The Netflix Vision of Horror Sotiris Petridis, 2021-06-22 Since the emergence of on-demand streaming platforms, television as a storytelling medium has drastically changed. The lines between TV and cinema are blurred. Traditionally, television relied on narrative forms and genres that were highly formulaic, striving to tease the viewer onward with a series of cliffhangers while still maintaining viewer comprehension. Now, on platforms such as Netflix, the lack of commercial breaks and the practice of binge-watching have led to a new type of television flow that urges viewers to see and consume a series as a whole and not as a fragmented narrative. This book examines the structuring methods of 13 Netflix original horror series, including Chilling Adventures of Sabrina, Stranger Things, Hemlock Grove, The Haunting of Hill House, and Santa Clarita Diet. Although these shows use television as the medium of storytelling, they are structured according to the classical rules of film.

The Post-Zombie C. Wylie Lenz,,Angela Tenga,Kyle William Bishop,2025-05-22 The living dead have come a long way from the shambling corpses depicted by George A. Romero. While traditional zombie monsters continue to flourish--thanks in part to the ongoing popularity of The Walking Dead universe--the global community now features reanimated zombies, resurrected zombies, protagonist zombies, robotic zombies, romantic zombies, fake zombies, zombie-adjacent monsters, and post-zombie zombies. This collection of scholarly essays considers recent and contemporary examples of zombies in fiction, literature, popular culture, and politics from around the world and makes the case that, because of the evolution of the undead, the zombie remains an important allegorical feature of horror fiction, satire, and ideological perspectives.

Climatic and Environmental Threats to Cultural Heritage Robyn Sloggett, Marcelle Scott, 2022-11-04 Climatic and Environmental Threats to Cultural Heritage examines the challenges that environmental change, both sudden and long-term, poses to the preservation of cultural material. Acknowledging the diversity of human cultural heritage across collecting institutions, heritage sites and communities, the book highlights how, in Australia, Southeast Asia and the Pacific, the quest to preserve such precious knowledge relies on records and narratives being available to inform decisions now and into the future. Bringing together a diverse range of stakeholders who have an interest in – and responsibility for – the care of cultural heritage material and places of cultural heritage value, the book explores their thinking on and actions in relation to issues of climate change and environmental risk. Sloggett and Scott highlight the stakeholders' shared interest in drawing on their expertise to meet the challenges that environmental change brings to the future of our cultural heritage and our cultural identity. Based on the understanding that this global challenge requires local, national and international co-operation, the book also considers how local knowledge can have international application. Climatic and Environmental Threats to Cultural Heritage will be of interest to those engaged in the study of heritage, conservation, archaeology, archives, anthropology, climate change and the environment. It will also be useful to practitioners and others attempting to understand the effect of environmental change on cultural heritage around the globe.

Law, Policy and Climate Change Dariel De Sousa, 2022-09-29 Focusing on systemic risks caused by climate change, this book examines how these risks can be effectively regulated to ensure resilience and avoid catastrophe. Systemic risks are risks that threaten the systems upon which society depends, including ecosystems, social systems, financial systems, and systems of infrastructure. Such risks are typically characterised by inherent complexity, profound uncertainty, and overwhelming ambiguity. In combination, these features pose significant regulatory challenges for policy and law-makers. Examining how different types of systemic risks caused by climate change are being regulated in four different jurisdictions – the EU, the UK, the US and Australia – this book identifies deficiencies associated with regulating systemic risks using a traditional approach, based on a linear relationship between risk and regulation, which is widely used to regulate risk. The book advances a regulatory approach that is, instead, founded on the concept of risk governance. This involves a structured yet flexible, holistic, interdisciplinary and inclusive basis for responding to systemic risks; and it is, this book argues, a more effective basis for regulating systemic risks given their uncertainty, complexity and ambiguity. This book will appeal to academics, policy and law-makers and practitioners working at the intersection of law and policy in the areas of regulation, risk management and climate change.

Together We Can Claire O'Rourke,2022-07-19 Inspiring stories about people around Australia who are taking action on climate change, helping create a better future for our children and for the planet, while at the same time deepening connections with each other. 'If you ever thought you were alone in the battle for climate justice, this book will make you realise you are part of an extraordinary movement of people.' - Craig Reucassel, ABC TV's The War on Waste Millions of Australians are quietly freaking out about the state of the planet, and Claire O'Rourke is one of them. We know the science is bad - we're signing petitions, recycling our garbage and switching our light bulbs - and we know so much more needs to be done. Australia is on the front lines. It's going to take a massive, all-hands-on-deck effort to turn this around, and it can be overwhelming thinking about where to start. Together We Can is an invitation to anyone worried about what climate change means for our future and a challenge to reconnect with our communities. You can start small and simple and, before you know it, climate action is transformative, empowering and hopeful. Claire tells the stories of everyday people all around Australia who are already making a difference, and they come from every walk of life: food producers, sportspeople, financiers, psychologists, First Nations people, entrepreneurs, public servants, scientists, teachers, actors, farmers, students and retirees. Our fragmented modern lives have pulled us away from the relationships that nurture and inspire. These stories show how contributing to healing our world enriches our connections with each other, which is what we need to face uncertain times. 'You will recognise yourself in every page of this book. From there, the ways we work together to make change are boundless.' - Yael Stone, actor and founder of Hi Neighbour 'Together We Can will recharge your batteries and inspire you into action' - Damon Gameau, director of Regenerating Australia
