Studies in Tectonic Culture Kenneth Frampton, 2001-08-24 Composed of ten essays and an epilogue that trace the history of contemporary form as an evolving poetic of structure and construction, the book's analytical framework rests on Frampton's close readings of key French and German, and English sources from the eighteenth century to the present. Kenneth Frampton's long-awaited follow-up to his classic A Critical History of Modern Architecture is certain to influence any future debate on the evolution of modern architecture. Studies in Tectonic Culture is nothing less than a rethinking of the entire modern architectural tradition. The notion of tectonics as employed by Frampton—the focus on architecture as a constructional craft—constitutes a direct challenge to current mainstream thinking on the artistic limits of postmodernism, and suggests a convincing alternative. Indeed, Frampton argues, modern architecture is invariably as much about structure and construction as it is about space and abstract form. Composed of ten essays and an epilogue that trace the history of contemporary form as an evolving poetic of structure and construction, the book's analytical framework rests on Frampton's close readings of key French and German, and English sources from the eighteenth century to the present. He clarifies the various turns that structural engineering and tectonic imagination have taken in the work of such architects as Perret, Wright, Kahn, Scarpa, and Mies, and shows how both constructional form and material character were integral to an evolving architectural expression of their work. Frampton also demonstrates that the way in which these elements are articulated from one work to the next provides a basis upon which to evaluate the works as a whole. This is especially evident in his

consideration of the work of Perret, Mies, and Kahn and the continuities in their thought and attitudes that linked them to the past. Frampton considers the conscious cultivation of the tectonic tradition in architecture as an essential element in the future development of architectural form, casting a critical new light on the entire issue of modernity and on the place of much work that has passed as avant-garde. Romanesque Art in the MNAC Collections Manuel Castiñeiras, Jordi Camps i Sòria, Museu Nacional d'Art de Catalunya, 2008 Aquesta publicació ofereix un recorregut pel romànic català, una de les etapes més enriquidores de la història de l'art català, que va de l'inici del segle XI fins a mitjan segle XIII, a través d'algunes de les seves obres mestres, com les pintures de l'absis de Sant Climent de Taüll, el frontal d'Avià o la Majestat de Batlló. El llibre inclou apartats dedicats al context general del romànic, a la història de les col·leccions i a l'interès que va despertar en els artistes de l'avantguarda del segle XX, reflex de la importància i la vigència del romànic en l'actualitat.
