Understanding Media Marshall McLuhan, 2003 A reissue of McLuhan's expose from 1964 on the state of the then emerging phenomenon of mass media

understanding media marshall mc luhan, 1964

Understanding New Media Robert K. Logan, 2010 Marshall McLuhan made many predictions in his seminal 1964 publication, *Understanding Media: Extensions of Man*. Among them were his predictions that the Internet would become a «Global Village», making us more interconnected than television; the closing of the gap between consumers and producers; the elimination of space and time as barriers to communication; and the melting of national borders. He is also famously remembered for coining the expression «the medium is the message». These predictions form the genesis of this new volume by Robert Logan, a friend and colleague who worked with McLuhan. In *Understanding New Media* Logan expertly updates *Understanding Media* to analyze the «new media» McLuhan foreshadowed and yet was never able to analyze or experience. The book is designed to reach a new generation of readers as well as appealing to scholars and students who are familiar with *Understanding Media*. Understanding Media Marshall McLuhan, 1969-06

Marshall McLuhan: Theoretical elaborations Gary Genosko, 2005 This collection contains key critical essays and assessments of the writings of Canadian communications thinker Marshall McLuhan selected from the voluminous output of the past forty years. McLuhan's famous aphorisms and uncanny ability to sense megatrends are once again in circulation across and beyond the disciplines. Since his untimely death in 1980, McLuhan's ideas have been rediscovered and redeployed with urgency in the age of information and cybernation. Together the three volumes organise and present some forty years of indispensable critical works for readers and researchers of the McLuhan legacy. The set includes critical introductions to each section by the editor. Forthcoming titles in this series include Walter Benjamin (0-415-32533-1) December 2004, 3 vols, Theodor Adorno (0-415-30464-4) April 2005, 4 vols and Jean-Francois Lyotard (0-415-33819-0) 2005, 3 vols.

Laws of Media Marshall McLuhan, Eric McLuhan, 1988 In the McLuhan tradition, this *New Science* offers a while new understanding of human creation, and a vision that could reshape our future.

The Medium Is Still the Message Grant N. Havers, 2025-09-15 The Medium Is Still the Message presents Marshall McLuhan, history's foremost philosopher of media, as the indispensable guide for understanding the impact of technologies. McLuhan (1911-1980) shows that media are not simply tools of communication: they create new environments with transformational effects on politics, economics, culture, identity, religion, and nature. Grant N. Havers argues that McLuhan's key insight--the medium is the message--is even more relevant today as humanity grapples with the unintended effects of new media. As McLuhan demonstrated, a lack of understanding about the power of media technologies allows these entities to become idols that enslave their makers. At the same time, they encourage human beings to act like gods who can reinvent reality itself, all the while leading to the decline of literacy, the weakening of democracy, the resurgence of tribalism within the global village, and the elusive search for identity in cyberspace. The Medium Is Still the Message ultimately offers good news: using McLuhan's insights, human beings can escape the technological cave that they have fashioned for themselves.

Transforming McLuhan Paul Grosswiler, 2010 Transforming McLuhan explores the radical, humanist line of descent in interpreting Canadian media and culture theorist Marshall McLuhan's work, rejecting the dominant view of McLuhan as a conservative, uncritical herald of technological determinism and capitalism. This McLuhan is the oppositional critic of modernity, resisting uncontrolled technological change, who seeks new media forms with a human face. Contributors from diverse international and academic perspectives include Douglas Kellner, Nick Stevenson, Gary Genosko, Richard Cavell, Lance Strate, Glenn Willmott, Patrick Brantlinger, Donna Flayhan, and Bob Hanke. Marshall McLuhan was the first to theorize and to develop a concept of media, indicating their importance to all areas of society and culture. Today media are far more pervasive than in the 1950s and 1960s when he wrote. Yet his work has still not received its due attention. Transforming McLuhan will begin to correct this oversight.---Mark Poster, University of California-Irvine; Author of What's the Matter with the Internet? and Information Please Transforming McLuhan re-reads the McLuhan phenomenon in light of today's media-saturated, 24/7 news and smartphone world. Here we meet again with the visionary Tiresias in the Underworld whose dark sayings once lit the late afternoon of the twentieth century. These critical readings create a time-out to question him again and to open space-time interstices for alternate thoughts and alternate actions. ---Michael Heim, Mount St. Mary's College, Los Angeles; Author of The Metaphysics of Virtual Reality and Virtual Realism Transforming McLuhan offers a rich and textured reconsideration of Marshall McLuhan's ideas, demonstrating how McLuhan's work is a better match for current multi-dimensional and ambivalent understandings of media and culture than it was for the narrower conceptions that guided those who dismissed McLuhan in his own time. These provocative and well-written essays persuasively engage in what I have called 'morphing' McLuhan with other key theoretical frameworks. As a result, Transforming McLuhan illustrates that cultural theorists have much to learn from McLuhanism, but that McLuhan's perspective also has much room for enrichment

t from critical media studies. ---Joshua Meyrowitz, University of New Hampshire; Author of No Sense of Place: The Impact of Media on Social Behavior--BOOK JACKET.

New Literary Hybrids in the Age of Multimedia Expression Marcel Cornis-Pope, 2014-11-15 Begun in 2010 as part of the “Histories of Literatures in European Languages” series sponsored by the International Comparative Literature Association, the current project on New Literary Hybrids in the Age of Multimedia Expression recognizes the global shift toward the visual and the virtual in all areas of textuality: the printed, verbal text is increasingly joined with the visual, often electronic, text. This shift has opened up new domains of human achievement in art and culture. The international roster of 24 contributors to this volume pursue a broad range of issues under four sets of questions that allow a larger conversation to emerge, both inside the volume’s sections and between them. The four sections cover, 1) Multimedia Productions in Theoretical and Historical Perspective; 2) Regional and Intercultural Projects; 3) Forms and Genres; and, 4) Readers and Rewriters in Multimedia Environments. The essays included in this volume are examples of the kinds of projects and inquiries that have become possible at the interface between literature and other media, new and old. They emphasize the extent to which hypertextual, multimedia, and virtual reality technologies have enhanced the sociality of reading and writing, enabling more people to interact than ever before. At the same time, however, they warn that, as long as these technologies are used to reinforce old habits of reading/ writing, they will deliver modest results. One of the major tasks pursued by the contributors to this volume is to integrate literature in the global informational environment where it can function as an imaginative partner, teaching its interpretive competencies to other components of the cultural landscape.

MoneyGPT James Rickards, 2024-11-12 “Essential reading” - Forbes From the New York Times bestselling author of The New Great Depression and Currency Wars, a telling prediction for how AI will endanger global economic markets and security In November 2022, OpenAI released GPT-4 in a chatbot form to the public. In just two months, it claimed 100 million users—the fastest app to ever reach this benchmark. Since then, AI has become an all-consuming topic, popping up on the news, in ads, on your messenger apps, and in conversations with friends and family. But as AI becomes ubiquitous and grows at an ever-increasing pace, what does it mean for the financial markets? In MoneyGPT, Wall Street veteran and former advisor to the Department of Defense James Rickards paints a comprehensive picture of the danger AI poses to the global financial order, and the insidious ways in which AI will threaten national security. Rickards shows how, while AI is touted to increase efficiency and lower costs, its global implementation in the financial world will actually cause chaos, as selling begets selling and bank runs happen at lightning speed. AI further benefits malicious actors, Rickards argues, because without human empathy or instinct to intervene, threats like total nuclear war that once felt extreme are now more likely. And throughout all this, we must remain vigilant on the question of whose values will be promoted in the age of AI. As Rickards predicts, these systems will fail when we rely on them the most. MoneyGPT shows that the danger is not that AI will

malfunction, but that it will function exactly as intended. The peril is not in the algorithms, but in ourselves. And it's up to us to intervene with old-fashioned human logic and common sense before it's too late.

Seeding Civil War H. Craig Miner, 2008 Following the passage of the Kansas-Nebraska Act, Kansas Territory was a national issue that dominated America's press, not to mention three sessions of Congress. Craig Miner now offers the first in-depth study of national media coverage devoted to the beleaguered territory, unearthing new examples of what Americans were saying about Kansas and showing how those words affected the course of national events. Miner draws on dozens of newspapers and magazines from all parts of the country and of all political persuasions: a trove of rich quotations and

unvarnished epithets, nearly all of them published here for the first time. He reveals how the heated, polarizing rhetoric widened the sectional rift, weakened chances of accommodation, and contributed more to the onset of civil war than has been previously recognized.--BOOK JACKET.

The Global Village Marshall McLuhan, Bruce R. Powers, 1989 Presents a model for studying the structural impact of video-related technologies on global society.
