de reducción de las interferencias electromagnéticas. Esta obra es de interés para todos los ingenieros y profesionales de los sectores eléctrico y electrónico, así como estudiantes de las carreras de ingeniería electrónica (en particular ingenieros superiores e ingenieros técnicos de telecomunicación, industriales e informática. Puede ser útil en los ámbitos eléctrico y electrónico en el diseño, la producción, las instalaciones y la calidad. Índice resumido del libro; Parte I. Programaciones didácticas para FP Raúl Solbes i Monzó, 2014-02-14 RECETA DE PROGRAMACIÓN DIDÁCTICA Esta sencilla receta nos permitirá elaborar nuestra programación didáctica de manera clara y directa. Utensilios básicos: • Título • Currículum • Proyecto Educativo de Centro (PEC) • Proyecto Curricular de Centro (PCC) Ingredientes: • Contextualización • Análisis prescriptivo • Objetivos generales • Contenidos • Orientaciones metodológicas • Evaluación y calificación • Fomento de la lectura • Actividades extraescolares • Calidad y mejora continua Para empezar a elaborar nuestra receta, deberemos utilizar cuatro documentos básicos: el Título, el Currículum, el PEC, y el PCC. Estos documentos serán el molde de nuestro pastel, para que éste tenga una forma y consistencia adecuadas. Para la base utilizaremos: dos vasos de contextualización, tres cucharadas de análisis prescriptivo y unos cuantos objetivos generales. Con todo ello elaboraremos una base sólida, sabrosa y coherente, donde posteriormente descansará nuestro relleno. El ingrediente principal y novedoso de nuestro relleno son los contenidos. Estos contenidos se obtienen a partir de los resultados de aprendizaje y de los criterios de evaluación. De esta forma nos aseguramos que los contenidos están estrictamente adecuados al paladar del alumnado. Para finalizar decoraremos la programación didáctica con una capa de nuestra propia metodología, unas cucharadas de evaluación y una pizca de atención a la diversidad, fomento de la lectura y actividades extraescolares. Una vez finalizada la receta no podemos olvidar el último paso, probar nuestra programación didáctica, y ponerla en práctica saboreando y estudiando su calidad y puntos de mejora.
