What Makes This Book So Great Jo Walton, 2014-01-16 Jo Walton is an award-winning author of, inveterate reader of, and chronic re-reader of science fiction and fantasy books. *What Makes This Book So Great?* is a selection of the best of her musings about her prodigious reading habit. Jo Walton's many subjects range from acknowledged classics, to guilty pleasures, to forgotten oddities and gems. Among them, the Zones of Thought novels of Vernor Vinge; the question of what genre readers mean by 'mainstream'; the under-appreciated SF adventures of C. J. Cherryh; the field's many approaches to time travel; the masterful science fiction of Samuel R. Delany; Salman Rushdie's *Midnight's Children*; the early Hainish novels of Ursula K. Le Guin; and a Robert A. Heinlein novel you have most certainly never read. Over 130 essays in all, *What Makes This Book So Great* is an immensely engaging collection of provocative, opinionated thoughts about past and present-day fantasy and science fiction, from one of our best writers.

Children's Books and Their Creators Anita Silvey, 1995 Unique in its coverage of contemporary American children's literature, this timely, single-volume reference covers the books our children are--or should be--reading now, from board books to young adult novels. Enriched with dozens of color illustrations and the voices of authors and illustrators themselves, it is a cornucopia of delight. 23 color, 153 b&w illustrations.

Anne McCaffrey Robin Roberts, 1996-05-28 It examines all of her novels to date, both individual and series, and reveals why she deserves the critical recognition her works have received. Roberts explores the range and complexity of her novels and the recurrent themes that have attracted so many young adults to her work: the heroine as outsider, the need for tolerance and the acceptance of difference, the importance of living harmoniously with nature, and the value of art and literature.

Magill's Guide to Science Fiction and Fantasy Literature: The absolute at large, 1996 These four volumes cover 791 books or series, 238 of them published during the 1980s and 1990s. the entries are 1,000 words long for single books and 1,500 for series, with a one-sentence summary beginning each entry followed by bibliographical information ... Volume 4 contains an extensive bibliography of critical works on science fiction and fantasy, a list of major award winners, a genre index. Booklist

Science Fiction and Fantasy Book Review Neil Barron,R. Reginald,2009-11-01 Science Fiction & Fantasy Book Review was founded in 1979 to provide comprehensive coverage of all the major and minor books being released in the genre at that time. This was the golden era of SF publishing, with a thousand titles (old and new) hitting the stands and the bookshelves each and every year. From the older classics to the newest speculative fiction, this was the period when the best and the brightest shined forth their talents. SF&FBR included reviews by writers in the field, by amateur critics, and by litterateurs and University professors. Over a thousand books were covered during the single year of publication, many of them having been reviewed no where else, before or since. The January 1980 issue includes a comprehensive index of all the works featured during the preceding year. This reprint will be a welcome addition to the literature of science fiction and fantasy criticism. Neil Barron is a retired bibliographer and literary critic, editor of the acclaimed Anatomy of Wonder series. Robert Reginald was the publisher for twenty-five years of Borgo Press, and has authored over 110 books of his own.

The Readers' Advisory Handbook Jessica E. Moyer,Kaite Mediatore Stover,2010-03-22 Covering everything from getting to know a library's materials to marketing and promoting RA, this practical handbook will help you expand services immediately without adding costs or training time.

Bordering Kingdoms Ekstasis,2023-09-05 Engage with God's undying heart for beauty. While we all live in the tension between everyday life and the high artistry of God, the Church doesn't often acknowledge this inward tension. Those of us who connect most deeply with God through beauty, creativity, and pure expression can therefore struggle to feel a true sense of belonging in the greater body of believers. But the truth is, when we engage in different forms of artistic expression — literature, painting, film, music, poetry — we grow in our understanding of the breadth, joy, and boundless creativity of our Creator. Bordering Kingdoms, a compilation of essays chosen by the founder of Ekstasis, Conor Sweetman, is for those who often feel unseen or unknown in the Body of Christ. Through this work's intimate invitations into art, poetry, writing, and the considered life, these readers will be propelled deeper into their own creative process alongside God. In this collection, the

reader will be encouraged to experience God's: High artistry Creativity Passion for beauty Joyful engagement Heart for creation Bordering Kingdoms will lead you into that mysterious borderland between this world and the Kingdom of Heaven, a place where we experience the peace and joy of God's artistic heart, a place where we are invited to explore the journey of our own God-given creativity.

English Language Arts and Reading on the Internet Jim Greenlaw, Jazlin V. Ebenezer, 2001 The purpose of this book is to introduce you to a selection of English language arts activities and resources that are available on the Internet's World Wide Web and to suggest ways in which you may most effectively make use of the web sites examined in the text in order to transform your teaching of reading, writing, speaking, listening and viewing.

All the Weyrs of Pern Anne McCaffrey, 2002-02-26 "When McCaffrey's beloved dragons roar and their riders soar on the beasts' mighty backs . . . fans of Pern will likely be enthralled."—Publishers Weekly For generations, the dragonriders had dedicated their lives to fighting Thread, the dreaded spores that periodically rained from the sky to ravage the land. On the backs of their magnificent telepathic dragons they flew to flame the deadly stuff out of the air before it could reach the planet's surface. But the greatest dream of the dragonriders was to find a way to eradicate Thread completely, so that never again would their beloved Pern be threatened with destruction. Now, for the first time, it looks as if that dream can come true. For when the people of Pern, led by Masterharper Robinton and F'lar and Lessa, Weyrleader and Weyrwoman of Bendon Weyr, excavate the ancient remains of the planet's original settlement, they uncover the colonists' voice-activated

artificial intelligence system—which still functions. And the computer has incredible news for them: There is a chance—a good chance—that they can, at long last, annihilate Thread once and for all.
